

Science Trivia 4

- | | |
|---|----------------------|
| 1. What do we call cave formations that rise from the floor? | stalagmites |
| 2. What kinds of rocks are formed when magma cools and hardens? | igneous |
| 3. The most dangerous insect kills a million people a year. What is it? | mosquito |
| 4. How many horns could be found on the head of a triceratops? | three |
| 5. Which instrument is used to measure wind speed? | anemometer |
| 6. What machine did Johannes Gutenberg invent? | printing press |
| 7. Who is credited with the discovery of penicillin? | Alexander Fleming |
| 8. What do we call scientists who study reptiles? | herpetologist |
| 9. What are the longest-lived tree species in the world? | <i>Ginkgo biloba</i> |
| 10. The Strait of Gibraltar connects which two bodies of water? | Atlantic Ocean |
| 11. | Mediterranean Sea |
| 12. "Sue", the most preserved T-Rex fossil ever found, was uncovered in 1990 and is on display at the Field Museum. Where was it found? | South Dakota |
| 13. Which state of matter has neither a definite shape nor a definite volume? | gas |
| 14. Which imaginary line circles the Earth below the equator (Southern Hemisphere)? | Tropic of Capricorn |
| 15. There are about 9 million cubic miles of ice on Earth. Where is most of it located? | South Pole |
