Our current UM Catalog copy (pg. 181) includes the requirement of Math 152 and Forestry 201 or WBio 240 or Math 241 for the sequence for our Aquatic option in Wildland Restoration. It also has the requirement of Math 150 and Forestry 201 or WBio 240 or Math 241 for the sequence for our Terrestrial option in Wildland Restoration.

Hence, The Department of Ecosystem and Conservation Sciences proposes the following language for our sequence. With this e-mail we also submit it for transmittal for approval by ASCRC and the Faculty Senate.

“Wildland Restoration – Math 150 or Math 152 and Forestry 201 or WBio 240 or Math 241”

If you need further clarification or a different submission process, let me know.

Thanks!
