

## UMOnline Information

---

UMOnline enables faculty to create and teach fully online courses and to enhance face-to-face courses with online supplements. Online courses are offered using a Learning Management System which facilitates faculty and student interaction and learning through a variety of online teaching and learning tools.

SELL provides training and support for faculty who wish to teach an online course. To learn more, visit the Instructional Design & Development page: [umonline.umt.edu/idd](http://umonline.umt.edu/idd).

---

### Request a Supplement

An online supplement provides classroom faculty with an online environment to post syllabi and other course materials. In addition, all the online tools, such as a digital grade book, discussion board and assessment instruments are available.

Any UM instructor may add an online course supplement to enhance the delivery of face-to-face courses. To request a supplement, visit [umonline.umt.edu/facstaff/m\\_supplement.aspx](http://umonline.umt.edu/facstaff/m_supplement.aspx).

---

### Tech Support for Online Courses

Technical support is available for faculty, students, and staff. Contact information for the UMOonline Tech Support Desk and IT Central can be found here: [umonline.umt.edu/tech/support.aspx](http://umonline.umt.edu/tech/support.aspx).
