University Planning Committee
Data Subgroup Meeting Summary
March 14, 2018

Attendance:
Present: Alford, Callaway, Chacon, Farnsworth, Kirgis, Manuel, Ressel, Schafer, Schelvan, Schwarze, Stark, Stowell

Discussion:
The subgroup reviewed the proposed rubrics and timelines. It was decided not to include APASP scores in the analysis. The subgroup decided to consider the following metrics in Stage One:

- New Student/Faculty ratio metric created by the data office and tied to course rubric
- Sum of quintile scores on APASP Criteria 3
- Budget figures
- APASP Criteria 5

For Stage Two, the subgroup agreed to use quintile scores from APASP Criteria 1, 2, 4, and 6.

The group discussed the process for making final recommendations and determined that the UPC is not well-suited to making program-specific recommendations and would prefer to present President Bodnar with an analysis of all programs to guide him in making specific recommendations.
