

As part of our admissions procedure, we assess the background of students from their transcripts. With a large number of applicants, this becomes a formidable task. You can help by filling in the blanks below. Do not be alarmed by the number of options. We do not expect you to have taken all of the courses listed below.

Place an \* in the grade column if you have not yet completed the course or if you plan to take it in a future quarter or semester.

| GEOLOGY COURSES                   |     |     |       | OTHER SCIENCES |                                    |     |     |       |        |
|-----------------------------------|-----|-----|-------|----------------|------------------------------------|-----|-----|-------|--------|
| Name                              | No. | Cr. | Grade | School         | Name                               | No. | Cr. | Grade | School |
| <u>SECTION I</u>                  |     |     |       |                | <u>SECTION II</u>                  |     |     |       |        |
| Stratigraphy & Paleontology       |     |     |       |                | Math (by name, e.g. Calc. I)       |     |     |       |        |
| Mineralogy & Petrology            |     |     |       |                | Physics                            |     |     |       |        |
| Structure                         |     |     |       |                | Chemistry                          |     |     |       |        |
| Geotectonics                      |     |     |       |                | Biology                            |     |     |       |        |
| Summer Field Geology              |     |     |       |                | Computer Science                   |     |     |       |        |
| Groundwater or Associated Courses |     |     |       |                | <u>ENGLISH COMPOSITION COURSES</u> |     |     |       |        |
| Geophysics                        |     |     |       |                | Name No. Cr. Grade School          |     |     |       |        |
| Other Geology/Geosciences         |     |     |       |                |                                    |     |     |       |        |
