The UM IT Senate is committed to addressing all of the technology issues listed below. However, given that resources available are limited, we need input from students to prioritize the list of items to determine which items to select for immediate attention.

Please select the four most important items to you and rank them in order of importance (1 is highest importance and 4 is lowest importance).

A. High density wireless throughout UM classrooms as opposed to convenience wireless
   i. Enabling everyone in a classroom (more than 15 devices) to be connected and using the network at once

B. Wireless internet access in campus housing facilities
   i. Dorms, Lewis & Clark apartments and University Villages

C. A single secure logon for all campus digital resources
   i. For example, using netID to log into everything (Pearson Vue, intramural sports, etc)

D. Access to all academic applications in all campus labs
   i. Adobe suite, SPSS, MatLab, etc.

E. More Tech Lounges, like in the UC
   i. Technology equipped space with flexible seating and meeting space.

F. Adequate classroom technology (projector, sound system, instructional computer) in every classroom

G. Free optional computer literacy classes for students
   i. Intended to provide all students with a baseline understanding of how to access and use UM technology

H. Consistent use of the UM online educational resources (Moodle) in all classes
   i. MyITLab, MyMathLab, Mcgraw Hill, Pearson Vue, E-Res, grades

I. An intuitive interface for students to conduct all online business with UM in one place
   i. Meal plans, library fees, printing, residence life charges

J. An effective method of communication from the university
   i. Including email, text, social media
