¹ Includes COT students

² Includes nondegree graduate students

Note: Beginning Fall 2011, UM-Missoula incorporated the new reporting methodology required for Federal IPEDS reporting that permits students to report multiple ethnicities ("Two or more Races") by checking as many individual ethnicities as they deem appropriate. Under the Federal reporting method, if a student selects "Hispanic" as one of two or more races, the student is counted as Hispanic, rather than in the Two or More Races category. While UM-Missoula will use this method as required for its annual IPEDS report, we have found that it tends to significantly understate our Native American student population. To more accurately report our Native American population for internal purposes, the Office of the Commissioner of Higher Education (OCHE) has created an alternative method wherein multiracial students reporting "Native American/Alaska Native" as one of two or more races are counted as Native American. This summary uses the alternative OCHE method. Due to this reporting change, ethnicity data published in previous editions of the Data Digest will not be comparable.
