Please **explain/justify** the new proposal or change.

1) CSD 440 should be deleted because we would like to give senior students the option between (1) a literature review experience, and (2) a literature review followed by an independent research study. All students would continue to participate in CSD 430 where they complete a comprehensive literature review, ethics instruction, and learn how to create a study. However, students engaged in a research involving data collection and study implementation will then enroll in an independent research study that is supervised by individual faculty members, CSD 498. This format is similar to how we implement research study at the graduate level and has been a successful model for graduate level students that we would like to replicate at the undergraduate level.

2) We would like to require all of our students to take a second semester modern or classical language course (foreign language or sign language). This change would primarily affect students with associate degrees who enter our program without a language as part of their associate degree program and who are considered by the University to have fulfilled all general education requirements. Given the speech and language focus of our field, we believe that all students graduating from our program should have a substantial knowledge base in spoken or signed language.

**V Copies and Electronic Submission**
Once approved, the original, a paper copy and an electronic file are submitted to the Faculty Senate Office, UH 221 (camie.foos@mso.umt.edu).

**VI Department Summary** Required if several proposals are submitted. In a separate document list program title and proposed change of all proposals.
