

Want to do Your Best in Anatomy & Physiology? Get Ready with Basic Anatomy, BIOH 108

Course Instructor: Luke Whitcher

Lucas.Whitcher@mso.umt.edu

BIOH 108 is one of Missoula College's most important course offerings for the summer. This course is a fun way to boost your understanding of human anatomy & biology, and it also serves as an important prep course for many Health Professions students.

Many Health Professions Programs require a 200-level Anatomy & Physiology course, and some students find those courses rather difficult. If you've heard those stories, and are just a bit nervous about taking the plunge, then this course is for you! The support you'll receive from class and lab instructors will give you the confidence to excel in an upper-level Anatomy class.

Course CRN# 51008

4 credits

Meets on Monday Wednesday & Thursday 3 pm – 5:20 pm
