Last updated Autumn 2024

Must have one course in A, B, C, & D designation.

English B.A. - Teaching English

The English Teaching program provides content knowledge, pedagogy, and professional experiences required for teaching literacy in a democratic society. Based on current research and best practices, the English Teaching program integrates the study of language, literature, and media. The program creates learning communities and supports teachers as critical thinkers, creative problem solvers, and reflective practitioners. Students who successfully complete this concentration and the requirements from the College of Education receive both a B.A. in English and a secondary teaching license (grades 5-12) in English. At the graduate level, the English Teaching program offers advanced theory and pedagogy courses, culminating in an M.A. in English. The English Teaching Program is also the home of the Montana Writing Project, which is dedicated to improving the teaching and learning of writing at all grade levels and offers a special focus on meeting the state-mandated Indian Education for All. Graduates of the program have become Montana Teachers of the Year and National Board of Certified Teachers.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the non-teaching track since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
- Licensure Degree Requirements (p. 151)

General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - English; Teaching English Concentration

### Course Requirements

### Language Requirement<sup>2</sup>

|             |      |       |       |                                                                                                        |     |
|-------------|------|-------|-------|--------------------------------------------------------------------------------------------------------|-----|
| Course List | Code | Title | Hours | Complete the first year-level proficiency in either a modern or classical language other than English. | 4-8 |
|-------------|------|-------|-------|--------------------------------------------------------------------------------------------------------|-----|

**Total Hours** **46-50**

<sup>1</sup> Students must be admitted to the Teacher Education program prior to enrolling in ENT 440, ENT 445, and ENT 442. Other EDU pre-/co-requisites also apply to ENT 440, ENT 445, and ENT 442.

<sup>2</sup> Students may either take four sequential semesters (101, 102, 201, 202) of a language sequence or demonstrate proficiency through examination. Language proficiency examinations are available through the Department of World Languages and Cultures.

### Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more

information, see the Teaching and Learning Department webpage (<https://www.umd.edu/education/departments/currinst/default.php>).

Last updated Autumn 2024

<sup>1</sup> Students must be accepted into the Teacher Education Program to complete ENT/EDU requirements

<sup>2</sup> Must take another NASX course if they do not take NASX 304E

English Minor  
General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Minor - English  
Course Requirements

| Code                                                                                                               | Title | Hours     |
|--------------------------------------------------------------------------------------------------------------------|-------|-----------|
| <b>Foundational Courses</b>                                                                                        |       |           |
| Complete any two 200-level courses with LIT or CRWR prefixes.                                                      |       | 6         |
| <b>Focus Courses</b>                                                                                               |       |           |
| Complete any four upper-division English elective courses with the prefixes LIT, ENIR, FILM, or CRWR. <sup>1</sup> |       | 12        |
| <b>Total Hours</b>                                                                                                 |       | <b>18</b> |

<sup>1</sup> Some of these upper-division courses carry prerequisites, so students should select lower- and upper-division courses carefully to ensure those prerequisites are met. Students wishing to enroll in 300- or 400-level CRWR workshops (CRWR 310/CRWR 311/CRWR 312A/CRWR 410/CRWR 411/CRWR 412) must complete the 200-level CRWR pre-requisite. CRWR 410/CRWR 411/CRWR 412also require a writing submission for consent of instructor. Students wishing to enroll in upper-division LIT courses need to take 6 credits of LIT at the 200-level, LIT 300, and/or receive consent of instructor.

English Teaching Minor

The English Teaching program provides content knowledge, pedagogy, and professional experiences required for teaching literacy in a democratic society. Based on current research and best practices, the English Teaching program integrates the study of language, literature, and media, creating learning communities and supporting teachers as critical thinkers, creative problem solvers, and reflective practitioners. Students who successfully complete this option and the requirements from the College of Education receive a secondary teaching license (grades 5-12) in English. The English Teaching Program is also the home of the Montana Writing Project, which is dedicated to improving the

teaching and learning of writing at all grade levels and offers a special focus on meeting the state-mandated Indian Education for All.

**Notes:**

- This minor contains requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Teaching English Courses

Complete all of the following courses:

|         |                                           |   |
|---------|-------------------------------------------|---|
| ENT 439 | Studies in Young Adult Literature         | 3 |
| ENT 440 | Teaching Writing in Secondary School      | 3 |
| ENT 442 | Teaching Oral Language & Media Literature | 3 |
| ENT 445 | Teaching Reading, & Literature            | 3 |

Complete one of the following courses:

|           |                      |   |
|-----------|----------------------|---|
| LING 270S | Intro to Linguistics | 3 |
| LING 470  | Linguistic Analysis  |   |

### Language Requirement <sup>1</sup>

|                                                                                                        |     |
|--------------------------------------------------------------------------------------------------------|-----|
| Complete the first year-level proficiency in either a modern or classical language other than English. | 4-8 |
|--------------------------------------------------------------------------------------------------------|-----|

**Total Hours** **40-44**

<sup>1</sup> Students need to take one year (two semesters - 101 and 102) of a language sequence or demonstrate proficiency through examination. Language proficiency examinations are available through the Department of World Languages and Cultures.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Irish Studies Minor

The Department of English offers an interdisciplinary minor in Irish Studies, which provides students access to instruction in Irish language, history, literature, and culture. This academic and artistic approach to Irish culture involves an interdisciplinary and inter-collegiate collaboration that brings together leading scholars in the humanities and the creative arts.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| THTR 391                                       | Special Topics/Experimental Courses <sup>3</sup>                  |           |
| <b>Total Hours</b>                             |                                                                   | <b>20</b> |

<sup>1</sup> Students who wish to continue with Irish language through the 202 level may do so, but only Irish language IRSH 103 and IRSH 201 can count for minor electives.

<sup>2</sup> LIT 376 & LIT 391 may count toward the Irish Studies minor when the topics cover Irish themes, content, and literature.

<sup>3</sup> Irish Theater is offered intermittently through the College of Visual and Performing Arts as THTR 391.

## History

The History Department offers an exciting program of instruction for undergraduates in search of an education. The curriculum is designed to provide knowledge and understanding of the background and ramifications of present local, national, and world affairs. The program emphasizes historical analysis and critical thought rather than the memorization of facts. History majors are taught how to read critically, analyze thoughtfully, conduct research carefully, and write intelligently.

The department offers a wide variety of courses ranging in time, space, and theme. Courses span the full range of American history from the colonial period through the recent past. More specialized courses in local and regional history focus on Montana, the West, and the northern Rockies. Offerings in European and world history emphasize social, cultural, and intellectual history, French and German history, British history, Russian and Soviet history, Latin American history, Islamic civilization, East Asian history, and Central and Southwest Asian history. Topical courses explore issues of democracy, diplomacy, human rights, war and peace, terrorism, race and gender, religion, and environmental history.

History provides not only a basis for future employment but also, more importantly, furnishes knowledge and perspective for intelligent leadership in community affairs. Graduates are employed in federal, state, or local governments, with positions ranging from elected office to research analysts. Many teach history in middle schools and high schools while others pursue advanced degrees at the graduate level. Still others go on to attain professional degrees in law, journalism, and business.

The History Department at the University of Montana boasts professors with award-winning scholarship and active research agendas, which greatly enhances the education and training we provide to our students.

The Department offers the Bachelor of Arts, Master of Arts, and Doctor of Philosophy degrees.

Our graduate students have found great success in a diverse range of occupations in public history, in education, and in academia.

## History B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - History

- A minimum of 40 credits in History are required, 21 of which must be upper-division credits.
- Credits from Advanced Placement and International Baccalaureate do not count toward these credit requirements.

|--------------------|-----------|

- <sup>1</sup> Those students scoring a "5" on either the American History or European History AP exam are excused from this requirement. These students earn credit toward the requirement and graduation, but do not earn credit toward the history degree.
- <sup>2</sup> Courses with American history content offered in other departments may count toward the History major with consent of the History Department Chair.
- <sup>3</sup> Courses with World history content offered in other departments may count toward the History major with consent of the History Department Chair.
- <sup>4</sup> Courses with European history content offered in other departments may count toward the History major with consent of the History Department Chair.

## History B.A. - History Education

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, students will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - History; History Education Concentration

- Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure

requirements. See the Department of Teaching and Learning in the College of Education for more information.

- Students who choose to complete the concentration in History Education must also complete the teaching concentration in a major or education minor in a second field.

**Upper-Division History Electives**

Complete two additional HSTA or HSTR courses at the 300-level and above. 6

**Teaching Methods Requirement**

Complete the following course:

|         |                                                       |   |
|---------|-------------------------------------------------------|---|
| EDU 497 | Teaching and Assessing (Methods: 5-12 Social Studies) | 4 |
|---------|-------------------------------------------------------|---|

**Total Hours** 46

<sup>1</sup> Courses with American history content offered in other departments may count toward the History major with consent of the History Department Chair.

<sup>2</sup> Courses with World history content offered in other departments may count toward the History major with consent of the History Department Chair.

<sup>3</sup> Courses with European history content offered in other departments may count toward the History major with consent of the History Department Chair.

**Secondary Teaching Licensure**

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the

requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

**History-Political Science B.A.**

This major is intended solely for students who want to be licensed to teach history, government, and one additional social science at the middle and high school levels.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the academic major since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, students will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

**General Degree Requirements**

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

**Bachelor of Arts - History-Political Science**

- Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. Students are eligible for a teaching license in social studies broadfield. See the Department of Teaching and Learning for more information.

## History Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
  - Licensure Degree Requirements (p. 151)
- To complete this teaching track, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

**Teaching Methods Requirement**

Complete the following course:

|         |                                                       |   |
|---------|-------------------------------------------------------|---|
| EDU 497 | Teaching and Assessing (Methods: 5-12 Social Studies) | 4 |
|---------|-------------------------------------------------------|---|

**Total Hours** **25**

<sup>1</sup> Courses with World history content offered in other departments may count toward the History minor with consent of the History Department Chair.

<sup>2</sup> Courses with American or European history content offered in other departments may count toward the History minor with consent of the History Department Chair.

**Secondary Teaching Licensure**

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umd.edu/education/departments/currinst/default.php>).

## History of Religions Certificate

### General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - History of Religions

**Total Hours** **12**

<sup>1</sup> Three credits of electives must be taken within the History department. Substitutions, including independent studies or special offerings in public history, require approval of the Public History Coordinator.

## Linguistics

Linguistics is the scientific study of language. The BA in linguistics is appropriate for any student who is interested in science or language. Students are introduced to core areas of linguistics (the structure of speech sounds, words, and sentences) as well as a broad range of related topics including language use, development, variation, change, and endangerment. The emphasis throughout is on developing strong data-

analysis and critical-reasoning skills. Recommended areas of study in addition to linguistics are World Languages and Cultures, Anthropology, CSD, English, Communication Studies, Sociology, Education, Information Technology, Environmental Science, Political Science, and Psychology.

- Linguistics B.A. (p. 242)
- Linguistics Minor (p. 243)
- English as a Second Language Certificate (p. 243)

# Linguistics B.A.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Linguistics

## Four Year Plan

Note: 8-10 credits of language coursework are required for this major. Language courses and placement exams taken to satisfy General Education Requirements cannot be used to satisfy the language requirement for the major. Any combination of languages courses can be used to satisfy the major's language requirement, as long as the courses were not also used to satisfy the General Education Requirements for Foreign Language

## Five Year B.A./M.A. Plan (Undergraduate Portion Only)

Students in this program complete a total of 96 undergraduate (UG) credits by Year 3 and apply to the graduate program. If accepted, students take 12 graduate credits in Year 4 as undergraduate, which are transferred to the graduate school in Year 5 (graduate)

| Course                                 | Title                                                                            | Hours     |

*Last Updated Autumn 2023*

<sup>1</sup> LING 375X is the only course in the major that fulfills the Intermediate Writing requirement for General Education

<sup>2</sup> LING 471/LING 571 and LING 472/LING 572 rotate as a fall-only offering and will not be offered in the same year. BA/MA students will take LING 572 in Year 5 (Graduate School)

<sup>3</sup> Advanced Writing can be fulfilled with one of the following Linguistics Electives: LING 473 (Spring only) or LING 484 (Fall only)

## Linguistics Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Multidisciplinary Studies B.A.

The Bachelor of Arts in Multidisciplinary Studies at the University of Montana is intended for students seeking to complete a flexible Bachelor's degree with coursework from departments across the university, providing each student an opportunity to reach beyond disciplinary boundaries and to create a degree program that is tailored to meet their unique education and career goals. The multidisciplinary nature of the program is designed to develop students' ability to combine different fields into a structured format and is meant to encourage and support creativity, innovation, critical thinking, and integrative and experiential learning.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Multidisciplinary Studies

As part of the curriculum, students must develop a degree plan tailored to their academic and professional goals. Students will initially meet with an academic advisor from the College of Humanities & Sciences Advising

Center who will assist the student in developing a proposed degree plan curriculum which must satisfy each of the following requirements:

- Earn at least 120 credits with a cumulative grade point average of 2.0 or better.
- A minimum of 30 credits must be earned from the University of Montana-Missoula
- Satisfy the University of Montana General Education requirements
  - The University of Montana will accept transfer students with completed AA or AS degrees from other regionally accredited institutions as having fulfilled their UM general education requirements.
- Complete a Multidisciplinary Studies Track, including a minimum of 39 upper division credits which satisfies the following:
  - The Track represents a cohesive set of courses from at least two different academic disciplines, with:
    - at least 15 upper division credits in one of these disciplines;
    - at least 3 of the upper division credits in a senior level capstone experience to be determined in consultation with an academic advisor (i.e. capstone, internship, applied research project, thesis, etc.)
- The Track must be approved through one of the following:
  - A committee of at least 3 faculty representatives from the academic disciplines integrated into the Track;
  - OR: A pre-approved Multidisciplinary Studies Track that has been developed in consultation with faculty from multiple disciplines, and approved by the Dean of the College of Humanities & Sciences.
- A grade of "C-" or higher must be earned in all courses in the Track.

## Four Year Plan

Students interested in pursuing Multidisciplinary Studies (MLTD) should focus on General Education Requirements and explore courses until they have earned 45 credits — then begin developing an MLTD plan for approval.

| Course                                                    | Title              | Hours     |

## Native American Studies

The Native American Studies Department at the University of Montana builds its curriculum on the foundation of three interrelated principles: sovereignty, indigeneity and community well-being. In so doing we pay close attention to the continuing role of traditional value systems, the impacts of colonization and the efforts toward decolonization within tribal communities. We define sovereignty broadly as one of the rights of all indigenous peoples, including both the political-legal foundations as provided in U.S. law and policy and self-determination more generally. Indigeneity underlies the unique holistic relationship that Native American communities have to the land and to the environment. In addition, our degree program not only intends to advance the well-being of our individual students, both native and non-native, but also to enhance the well-being of Indigenous communities across Montana, the United States and globally, by providing necessary and relevant education about those communities as well as the skills and knowledge for those working within those communities to do so effectively. Our curriculum and the foundations of faculty research are broadly cross-disciplinary with these principles at their base.

Native American Studies is an academic discipline committed to examining the contemporary and past experiences and life ways of the indigenous nations of North America from their perspective. The curriculum is designed to provide a study of American Indians from a holistic and humanistic viewpoint by focusing upon their cultures, history, and contemporary life. Courses are designed for both Native American and non-Native American students so they can better understand human similarities and differences, thereby leading to more effective work with and within tribal communities, through stronger knowledge bases of tribal America, and the development of better communications and cross-cultural relationships.

The Native American Studies major supports the objectives of a liberal arts education. It is interdisciplinary and provides a perspective that

critically analyzes and evaluates the strengths and limitations of each contributing discipline.

- Native American Studies B.A. (p. 245)
- Native American Studies Minor (p. 246)
- Language Rejuvenation and Maintenance Certificate (p. 247)
- Native American Studies Certificate (p. 247)

## Native American Studies B.A. General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Native American Studies

- This major requires a minimum GPA of 2.5.

## Native American Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Minor - Native American Studies

- This minor requires a GPA of 2.5.

### Course Requirements

| Code                                           | Title                                                 | Hours |

## Language Rejuvenation and Maintenance Certificate

The Certificate in Language Rejuvenation and Maintenance has been broadly designed to meet the needs of students interested in language revitalization, instructors of Native languages seeking to learn of, and acquire skills for, successful language instruction and acquisition, or administrators involved in language revitalization programs.

### General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Language Rejuvenation and Maintenance Course Requirements

## Philosophy

Philosophy is the search for an understanding of how the world as a whole hangs together and of how we are to assume our place in the world. Philosophy pursues its goal first of all historically. It is the trustee of the heritage of great philosophical texts, and it engages those texts in conversation with contemporary problems. Second, philosophy turns to the contemporary world directly and tries to illuminate and advance its concerns with ethics and art, with science and technology, with ecology and feminism, with law and medicine. Bachelor of Arts and Master of Arts degrees are offered.

More information is available online at the Philosophy Department website (<http://hs.umd.edu/philosophy/>).

- Ethics Minor (p. 255)

## Philosophy B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| PHL 473                                                                                                                                                                                   | Nietzsche                                 |   |

|         |                        |
|---------|------------------------|
| PHL 478 | Critical Theory        |
| PHL 490 | Undergraduate Research |
| PHL 491 | Special Topics         |
| PHL 492 | Independent Study      |
| PHL 494 | Seminar                |
| PHL 498 | Internship             |

#### Advanced Writing Course

Complete the following course:

|         |                                |   |
|---------|--------------------------------|---|
| PHL 400 | Advanced Writing in Philosophy | 1 |
|---------|--------------------------------|---|

#### Upper-Division Seminar Requirement

Of the upper-division requirements (upper-division core and upper-division electives), 9 of the required 18 credits must be at the 400-level, excluding PHL 498.

|                    |           |
|--------------------|-----------|
| <b>Total Hours</b> | <b>31</b> |
|--------------------|-----------|

<sup>1</sup> Special Topics courses taught at the 300- or 400-level (PHL 391 and PHL 491) may count as upper-division area courses provided that they have a suitable content. Consult the department advisor for additional information.

## Four Year Plan

| Course                        | Title                                         | Hours     |
|-------------------------------|-----------------------------------------------|-----------|
| <b>Freshman</b>               |                                               |           |
| <b>Autumn</b>                 |                                               |           |
| PHL 101L                      | Introduction to Philosophy                    | 3         |

<sup>1</sup> Special Topics courses taught at the 300- or 400-level (PHL 391 and PHL 491) may count as upper-division area courses provided that they have a suitable content. Consult the department advisor for additional information.

# Philosophy B.A. - Environmental Philosophy

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Philosophy; Environmental Philosophy Concentration

### Course Requirements

| Code                                                                      | Title                                     | Hours |

| Of the upper-division requirements (upper-division core and upper-division electives), 9 of the required 18 credits must be at the 400-level, excluding PHL 498. |                                |           |
| <b>Total Hours</b>                                                                                                                                               |                                | <b>31</b> |

<sup>1</sup> Special Topics courses taught at the 300- or 400-level (PHL 391 and PHL 491) may count as upper-division area courses provided that they have a suitable content. Consult the department advisor for additional information.

## Philosophy B.A. - Philosophy and Law

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Philosophy; Philosophy and Law Concentration

### Course Requirements

| Code                                   | Title                     | Hours |

| Of the upper-division requirements (upper-division core and upper-division electives), 9 of the required 18 credits must be at the 400-level, excluding PHL 498. |                                           |           |
| <b>Total Hours</b>                                                                                                                                               |                                           | <b>31</b> |

<sup>1</sup> Special Topics courses taught at the 300- or 400-level (PHL 391 and PHL 491) may count as upper-division area courses provided that they have a suitable content. Consult the department advisor for additional information.

# Environmental Ethics Certificate

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Environmental Ethics

### Course Requirements

| Code                                                                                                        | Title                                                 | Hours |

## Philosophy, Politics, and Law Certificate

The Philosophy, Politics, and Law (PPL, pronounced “People”) certificate provides students with the opportunity to learn about the philosophical foundations, history, and social practice of human rights and liberties in modern democracies. Students are expected to gain a deep understanding of how our legal and political institutions have functioned in the past, how they currently function, and how they ought to function, as well as how citizens might play a meaningful role in them.

While philosophical analysis focuses on what constitutes legitimate political authority and its exercise over individual behavior, one also need to understand how human social and political life actually works. Conversely, one’s grasp of political, legal, and social behavior is greatly enriched by a conceptual and foundational perspective on the norms of behavior. Political Science, philosophy, and other disciplines such as history, sociology, or economics are thus perfectly complementary when it comes to advancing one’s understanding of our legal and political institutions.

Students who successfully complete the PPL certificate will gain substantial knowledge of democratic political ideas, practices, and institutions from multiple disciplines as well as solid skills in reading, writing, oral communication, and analytic thinking. This is a useful background for students planning to pursue graduate degrees in law, philosophy, political science, or history. It is also a good springboard for careers in business, public service, international affairs, journalism, and teaching.

The PPL certificate requires students to take a total of 27 credits (9 courses), including 9 credits (3 courses) in philosophy, 9 credits (3 courses) in political science, and 9 credits (3 courses) in either history, sociology, or economics. In philosophy and political science, it is required that at least 1 course (3 credits) be upper-division in each discipline. The certificate will be easy to complete for students who decide to major or minor in either philosophy or political Science, or both.

Courses taken to fulfil the PPL certificate also satisfy a wide range of general education requirements, including E, H, S, X and Y.

To stay in the program, students must maintain an overall G.P.A. of 3.0. All courses chosen for the certificate must be completed with a grade of C or better.

The certificate is jointly administered by the Department of Philosophy, the Department of Political Science, and the Pre-Law Program. Primary contacts are Prof. Soazig Le Bihan (soazig.lebihan@umontana.edu) and

Prof. Ramona Grey (ramona.grey@umontana.edu), Chair of the Political Science Department.

Students interested in pursuing the PPL certificate must receive formal approval from one of the primary contacts listed above.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Philosophy, Politics, and Law

- This certificate requires a GPA of 3.0.

### Course Requirements

| Code                                                                                                                               | Title                                     | Hours |
|------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------|
| <b>Philosophy</b>                                                                                                                  |                                           |       |

## Pre-Law Certificate

The Pre-Law Certificate offers UM students interested in pursuing a legal career the opportunity to become well-prepared applicants for law school. The certificate includes a Freshman Seminar that sets students up for success by helping take their education and personal development into their own hands and on the right track. In their sophomore year, students are required to engage in an internship, study abroad, research, or any other real-life educational experience. In their third year, students take the pre-law seminar in which they become familiar with the application process and the expectations of the legal profession as well as a course fostering their analytical thinking skills to prepare for the LSAT. Finally, seniors complete a capstone project.

The UM Pre-Law Program team recommends that students also consider pursuing the Philosophy, Politics, and Law Certificate (p. 252) in order to gain substantial understanding of the legal and political systems from a variety of disciplinary perspectives.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Pre-Law

- This certificate requires a minimum grade of C in all courses.

### Course Requirements

| Code                                   | Title                   | Hours |

<sup>1</sup> Any course taken to fulfill a lower-division core requirement cannot also count as an elective. Special Topics courses taught at the 400-level (PHL 491) may count as upper-division core courses provided that they have a suitable content. Consult the department advisor for additional information.

## Ethics Minor

Understanding ethical practices and increasing ethical knowledge is important to a successful life, both personally and professionally. Tailored to students majoring in other disciplines, UM-Missoula's Ethics Minor is designed to enhance the capacities of critical thinking, social engagement, and reflection on major moral issues. The interdisciplinary curriculum provides students with training in ethical frameworks and methods to help ensure successful execution of both future professional duties and personal endeavors. Students will acquire tools for critical reflection that will help them to address the major moral challenges of the 21st century, and strengthen their ability to pursue careers in business, science, journalism, advocacy, nonprofit work, law, and health care (among others).

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Ethics

- At least 6 credits for this certificate must be in courses numbered 300 and higher.

**Total Hours** **18**

<sup>1</sup> Special Topics courses taught at the 300- or 400-level (PHL 391, PHL 491) may count as upper-division ethics/value courses at the discretion of the Philosophy Department advisor provided that the course has suitable content.

<sup>2</sup> Courses that satisfy either the Lower-Division Ethics/Value requirement or the Upper-Division Ethics/Value requirement cannot also satisfy the Elective Ethics/Value requirement.

## Political Science

Political Science is the systematic study of politics. Politics influence how people and institutions exercise and resist power. Political Science, therefore, is concerned with how nations and communities are governed and who governs them. The departmental faculty members have as their mission the engagement and enlightenment of their students, professional colleagues, and fellow citizens about the nature of politics.

The department offers a varied undergraduate curriculum covering domestic, foreign, and international politics. By meeting the requirements outlined below, a student may earn a bachelor's degree in political science or in political science-history; a minor in political science or global public health; or a bachelor's degree in political science with a concentration in one of the following: American politics, international relations and comparative politics, public administration and public policy, non-profit administration, international development studies, or public law. A Master of Arts degree in political science and a Master of Public Administration degree are also offered.

The scope of the faculty's interest and research is wide. They bring special insights gained through study and residence in Europe, Russia, Africa, Central Asia, India, the Far East and Latin America, as well as in Montana and Washington, D.C.

Courses offered in the department are designed to: (1) assist students to secure a broad liberal education and to equip them with the foundations for American citizenship; (2) provide undergraduate preparation for those students who propose to continue study at the graduate level with the ultimate goal of college teaching and research; (3) offer a broad program of training for those students who plan careers in government or politics; 4) assist in preparing students for careers in teaching at both the elementary and secondary levels; (5) provide a sound background for those students who intend to enroll in law and other professional schools.

The major fields of political science are (1) American government and politics with national, state and local government, and public law as sub-fields; (2) public administration and public policy; (3) political theory; (4) comparative government; (5) international relations, organization and law. Majors are eligible for membership in Pi Sigma Alpha, the national political science honorary and are active in student political activities. The Department of Political Science secures a number of legislative

and administrative internships in state and local government each year. Internships and other learning opportunities in Washington, D.C., are also available.

- Political Science B.A. (p. 256)
- Political Science B.A. - American Politics (p. 258)
- Political Science B.A. - International Relations and Comparative Politics (p. 259)
- Political Science B.A. - Political Science Education (p. 261)
- Political Science B.A. - Public Administration and Public Policy (p. 262)
- Political Science B.A. - Public Law & Political Theory (p. 264)
- Political Science Minor (p. 265)
- Political Science Education Minor (p. 266)
- Migration Studies Certificate (p. 268)

## Political Science B.A. General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Political Science

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.
- An internship is strongly recommended.

### Course Requirements

Last updated Autumn 2024

Political Science students may select one or more of the following concentrations:

- General Political Science
- American Politics
- International Relations & Comparative Politics

Please speak with your faculty mentor when selecting concentrations. These courses are part of the plan above and do not require additional credits

- Public Administration & Public Policy
- Public Law

# Political Science B.A. - American Politics

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Political Science; American Politics Concentration

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.
- An internship is strongly recommended.
- Students can use the same 300/400 course to fulfill both an upper-division field requirement and the degree electives for the concentration, but they cannot double-count the course credits.

## Course Requirements

| Code                                    | Title                                      | Hours |
|-----------------------------------------|--------------------------------------------|-------|
| Lower-Division Required Courses         |                                            |       |
| Complete all of the following courses:  |                                            |       |
| PSCI 210S                               | Intro to American Government               | 3     |
| PSCI 220S                               | Intro to Comparative Government            | 3     |
| PSCI 230X                               | Intro to International Relations           | 3     |
| PSCI 250E                               | Intro to Political Theory                  | 3     |
| Advanced Writing Requirement            |                                            |       |
| Complete the following course:          |                                            |       |
| PSCI 400                                | Advanced Writing in Political Science      | 1     |
| Electives in American Politics          |                                            |       |
| Complete four of the following courses: |                                            |       |
| PSCI 335                                | American Foreign Policy                    | 12    |
| PSCI 340                                | Experimental Offering: American Government |       |
| PSCI 342                                | Media, Public Opinion, Polling             | 12    |
| PSCI 344                                | State and Local Government                 |       |
| PSCI 345                                | American Political System                  | 12    |
| PSCI 348                                | US Multicultural Politics                  |       |
| PSCI 349                                | Montana Government and Politics            | 12    |
| PSCI 352Y                               | American Political Thought                 |       |
| PSCI 365                                | Public Policy Issues and Analysis          | 12    |
| PSCI 370                                | Courts and Judicial Politics               |       |
| PSCI 440                                | Experimental Offering: American Government | 12    |
| PSCI 443                                | Politics of Social Movements               |       |

|                                                                                          |                                                                      |
|------------------------------------------------------------------------------------------|----------------------------------------------------------------------|

**Total Hours****37**

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Political Science B.A. - International Relations and Comparative Politics

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of

Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Political Science; International Relations and Comparative Politics Concentration

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.
- To complete the concentration with 37 credits, students should complete the four Required Upper-Division Field Courses with one course from the International Relations list and one course from the Comparative Government list. As shown below, students who do so need just four additional courses in IR and Comparative to complete the concentration.
- Two years of language study and/or a study-abroad program is strongly recommended.
- An internship is strongly recommended.

**Total Hours****37**

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Political Science B.A. - Political Science Education

- This concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching

areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- For an endorsement in the major teaching field of Government, a student must complete the requirements for the B.A. degree with a major in Political Science (see below). Individuals holding a baccalaureate degree must meet these requirements by completing the courses listed below or demonstrate course equivalency. This does not qualify as a single-field endorsement. The demand for teaching in this field is limited. The required second endorsement (either a teaching major or a teaching minor) should be in a field in high demand.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Political Science; Political Science Education Concentration

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.

## Course Requirements

| Code                                   | Title                                 | Hours |
|----------------------------------------|---------------------------------------|-------|
| <b>Lower-Division Required Courses</b> |                                       |       |
| Complete all of the following courses: |                                       |       |

PSCI 471 American Constitutional Law

PSCI 474 Civil Rights

**Electives**

Complete twelve additional elective credits from PSCI courses numbered 300 and above. 12

**Political Science Education Requirement**

Complete the following course:

EDU 497 Teaching and Assessing 3

**Total Hours** 40

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

**Secondary Teaching Licensure**

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Political Science B.A. - Public Administration and Public Policy

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Political Science; Public Administration and Public Policy Concentration

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.
- Students can use the same 300/400 course to fulfill both an upper-division field requirement and the degree electives for the concentration, but they cannot double-count the course credits.
- A legislative or administrative internship is strongly recommended.

### Course Requirements

| Code                                                        | Title                                              | Hours |
|-------------------------------------------------------------|----------------------------------------------------|-------|
| <b>Lower-Division Required Courses</b>                      |                                                    |       |
| Complete all of the following courses:                      |                                                    |       |
| PSCI 210S                                                   | Intro to American Government                       | 3     |
| PSCI 220S                                                   | Intro to Comparative Government                    | 3     |
| PSCI 230X                                                   | Intro to International Relations                   | 3     |

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Political Science B.A. - Public Law & Political Theory

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Bachelor of Arts - Political Science; Public Law and Political Theory Concentration

- Students pursuing a Major in Political Science must take a minimum of 37 credits of political science (PSCI) courses, including one 300-400 level course in four of the five major fields.
- 21 of the 37 credits must be in upper-division courses.
- No more than 7 credits of PSCI 492 and PSCI 498 combined may count toward the 37 required credits.
- Students can use the same 300/400 course to fulfill both an upper-division field requirement and the degree electives for the concentration requirements, but they cannot double-count the course credits.
- An internship is strongly recommended.

### Course Requirements

| Code                                                  | Title                                     | Hours |
|-------------------------------------------------------|-------------------------------------------|-------|
| <b>Lower-Division Required Courses</b>                |                                           |       |
| Complete all of the following courses:                |                                           |       |

**Total Hours** 37

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Political Science Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

**Total Hours** **21**

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Political Science Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
- Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

<sup>1</sup> PSCI 480 may apply to any of the categories with the consent of the instructor. Courses may only count toward one category of requirements.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

# Migration Studies Certificate

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Migration Studies

## Psychology

Psychology is the science of the behavior of humans and other animals. The psychologist, using scientific methods, seeks to understand the causes and purposes of behavior. Psychologists pursue their research and its application in academia, business, government, health, military and social service. The department offers training that leads to the

Bachelor of Arts, Master of Arts, Specialist in School Psychology (SSP), and Doctor of Philosophy degrees.

- Psychology B.A. (p. 269)
- Psychology B.A. - Psychology Education (p. 270)
- Psychology Minor (p. 272)
- Psychology Education Minor (p. 272)
- Sport Psychology Minor (p. 273)
- Human and Family Development Minor (p. 273)

## Psychology B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Bachelor of Arts - Psychology

- Students must complete a minimum of 60 credits in non-psychology courses.
- PSYX 290, PSYX 292, and PSYX 298 are limited to 6 credit hours.
- PSYX 390, PSYX 392 and PSYX 398 are limited to 3 credit hours.
- PSYX 330, PSYX 340, PSYX 360, and PSYX 385 may only count towards one category within the Psychology major.

Last Updated Autumn 2024

<sup>1</sup> Note that you will satisfy the General Education Requirement (GER) for Social Sciences with PSYX 100S. You can satisfy three credits of the Natural Sciences GER with PSYX 250N, which is an option for a fundamental course

<sup>2</sup> Advanced Writing courses include: PSYX 320 and PSYX 400

Psychology B.A. - Psychology Education

- This concentration contains additional course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
- Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- This major and concentration do not qualify as a single-field endorsement. The demand for teaching in this field is limited. The required second endorsement (either a teaching major or a teaching minor) should be in a field in high demand.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Psychology; Psychology Education Concentration

- Students must complete a minimum of 60 credits in non-psychology courses.
- PSYX 290, PSYX 292, and PSYX 298 are limited to 6 credit hours.
- PSYX 390, PSYX 392 and PSYX 398 are limited to 3 credit hours.
- PSYX 330, PSYX 340, PSYX 360, and PSYX 385 may only count towards one category within the Psychology major.

| <b>Total Hours</b> | <b>48-49</b> |
|--------------------|--------------|

<sup>1</sup> May not include PSYX 392, PSYX 398, or PSYX 499.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more

information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Psychology Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Psychology Education Minor

- This minor contains additional course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- This minor does not qualify as a single-field endorsement. The demand for teaching in this field is limited. The required second endorsement (either a teaching major or a teaching minor) should be in a field in high demand.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Sport Psychology Minor

The Sport Psychology Minor, an interdisciplinary program, is for students in any major course of study who wish augment their education with a further understanding of the mental components and principles of sport and human performance as well as evidence-based techniques for improving functioning in this area. It includes core courses in Psychology and Kinesiology with electives in both of those disciplines in addition to options in Counseling Coaching Health, and Athletic Training.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Sport Psychology

- Students must take all core and elective courses from the University of Montana's curriculum, but can receive credit for transfer courses upon approval of IPAT advisor.

## Human and Family Development Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Human and Family Development

- This minor requires a minimum grade of C in all courses.
- This minor requires a minimum GPA of 2.5.
- To earn the minor in Human and Family Development, the student must:
  - Complete 24 credits, with 11 at the 300-level or above.
  - Complete the 12-credit core curriculum and, with the help of a faculty advisor, develop a written statement of goals and interests along with a planned curriculum that includes 12

additional credits of electives consistent with their stated goals and interests.

- At least 6 credits of electives must be outside of the student's major.

<sup>1</sup> HFD 494 may be taken for 1 credit.

<sup>2</sup> HFD 498 must be taken for a minimum of 2 credits. Social Work majors may use S W 495 hours to fulfill the HFD 498 requirement.

<sup>3</sup> The list of electives is categorized to assist the student wishing to focus on one of these areas. Students may plan curricula which do not correspond to these categories, but should choose among courses from this list. Occasionally special topics courses are offered. Students may use these as electives with the consent of their advisors. Check with departments regarding variable-credit special topics listings.

## Sociology & Criminology

Sociology is the study of social life, social change, and the social causes and consequences of human behavior" (American Sociological Association 2002:1). Criminology is an area of study within sociology that examines the social causes and consequences of crime.

Sociology & Criminology faculty at the University of Montana conduct research on social issues facing our local community, the Intermountain West region, and beyond. Faculty research addresses theoretical issues such as the causes of interpersonal violence as well as practical matters, such as racial disparities in sentencing and the dynamics of inequality in the American west. Sociology & Criminology faculty use a wide array

of methodological strategies in their research and teaching, including quantitative, qualitative, and mixed-methods data collection techniques.

Students in the department have a choice of three degrees:

1. The general Sociology major provides a broad foundation in sociological theory and research and exposure to courses covering a wide range of topics in the discipline.
2. The Sociology major with a concentration in Inequality and Social Justice offers the same theoretical and research training as the general Sociology major, but allows students to focus their coursework on the causes and consequences of inequality based on class, gender, race/ethnicity, and other identities.
3. The Criminology major allows students to focus their studies on crime and the criminal justice system while still acquiring a solid foundation in the discipline of Sociology.

- Criminology B.A. (p. 275)
- Criminology Minor (p. 277)
- Sociology B.A. (p. 277)
- Sociology B.A. - Inequality and Social Justice (p. 278)
- Sociology B.A. - Sociology Education (p. 280)
- Sociology Education Minor (p. 280)
- Sociology Minor (p. 281)

## Criminology B.A.

Criminology is an area of study within sociology that examines the social causes and consequences of crime. Coursework focuses on the dynamics of victimization and offending, the operation of the criminal justice system, and the impact of income inequality and racial disparities on crime and punishment. Students will graduate from the Criminology program with a deep knowledge of the criminal justice system, a systemic understanding of inequality, and strong data analysis and critical thinking skills. The Bachelor of Arts in Criminology prepares students for professional careers in law enforcement, social services, law, applied research, and academia.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Bachelor of Arts - Criminology

- Students can apply only 6 credits of non-Sociology (SOCI) courses to the major.

## Criminology Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and

course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Minor - Criminology

- To earn a Minor in Criminology, the student must complete a minimum of 21 credits in Sociology (SOCI) with at least 9 of these credits at the upper-division level (300+).
- Students who want to major in Sociology and minor in Criminology may not count any SOCI courses towards both.

## Sociology B.A.

Students whose primary interest is in a general sociology major are urged to develop a plan of study with their advisor; they must take 24 credits (6 upper-division) in addition to the core courses and an upper-division writing course. Any sociology course, including courses from any of the two concentrations, may be included in your study plan. The general sociology major prepares students for positions which require a bachelor's degree in one of the social science disciplines, including employment in a variety of government and private-sector agencies, or for graduate study in sociology. It also provides valuable preparation for related fields such as law, social work, education, counseling, politics, and public administration.

# General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

# Bachelor of Arts - Sociology

- Students completing a double major in Sociology and Criminology must complete additional requirements for the Criminology major. See the Criminology major page (p. 275) for more information.

# Sociology B.A. - Inequality and Social Justice

Inequality is at the core of most sociological inquires. The concentration in inequality and social justice examines the causes and consequences of inequalities based on class, gender, race/ethnicity, disability, age, and sexual orientation. Social inequalities at the local, national, and global levels are studied, as are the political, legal, and social processes that contribute to or reduce inequalities. Ethical elements of social justice are considered with regard to inequality. A concentration in inequality and social justice prepares students for employment in a variety of government and private-sector agencies, especially in social services, or for graduate school in Sociology. It also provides valuable preparation for related fields such as law, social work, education, counseling, politics, and public administration.

# General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Sociology; Inequality and Social Justice Concentration

- Students completing a double major in Sociology and Criminology must complete additional requirements for the Criminology major. See the Criminology major page (p. 275) for more information.
- Students may apply only 6 credits of non-Sociology courses (SOCI) to the concentration requirements.

### Course Requirements

## Sociology B.A. - Sociology Education

- This major concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- This major does not qualify as a single field endorsement. Individuals must complete the education/teaching concentration in a second major or education/teaching minor in another content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Sociology; Sociology Education Concentration

- Students completing a double major in Sociology and Criminology must complete additional requirements for the Criminology major. See the Criminology major page (p. 275) for more information.

### Course Requirements

| Code                                   | Title                     | Hours |
|----------------------------------------|---------------------------|-------|
| <b>Core Courses</b>                    |                           |       |
| Complete all of the following courses: |                           |       |
| SOCI 101S                              | Introduction to Sociology | 3     |

|          |                               |   |
|----------|-------------------------------|---|

**Total Hours** 39

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Sociology Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department.
- This minor does not qualify as a single field endorsement. Individuals must complete the education/teaching concentration in a second major or education/teaching minor in another content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Sociology Education

- To earn a minor in Sociology Education, the student must complete a minimum of 21 credits in Sociology with at least 9 of these credits at the upper-division level.
- Students who want to major in Criminology and minor in Sociology can only count the following courses towards both degrees: SOCI 101S, SOCI 202, and SOCI 318.

## South and South-East Asian Studies

The South and South-East Asian Studies program is an interdisciplinary program with faculty input from several departments, including English, Anthropology, Sociology and Political Science. It offers students the opportunity to take classes on South and Southeast Asian peoples, cultures, histories, and societies as well as their literary, artistic and religious traditions. The region includes India, Nepal, Bhutan, Tibet, Sri Lanka, Pakistan, Bangladesh, Myanmar (Burma), Thailand, Laos, Cambodia, Vietnam, Malaysia, Brunei, Singapore, Indonesia, East Timor, and the Philippines. The primary focus is on India and Indonesia.

# Women's, Gender, and Sexuality Studies

Women's, Gender and Sexuality Studies, an interdisciplinary program founded in 1990, encourages the production, discussion, and dissemination of knowledge about women's experiences, oppressions, and achievements in Montana, the U.S., and the world. In the last decade this focus has broadened to include study of the social and cultural construction of gender, sex, and sexualities. By fostering awareness of cultural and international diversity, as well as of the circulations of power mediated by race, class, age, and sexual orientation, Women's, Gender and Sexuality Studies encourages students to think critically and to envision justice for all peoples.

The Women's, Gender and Sexuality Studies program is administered by the director, with assistance from the program coordinator, in consultation with the Women's, Gender and Sexuality Studies Executive Committee, an interdisciplinary group of faculty and professional associates with teaching, research, and scholarly interests in women, gender and sexuality.

Students may include Women's, Gender and Sexuality Studies in their studies by earning a B.A. or by completing a minor.

Students may select coursework from a wide variety of courses offered in the humanities, social sciences, natural sciences, law, education and other disciplines. Women's, Gender and Sexuality Studies offers scholarships and sponsors or co-sponsors a variety of events including lectures, discussions, and performances that make a vibrant contribution to both the campus and the Missoula community life.

To be admitted, students must register with the Women's, Gender and Sexuality Studies director, who will explain major or minor requirements and supervise their program.

- Women's, Gender and Sexuality Studies B.A. (p. 282)
- Women's, Gender and Sexuality Studies Minor (p. 284)
- LGBTIQ+ Studies Certificate (p. 285)

# Women's, Gender and Sexuality Studies B.A.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

# Bachelor of Arts - Women's, Gender, and Sexuality Studies

**Total Hours** **33**

<sup>1</sup> Students must arrange a WGSS 398 internship with the WGSS Director prior to beginning their senior year. A list of available internships is available in the WGSS Office.

<sup>2</sup> Of the 18 elective credits, 11 credits must be upper-division. WGSS internship and independent study courses may count for either the Humanities or Social Science Electives, depending on the topic.

## Four Year Plan

This plan does not include General Education requirements that are fulfilled through major requirements.

Students are highly encouraged to double major or minor in another subject area.

| Course                        | Title                                                        | Hours     |

## Women's, Gender and Sexuality Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Women's, Gender, and Sexuality Studies

## LGBTIQ+ Studies Certificate

The undergraduate certificate in LGBTIQ+ Studies is a twelve-credit, interdisciplinary program that groups together courses with content focusing on gender and sexual diversity with a goal of preparing students for their future careers by providing a strong grounding in diversity and equity issues around gender and sexuality. The certificate is housed in the Women's, Gender, and Sexuality Studies Program.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - LGBTIQ+ Studies

<sup>1</sup> Other courses and new courses may count for the certificate electives with the approval of the LGBTIQ+ Studies Committee.

## World Languages and Cultures

Instruction is offered in the following languages and literatures:

- Arabic
- Chinese
- French
- German
- Classical Greek
- Italian
- Japanese
- Latin
- Russian
- Spanish

In addition, instruction is offered in linguistics and foreign literatures in English translation, film, and the study of foreign cultures.

Undergraduate courses have been planned to meet the needs of students who began studying a language in high school as well as those who undertake such study for the first time at the University.

The courses are intended to serve several purposes:

1. Contribute to the general education of students by giving them an opportunity to gain insight into patterns of living and thinking which are different from their own;
2. Enable students to gain proficiency in the language;
3. Prepare candidates for careers in research and college teaching by providing a solid basis for graduate studies in the various languages;
4. Prepare future teachers of foreign languages;
5. Provide language training requisite to careers in government, foreign commerce, and library work;
6. Enable students to read foreign publications and to meet graduate foreign language requirements in their field.

**High School Preparation:** Credit is automatically granted for Advanced Placement scores of 3, 4, or 5. At each UM Orientation, the department offers a computerized placement/assessment examination in French, German, and Spanish. Students also can arrange individually to take the CLEP exam, administered by Testing Services in French, German, or Spanish.

These exams are not required, but serve one or more of three purposes:

1. **Exemption from the General Education Competency Requirement in Foreign Language:** if the student achieves a score that indicates a competence equivalent to the completion of French, German, or Spanish 102 (second semester). (See the General Education Requirements (p. 39) section of this catalog.)
2. **Placement for further study in the language:** the score achieved on this test is an accurate indicator of the course level at which language study should be resumed at the University (e.g. 102, 201, 202).
3. **Credit by examination:** A student with extensive language study may score high enough on the placement exam to qualify for University credits if she or he places into 202 or 301. By taking the course into which she or he placed (202 or 301) and receiving a B (3.00) or better, the student may then receive four by-pass credits (Pass grade only) for the preceding course (201 or 202).

Students who elect not to take this exam may:

1. Satisfy the General Education Competency Requirement in Foreign Language by successfully completing a University foreign language 102 (second semester) course.
2. Estimate their placement level for further study by the approximate equating of one year of high school study to one semester of university study. Students should consult with the department in making this estimate.

**Foreign Study Programs.** The Department of World Languages and Cultures offers programs of accredited study in Austria, Chile, China, France, Germany, Italy, Japan, Spain, Mexico, and Russia. Each program is supervised by a departmental faculty member, and is open to any student who meets the respective foreign language prerequisites. (There is no language prerequisite for the Study Abroad in Italy, but Italian is recommended.) Details concerning individual programs are available from the Department of World Languages and Cultures. The department also sponsors work/study internships abroad for students in Japanese.

## Arabic Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Minor - Arabic Studies

- This minor requires a minimum grade of C in all courses.
- At least 6 credits must be in courses numbered 300+.
- Before taking an independent study outside the Arabic program, students should consult with the minor advisor. Upon consent, up to three credits taken at the University of Montana or transferred from another institution may be counted as an elective if at least 75% of the content is related to the Arab world. Suggested electives are listed below.

### Course Requirements

| Code                | Title                                  | Hours |

## Chinese Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Classics B.A. - Classical Civilization

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Classics; Classical Civilization Concentration

- This major requires a cumulative institutional GPA of 2.5.

## Classics B.A. - Classical Languages

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Classics; Classical Languages Concentration

- This major requires a cumulative institutional GPA of 2.5.

Last updated Autumn 2024

Classics B.A. - Latin Concentration

General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Bachelor of Arts - Classics; Latin Concentration

- This major requires a cumulative institutional GPA of 2.5.

Course Requirements

## Classics B.A. - Latin Language Education

- This major concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- This major does not qualify as a single field endorsement. Individuals must complete the education/teaching concentration in a second major or education/teaching minor in another content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Classics; Latin Language Education Concentration

- This major requires a cumulative institutional GPA of 2.5.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## European Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

<sup>1</sup> Two lower-division courses in a second European language may be substituted for two of the six required upper-division courses, subject to advisor approval.

## French B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - French

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division French courses presented in fulfillment of requirements for the French major.
- Students must complete a minimum of 30 upper-division credits in French (FRCH).
- A minimum of twelve upper-division credits for the major must be taken from UM faculty on the UM campus.

Last updated Autumn 2024

## French B.A. - French Language Education

- This concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a

teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
- Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- French qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in French. Students should complete the requirements for a second teaching endorsement in another field in more demand in high schools.
- Study in a French speaking country, provided either through the university's Study Abroad Program or an experience considered to be equivalent, also is required.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - French; French Language Education Concentration

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division French courses presented in fulfillment of requirements for the French major.
- Students must complete a minimum of 30 upper-division credits in French (FRCH).
- A minimum of twelve upper-division credits for the major must be taken from UM faculty on the UM campus.

## Course Requirements

| Code                                   | Title                  | Hours |
|----------------------------------------|------------------------|-------|
| <b>Core Courses</b>                    |                        |       |
| Complete all of the following courses: |                        |       |

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## French Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - French

- FRCH 101-FRCH 202, or equivalent, are prerequisites to the minor in French.

- A minimum of six upper-division credits for the minor must be taken from UM faculty on the UM campus.

## French Language Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<http://www.coehs.umt.edu/departments/currinst/undergradprograms/seced/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this minor must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - French Language Education

## German B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - German

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division GRMN courses presented in fulfillment of requirements for the German major.

## German B.A. - German Language Education

- This concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- French qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in French. Students should complete the requirements for a second teaching endorsement in another field in more demand in high schools.
- Study in a French speaking country, provided either through the university's Study Abroad Program or an experience considered to be equivalent, also is required.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - German; German Language Education Concentration

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division GRMN courses presented in fulfillment of requirements for the German major.

## Course Requirements

| Code                                   | Title                 | Hours |
|----------------------------------------|-----------------------|-------|
| <b>Language Core</b>                   |                       |       |
| Complete all of the following courses: |                       |       |
| GRMN 101                               | Elementary German I   | 4     |
| GRMN 102                               | Elementary German II  | 4     |

<sup>1</sup> The advanced writing expectation must be met by successfully completing either GRMN 351H or GRMN 352H.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## German Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - German

- This minor requires a 2.5 GPA.

<sup>1</sup> Native or near-native speakers of German must substitute two 400-level literature courses for GRMN 301 and GRMN 302.

## German Language Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<http://www.coehs.umt.edu/departments/currinst/undergradprograms/seced/default.php>)
- Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this minor must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - German Language Education

- This minor requires a 2.5 GPA.

## Japanese Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| JPNS 491                                            | Special Topics                                            |           |
| <b>Total Hours</b>                                  |                                                           | <b>32</b> |

<sup>1</sup> If offered, JPNS 191, JPNS 291, or upper-division language courses such as JPNS 301 and/or JPNS 302 may be taken in place of up to 2 of the electives. Also permitted in substitution would be one course from outside the department if it has a substantial East Asia-related element.

## Latin American Studies Minor General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Latin Language Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this minor must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| <b>Total Hours</b>                                                                                  |                              | <b>27</b> |

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Russian B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Russian

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division courses presented in fulfillment of requirements for the Russian major.

### Course Requirements

| Code                                   | Title                    | Hours |
|----------------------------------------|--------------------------|-------|
| <b>Lower-Division Core Courses</b>     |                          |       |
| Complete all of the following courses: |                          |       |
| RUSS 101                               | Elementary Russian I     | 4     |

*Last Updated Autumn 2024*

## Russian B.A. - Russian Language Education

- This concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- French qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in French. Students should complete the requirements for a second teaching endorsement in another field in more demand in high schools.
- Study in a French speaking country, provided either through the university's Study Abroad Program or an experience considered to be equivalent, also is required.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Bachelor of Arts - Russian; Russian Language Education Concentration

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division courses presented in fulfillment of requirements for the Russian major.

Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

Russian Minor General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Minor - Russian

- This minor requires a minimum GPA of 2.5.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Russian Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Russian Studies

- This minor requires a minimum GPA of 2.5.

Complete 3 upper-division credits in another department/discipline besides Russian or History. Speak with your minor advisor or the Russian Studies program director about which courses might fulfill this requirement.

**Total Hours** **28**

# Spanish B.A.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Spanish

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division courses presented in fulfillment of requirements for the Spanish major.

## Spanish B.A. - Spanish Language Education

- This concentration contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- French qualifies for a single field endorsement. However, there is a limited demand in the majority of Montana high schools for teachers with a single endorsement in French. Students should complete the

requirements for a second teaching endorsement in another field in more demand in high schools.

- Study in a French speaking country, provided either through the university's Study Abroad Program or an experience considered to be equivalent, also is required.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Spanish; Spanish Language Education Concentration

- Students are required to maintain a minimum overall GPA of 2.5 in all upper-division courses presented in fulfillment of requirements for the Spanish major.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Spanish Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Spanish

- Students are required to maintain a minimum overall GPA of 2.5 in all courses presented in fulfillment of requirements for this minor.

## Spanish Language Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this minor must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Spanish Language Education

- Students are required to maintain a minimum overall GPA of 2.5 in all courses presented in fulfillment of requirements for this minor.

**Total Hours****51-59**

## World Competencies Certificate

The Certificate in World Competencies will encourage students to be more informed about regions around the world. It will also hone their analytic, as well linguistic skills.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - World Competencies

- A programmatic international experience, for example, study abroad (<http://www.umt.edu/academic-enrichment/education-abroad/default.php>), can be applied to these requirements.

## Course Requirements

| Code                                                                                                                                       | Title                                                            | Hours |

| PSCI 334  | International Security              |
| PSCI 336  | European Union                      |
| PSCI 337  | Model United Nations                |
| PSCI 381  | State Formation                     |
| SOCI 325  | Social Stratification               |

**Activities Requirement**

Participation is required in eight (8) campus activities with an international focus (these activities are not for credit). Examples of such activities could include participating club events; attending campus lectures that have an international focus; volunteering for Foreign Language Day; or going to cultural events (art exhibit, theater performance) that have an international theme. Students are required to retain documentation tracking participation/attendance of such activities, which will be signed by the WLC chair.

**Total Hours****22-26**

<sup>1</sup> The course meeting this requirement should be in the language or the area of expertise, taught either in English or the target language.

## College of Science

- Biological and Biomedical Sciences (p. 312)
  - Biology B.A. - Biological Education (p. 312)
  - Biology B.A. - Teacher Preparation General Science Broadfield (p. 314)
  - Interdisciplinary Biology B.A. (p. 316)
  - Biology B.S. - Ecology and Organismal Biology (p. 318)
  - Biology B.S. - Genetics and Evolution (p. 322)
  - Human Biology and Biomedical Sciences B.S. (p. 324)
  - Microbiology, Immunology, & Infectious Disease B.S. (p. 328)
  - Integrative Microbiology B.A. (p. 330)
  - Medical Laboratory Science B.S. (p. 332)
  - Neuroscience B.S. - Cellular and Molecular Neuroscience (p. 334)
  - Neuroscience B.S. - Cognitive Neuroscience (p. 336)
  - Biology Minor (p. 338)
  - Biological Education Minor (p. 338)
  - Microbiology Minor (p. 339)
  - Neuroscience Minor (p. 340)
- Chemistry & Biochemistry (p. 340)

- Biochemistry B.S. (p. 340)
- Biochemistry B.S. - Health Professions (p. 342)
- Biochemistry Minor (p. 344)
- Brewing Science C.A.S. (p. 344)
- Brewing Science C.T.S. (p. 345)
- Chemical Pharmacology Certificate (p. 345)
- Chemistry B.S. (p. 345)
- Chemistry B.S. - Forensic Chemistry (p. 347)
- Chemistry Education Minor (p. 348)
- Chemistry Minor (p. 349)
- Computer Science (p. 349)
  - Computer Science B.S. - Algorithm Design (p. 350)
  - Computer Science B.S. - Data Science (p. 351)
  - Computer Science B.S. - Software Engineering (p. 352)
  - Computer Science-Mathematical Sciences B.S. (Combined Major) (p. 353)
  - Computer Science Minor (p. 355)
  - Computer Programming Certificate (p. 355)
- Mathematical Sciences (p. 356)
  - Mathematical Sciences-Computer Science B.S. (Combined Major) (p. 356)
  - Mathematics B.A. (p. 358)
  - Mathematics B.A. - Applied Mathematics (p. 360)
  - Mathematics B.A. - Combinatorics and Optimization (p. 362)
  - Mathematics B.A. - Mathematics Education (p. 363)
  - Mathematics B.A. - Pure Mathematics (p. 365)
  - Mathematics B.A. - Statistics and Data Science (p. 366)
  - Mathematics Education Minor (p. 367)
  - Mathematics Minor (p. 368)
- Physics & Astronomy (p. 368)
  - Physics B.A. (p. 368)
  - Physics B.A. - Astronomy (p. 370)
  - Physics B.A. - Computational Physics (p. 371)
  - Physics B.A. - Engineering Physics (p. 372)
  - Physics B.A. - Physics Education (p. 374)
  - Physics B.A. - Teaching Broadfield Science (p. 376)
  - Astronomy Minor (p. 377)
  - Physics Minor (p. 378)
  - Physics Education Minor (p. 378)

- Biochemistry (an interdepartmental degree administered by the Chemistry Department)
- Neuroscience (an interdepartmental degree with the Psychology Department)

The Division also advises students in pre-health sciences and offers a series of summer field courses at the University's Flathead Lake Biological Station (<http://flbs.umt.edu/>), a year-round academic center for the ecological sciences located 85 miles north of Missoula near Kalispell and Glacier National Park. The Division is one of the leading research units in the University. Research programs in the Division provide abundant opportunities for students to enhance their educational experience by participating in mentored research. Several sources of funding are available to support undergraduate student research, and the Division participates in the University of Montana Conference on Undergraduate Research each spring.

The Division of Biological & Biomedical Sciences is committed to providing coursework and experiences for non-science majors. The world faces many problems and opportunities that include significant biological components. Courses for non-science majors have the goal of fostering understanding of the process of science and enhancing biological knowledge as it relates to environmental, medical, social, and other issues. The Division offers courses designed specifically for non-majors: Microbiology for Health Sciences, Introductory Ecology, Survey of Montana Wildlife and Habitats, and others.

- Biology B.A. - Biological Education (p. 312)
- Biology B.A. - Teacher Preparation General Science Broadfield (p. 314)
- Interdisciplinary Biology B.A. (p. 316)
- Biology B.S. - Ecology and Organismal Biology (p. 318)

## Biological and Biomedical Sciences

The Division of Biological & Biomedical Sciences has undergraduate and graduate programs representing the full range of the biological sciences. The Division offers baccalaureate degrees in:

- Biology
- Interdisciplinary Biology
- Human Biology and Biomedical Sciences
- Medical Laboratory Science
- Microbiology, Immunology, and Infectious Disease
- Integrative Microbiology
- Wildlife Biology (a cooperative program administered by the College of Forestry and Conservation)

## Biology B.A. - Biological Education

This concentration provides students with coursework in biology and related sciences and mathematics needed to be certified by the State of Montana to teach secondary biology in middle and high school. This concentration is appropriate for students interested in teaching biology in a larger, more urban school. In order to be licensed to teach secondary biology, students must be admitted to the Teacher Education Program through the Phyllis J. Washington College of Education.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the non-teaching track since the sequence of courses is designed to meet state standards.

Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Biology; Biological Education Concentration

- This major requires a minimum cumulative institutional GPA of 2.75.
- The lower-division core should be completed before attempting most upper division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161NorBIOB 170N/BIOB 171N.

<sup>1</sup> Students should choose M 171 if they plan to take additional calculus courses or if they plan a double major or minor in a field that requires more calculus (e.g. astronomy, math, physics, biochemistry, computer science).

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Biology B.A. - Teacher Preparation General Science Broadfield

This concentration provides students with coursework in Biology, Chemistry, Physics, Earth Sciences and Mathematics needed to be certified by the State of Montana in broadfield science. This allows students to teach secondary sciences - Biology, Chemistry, Physics, and Earth Science in middle and high schools. This concentration is appropriate for students interested in teaching science in smaller, more rural schools. In order to be licensed to teach secondary science, students must be admitted to the Teacher Education Program through the Phyllis J. Washington College of Education and Human Sciences.

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the non-teaching track since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the

secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
- Licensure Degree Requirements (p. 151)

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Biology; Teaching General Science Broadfield Concentration

- This major requires a minimum cumulative institutional GPA of 2.75.

Geoscience Elective - Complete 1 course in Geoscience (GEO) 3

### Physics Content Courses

Complete one of the following Physics sequences: 10

Algebra- and Trigonometry-based Physics:

PHSX 205N College Physics I  
& PHSX 206N and College Physics I Laboratory

PHSX 207N College Physics II  
& PHSX 208N and College Physics II Laboratory

Calculus-based Physics:

PHSX 215N Fundamentals of Physics with Calculus I  
& PHSX 216N and Physics Laboratory I with Calculus

PHSX 217N Fundamentals of Physics with Calculus II  
& PHSX 218N and Physics Laboratory II with Calculus

### Upper-Division Content Courses

Complete all of the following courses:

BIOE 370 General Ecology 3

BIOE 371 General Ecology Lab (equivalent to 271) 2

### Mathematics - Calculus

Complete one of the following courses: 4

M 162 Applied Calculus

M 171 Calculus I

### Mathematics - Statistics

Complete the following course:

STAT 216 Introduction to Statistics 4

### Education Course

Complete the following course:

EDU 497 Teaching and Assessing (Methods: 5 - 12 Science) 4

### Writing in the Disciplines Requirement

To meet the Writing in the Disciplines Requirement, Biology students must complete 2 or 3 partial writing courses (either three 1/3 writing courses or one 1/3 writing course and one 2/3 writing course) or one complete writing course. 3-9

**Total Hours** 73-79

<sup>1</sup> A minimum of 10 credits is required in each of the four content areas.

<sup>2</sup> An AP Biology score of 3 will substitute for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

<sup>3</sup> CHMY 141N/CHMY 142N & CHMY 143N/CHMY 144N should be completed before attempting CHMY 123.

<sup>4</sup> ASTR 132N/ASTR 135N are NOT acceptable substitutes for ASTR 131N/ASTR 134N.

## Writing in the Disciplines Distributed Model Courses for Biological Sciences

| Code                                          | Title                                   | Hours |
|-----------------------------------------------|-----------------------------------------|-------|
| <b>1/3 Writing in the Disciplines Courses</b> |                                         |       |

| BIOM 420 | Host-Microbe Interactions        | 3 |

**Secondary Teaching Licensure**

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

**Four Year Plan**

| Course                                                  | Title                                                                            | Hours     |
|---------------------------------------------------------|----------------------------------------------------------------------------------|-----------|

**Hours****15****Total Hours****127***Last Updated Autumn 2025***Interdisciplinary Biology B.A.**

The B.A. in Interdisciplinary Biology is designed for students who seek an interdisciplinary science program. This major is not research-oriented and is not considered a preparatory program for traditional research-based graduate programs. It is, however, designed for students seeking careers in environmental education, science writing, journalism or illustration, business, programming, wildlife film-making, or natural history centers and museums. There is enough latitude in the requirements to allow for a minor or even a double major in a related field of interest (e.g. journalism, art, computer science, media arts, etc.).

**General Degree Requirements**

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of

Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Interdisciplinary Biology

The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160 /BIOB 161NorBIOB 170N/BIOB 171N.

### Course Requirements

| Code                                                                                                                                                   | Title                                  | Hours |

Updated Autumn 2025

<sup>1</sup> Indicates you have a choice of alternative courses for degree completion. See catalog, Degree Works, or your advisor for other options.

Biology B.S. - Ecology and Organismal Biology

The Ecology and Organismal Biology concentration is for students interested in the biology of organisms (plants or animals) or the biology of populations or communities. Course offerings include those from organismal biology, ecology, evolutionary biology, and conservation biology. This concentration is a graduate preparatory program and it is designed for students interested in academia or employment with government or environmental consulting agencies. This concentration is also an excellent choice for pre-veterinary students.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### -Ology Course Requirement

Complete at least one course with a focus on a group of organisms (lab must also be taken, if available) from the following list:

|                     |                                                   |
|---------------------|---------------------------------------------------|
| BIOM 360 & BIOM 361 | General Microbiology and General Microbiology Lab |
| BIOM 427 & BIOM 428 | General Parasitology and General Parasitology Lab |
| BIOO 320            | General Botany                                    |
| BIOO 335            | Rocky Mountain Flora                              |
| BIOO 340            | Biology and Management of Fishes                  |
| BIOO 462            | Entomology                                        |
| BIOO 470            | Ornithology                                       |
| BIOO 475            | Mammalogy                                         |

### Specialized Ecology Course Requirement

Complete one of the following courses:

|          |                                                                            |
|----------|----------------------------------------------------------------------------|
| BIOE 400 | Aquatic Microbial Ecology (Flathead Lake Biological Station - summer only) |
| BIOE 416 | Alpine Ecology (Flathead Lake Biological Station - summer only)            |
| BIOE 428 | Freshwater Ecology                                                         |
| BIOE 439 | Stream Ecology (Flathead Lake Biological Station - summer only)            |
| BIOE 440 | Conservation Biology (Flathead Lake Biological Station - summer only)      |
| BIOE 447 | Ecosystem Ecology                                                          |
| BIOE 448 | Terrestrial Plant Ecology                                                  |
| BIOE 451 | Landscape Ecology (Flathead Lake Biological Station - summer only)         |
| BIOE 453 | Lake Ecology (Flathead Lake Biological Station - summer only)              |
| BIOE 458 | Forest and Fire Ecology (Flathead Lake Biological Station - summer only)   |
| BIOM 415 | Microbial Diversity Ecology & Evolution                                    |
| BIOM 460 | Ecology of Infectious Diseases                                             |
| WILD 346 | Wildlife Physiological Ecology                                             |
| WILD 470 | Conservation of Wildlife Populations                                       |

### Evolution Course Requirement

Complete one of the following courses:

|          |                             |
|----------|-----------------------------|
| BIOB 480 | Conservation Genetics       |
| BIOB 483 | Phylogenetics and Evolution |
| BIOB 486 | Genomics                    |
| BIOE 406 | Behavior & Evolution        |
| BIOE 485 | Plant Evolution             |
| BIOM 420 | Host-Microbe Interactions   |

### Mathematics - Calculus <sup>2</sup>

Complete one of the following courses:

|       |                  |
|-------|------------------|
| M 162 | Applied Calculus |
| M 171 | Calculus I       |

### Mathematics - Statistics <sup>3</sup>

Complete either one semester or a full year of statistics from the following:

|               |                            |
|---------------|----------------------------|
| One Semester: |                            |
| STAT 216      | Introduction to Statistics |

|                                                                                                                                                                                                                                      |                                                                                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|
| Full Year:                                                                                                                                                                                                                           |                                                                                           |
| STAT 451 & STAT 452                                                                                                                                                                                                                  | Statistical Methods I and Statistical Methods II                                          |
| STAT 457 & STAT 458                                                                                                                                                                                                                  | Computer Data Analysis I and Computer Data Analysis II                                    |

| <b>Writing in the Disciplines Requirement</b>                                                                                                                                                                                        |                                                                                           |
| To complete the Writing in the Disciplines Requirement, Biology students take 2 or 3 partial writing courses (either three 1/3 writing courses or one 1/3 writing course and one 2/3 writing course) or one complete writing course. |                                                                                           |
| 3-9                                                                                                                                                                                                                                  |                                                                                           |
| <b>Total Hours</b>                                                                                                                                                                                                                   | <b>74-94</b>                                                                              |

<sup>1</sup> The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

<sup>2</sup> Students should choose M 171 if they plan to take additional calculus courses if they plan to double major or minor in a field that requires more calculus (e.g. astronomy, math, physics, biochemistry, computer science).

<sup>3</sup> Students should choose the full year of statistics for graduate preparation in ecology.

<sup>4</sup> Students who begin in the advanced chemistry sequence may substitute those courses for introductory sequence courses at the discretion of the major advisor. Students should choose the advanced sequence for graduate preparation in organismal biology or pre-veterinary medicine.

## Biology B.S. - Genetics and Evolution

The Genetics and Evolution concentration is for students interested in genetics and evolutionary biology, including molecular genetics, population genetics, ecological genetics, and genomics. This concentration is a graduate preparatory program and is for students interested in academia or research jobs in private or government laboratories. It is also an excellent concentration for students interested in a professional health program such as medical school or a genetic counseling graduate program.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Biology; Genetics and Evolution Concentration

| BIOM 420                                                                              | Host-Microbe Interactions                            |       |
| CSCI 451                                                                              | Computational Biology                                |       |
| Physiology Requirement                                                                |                                                      |       |
| Complete one of the following courses (labs must be taken if available):              |                                                      | 3-4   |
| BIOB 425                                                                              | Advanced Cellular & Molecular Biology                |       |
| BIOB 435                                                                              | Comparative Animal Physiology                        |       |
| BIOM 450 & BIOM 451                                                                   | Microbial Physiology and Microbial Physiology Lab    |       |
| BIOO 433 & BIOO 434                                                                   | Plant Physiology and Plant Physiology Lab            |       |
| Mathematics - Calculus <sup>3</sup>                                                   |                                                      |       |

Complete one of the following courses: 4

|       |                  |
|-------|------------------|
| M 162 | Applied Calculus |
| M 171 | Calculus I       |

#### Mathematics - Statistics

Complete either one semester or a full year of statistics from the following: 4-8

|                     |                                                        |
|---------------------|--------------------------------------------------------|
| One Semester:       |                                                        |
| STAT 216            | Introduction to Statistics                             |
| Full Year:          |                                                        |
| STAT 451 & STAT 452 | Statistical Methods I and Statistical Methods II       |
| STAT 457 & STAT 458 | Computer Data Analysis I and Computer Data Analysis II |

#### Chemistry <sup>4</sup>

Complete one of the following sequences of general and organic chemistry: 10-20

|                                      |                                                                                           |
|--------------------------------------|-------------------------------------------------------------------------------------------|
| Introductory Chemistry (10 credits): |                                                                                           |
| CHMY 121N                            | Introduction to General Chemistry                                                         |
| CHMY 123 & CHMY 124                  | Introduction to Organic and Biochemistry and Introduction to Organic and Biochemistry Lab |
| Advanced Chemistry (20 credits):     |                                                                                           |
| CHMY 141N & CHMY 142N                | College Chemistry I and College Chemistry I Lab                                           |
| CHMY 143N & CHMY 144N                | College Chemistry II and College Chemistry II Lab                                         |
| CHMY 221 & CHMY 222                  | Organic Chemistry I and Organic Chemistry I Lab                                           |
| CHMY 223 & CHMY 224                  | Organic Chemistry II and Organic Chemistry II Lab                                         |

#### Physics

Complete one of the following Physics sequences: 10

|                                          |                                                                                  |
|------------------------------------------|----------------------------------------------------------------------------------|
| Algebra- and Trigonometry-based Physics: |                                                                                  |
| PHSX 205N & PHSX 206N                    | College Physics I and College Physics I Laboratory                               |
| PHSX 207N & PHSX 208N                    | College Physics II and College Physics II Laboratory                             |
| Calculus-based Physics:                  |                                                                                  |
| PHSX 215N & PHSX 216N                    | Fundamentals of Physics with Calculus I and Physics Laboratory I with Calculus   |
| PHSX 217N & PHSX 218N                    | Fundamentals of Physics with Calculus II and Physics Laboratory II with Calculus |

#### Writing in the Disciplines Requirement

To complete the Writing in the Disciplines Requirement, Biology students take 2 or 3 partial writing courses (either three 1/3 writing courses or one 1/3 writing course and one 2/3 writing course) or one complete writing course. 3

**Total Hours 75-93**

<sup>1</sup> The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

<sup>2</sup> If introductory chemistry is completed, then BCH 380 must be taken. Either BCH 380 or BCH 480-BCH 482 may be taken if the advanced chemistry sequence is completed.

<sup>3</sup> Student should choose M 171 if they plan to take additional calculus courses or if they plan to double major or minor in a field that requires more calculus (e.g. astronomy, math, physics, biochemistry, computer science).

<sup>4</sup> Students who begin in the advanced chemistry sequence may substitute those courses for introductory sequence courses at the discretion of the major advisor. Students should choose the advanced sequence for graduate preparation.

## Writing in the Disciplines Distributed Model Courses for Biological Sciences

| Code                                           | Title                                             | Hours |

## Human Biology and Biomedical Sciences B.S.

The B.S. in Human Biology and Biomedical Sciences is for students interested in health, biomedical, and biotechnology. Students are provided a solid background in the biological, biomedical, and related physical sciences and are prepared for careers in biomedical research as well as professional health programs (medical, M.D./Ph.D., dental, physician's assistant, physical therapy, etc.).

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Human Biology and Biomedical Sciences

| Writing in the Disciplines Requirement                                                                                                                                                                                               |                                                                                     |
| To complete the Writing in the Disciplines Requirement, Biology students take 2 or 3 partial writing courses (either three 1/3 writing courses or one 1/3 writing course and one 2/3 writing course) or one complete writing course. |                                                                                     |

**Total Hours** 69-92

- <sup>1</sup> The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.
- <sup>2</sup> Students who begin in the advanced chemistry sequence may substitute those courses for introductory sequence courses at the discretion of the major advisor. If students plan to apply to a graduate or professional school such as medical or dental, they should plan to complete the advanced chemistry sequence. If they plan to pursue nursing or a graduate program in physical therapy, the introductory chemistry sequence is most likely sufficient. The advanced chemistry option is more flexible, and keeps more options open for future careers. Check the requirements of your intended professional program to help determine which sequence is most appropriate.

## Plan for Pre-Health Track

*\*This is an example of a four-year plan for a B.S. Degree in Human Biology & Biomedical Sciences. This pre-health track is for students interested in health-related careers that do not require advanced chemistry: for example, Public Health, Occupational Therapy, some Physician Assistant and most Physical Therapy.*

| Course                | Title                                                                                                                                   | Hours     |

Updated Autumn 2025

## Plan for Pre-Medical Track

*\*This is an example of a four-year plan for a B.S. Degree in Human Biology & Biomedical Sciences. This pre-medical track covers all courses that are required or recommended for **Medical** school and MCAT preparation. With this plan, MCAT can be taken after junior year. This is also for **Dental, Optometry, Chiropractic, some Physician Associates**.*

| Course                | Title                                                             | Hours |
|-----------------------|-------------------------------------------------------------------|-------|
| <b>Freshman</b>       |                                                                   |       |
| <b>Autumn</b>         |                                                                   |       |
| BIOB 160 & BIOB 161N  | Principles of Living Systems and Principles of Living Systems Lab | 4     |
| CHMY 141N & CHMY 142N | College Chemistry I and College Chemistry I Lab <sup>1</sup>      | 5     |
| M 171 & M 162         | Calculus I and Applied Calculus <sup>1</sup>                      | 4     |

## Plan for Research Track

*\*This is an example of a four-year plan for a B.S. Degree in Human Biology & Biomedical Sciences. This research track is for any student interested in a graduate-prep program to prepare for a career in cellular, molecular, biochemical, or biomedical research.*

<sup>1</sup> Indicates you have a choice of alternative courses for degree completion. See catalog, Degree Works, or your advisor for other options.

## Microbiology, Immunology, & Infectious Disease B.S.

Microbiology is the study of microorganisms including bacteria, fungi, viruses, and protozoa. The Microbiology, Immunology, & Infectious Disease major emphasizes microbial structure and function as well as interactions with human health. This is a graduate prep program and is appropriate for students interested in research careers in academia or private or government laboratories. It is also an excellent concentration for pre-medical sciences students.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Microbiology, Immunology, & Infectious Disease Course Requirements

| Code                                            | Title                                  | Hours |
|-------------------------------------------------|----------------------------------------|-------|
| <b>Biology/Microbiology Lower-Division Core</b> |                                        |       |
| Complete all of the following courses:          |                                        |       |
| BIOB 160                                        | Principles of Living Systems           | 3     |
| BIOB 161N                                       | Principles of Living Systems Lab       | 1     |
| BIOB 170N                                       | Principles of Biological Diversity     | 3     |
| BIOB 171N                                       | Principles of Biological Diversity Lab | 2     |
| BIOB 260                                        | Cellular and Molecular Biology         | 4     |
| BIOB 272                                        | Genetics and Evolution                 | 4     |
| <b>Upper-Division Microbiology Core Courses</b> |                                        |       |
| Complete all of the following courses:          |                                        |       |

|          |                                         |   |
|----------|-----------------------------------------|---|
| BIOB 410 | Immunology                              | 3 |
| BIOM 360 | General Microbiology                    | 3 |
| BIOM 361 | General Microbiology Lab                | 2 |
| BIOM 410 | Microbial Genetics                      | 3 |
| BIOM 411 | Experimental Microbial Genetics Lab     | 1 |
| BIOM 415 | Microbial Diversity Ecology & Evolution | 3 |
| BIOM 450 | Microbial Physiology                    | 3 |
| BIOM 451 | Microbial Physiology Lab                | 1 |

### Advanced Infectious Disease Elective

Complete one of the following courses: 3-4

|                     |                                                   |
|---------------------|---------------------------------------------------|
| BIOM 402            | Pathogenic Microbes                               |
| BIOM 427 & BIOM 428 | General Parasitology and General Parasitology Lab |
| BIOM 435            | Virology                                          |
| BIOM 460            | Ecology of Infectious Diseases                    |

### Biochemistry

Complete either one semester or one year of Biochemistry courses: 4-6

|            |                              |
|------------|------------------------------|
| BCH 380    | Biochemistry                 |
| or BCH 480 | Advanced Biochemistry I      |
| & BCH 482  | and Advanced Biochemistry II |

### Additional Upper-Division Depth Courses in Microbiology

Complete 6 credits of the following courses. Infectious Disease electives may be counted here as long as the are not already applying to the Infectious Disease Elective requirement. 6

|                     |                                                        |
|---------------------|--------------------------------------------------------|
| BIOB 411            | Immunology Laboratory                                  |
| BIOB 483            | Phylogenics and Evolution                              |
| BIOB 486            | Genomics                                               |
| BIOM 327            | Vector-Borne Diseases: Public Health Perspectives      |
| BIOM 402 & BIOM 403 | Pathogenic Microbes and Pathogenic Microbes Laboratory |
| BIOM 420            | Host-Microbe Interactions                              |
| BIOM 427 & BIOM 428 | General Parasitology and General Parasitology Lab      |
| BIOM 435            | Virology                                               |
| BIOM 460            | Ecology of Infectious Diseases                         |
| BIOM 490            | Advanced Undergraduate Research                        |

### Mathematics & Computer Science

Complete two of the following courses. Only one may be in calculus. 7-8

|          |                                  |
|----------|----------------------------------|
| CSCI 150 | Introduction to Computer Science |
| M 162    | Applied Calculus                 |
| or M 171 | Calculus I                       |
| STAT 216 | Introduction to Statistics       |

### Chemistry

|                       |                                                   |   |
|-----------------------|---------------------------------------------------|---|
| CHMY 141N & CHMY 142N | College Chemistry I and College Chemistry I Lab   | 5 |
| CHMY 143N & CHMY 144N | College Chemistry II and College Chemistry II Lab | 5 |
| CHMY 221 & CHMY 222   | Organic Chemistry I and Organic Chemistry I Lab   | 5 |

|                        |                                                      |   |
|------------------------|------------------------------------------------------|---|
| CHMY 223<br>& CHMY 224 | Organic Chemistry II<br>and Organic Chemistry II Lab | 5 |
|------------------------|------------------------------------------------------|---|

**Physics**

Complete one of the following Physics sequences: 10

## Algebra- and Trigonometry-based Physics:

PHSX 205N College Physics I  
& PHSX 206N and College Physics I Laboratory

PHSX 207N College Physics II  
& PHSX 208N and College Physics II Laboratory

## Calculus-based Physics:

PHSX 215N Fundamentals of Physics with Calculus I  
& PHSX 216N and Physics Laboratory I with Calculus

PHSX 217N Fundamentals of Physics with Calculus II  
& PHSX 218N and Physics Laboratory II with Calculus

**Writing in the Disciplines Requirement**

To complete the General Education Requirement for Writing in the Disciplines, Microbiology, Immunology & Infectious Disease students can either take a complete writing course (in or outside of DBS) or partial writing courses (2-3) within the DBS Distributed Model. 3

**Total Hours** **89-93**

<sup>1</sup> The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

**Writing in the Disciplines Distributed Model Courses for Biological Sciences**

| Code                                           | Title                                             | Hours |
|------------------------------------------------|---------------------------------------------------|-------|
| <b>1/3 Writing in the Disciplines Courses</b>  |                                                   |       |
| BCH 482                                        | Advanced Biochemistry II                          | 3     |

<sup>1</sup> Indicates you have a choice of alternative courses for degree completion.  
See catalog, Degree Works, or your advisor for other options.

## Integrative Microbiology B.A.

Microbiology is the study of microorganisms including bacteria, fungi, viruses, and protozoa. The Integrative Microbiology major takes an interdisciplinary approach to the study of microbial structure and function and encourages the integration of microbiology with the study of other disciplines.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Integrative Microbiology

### Writing in the Disciplines Requirement

To complete the General Education Requirement for Writing in the Disciplines, Integrative Microbiology students can either take a complete writing course (in or outside of DBS) or partial writing courses (2-3) within the DBS Distributed Model.

**Total Hours** **72-75**

<sup>1</sup> The lower-division core should be completed before attempting most upper-division major courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

<sup>1</sup> Indicates you have a choice of alternative courses for degree completion. See catalog, Degree Works, or your advisor for other options.

## Medical Laboratory Science B.S.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Medical Laboratory Science

A degree in Medical Laboratory Science prepares students to perform various chemical, histological, and microbial laboratory procedures used in the diagnosis, study, and treatment of disease. Students with this degree seek employment in hospital laboratories, physicians' offices, and health departments. For clinical practice, a student must be

certified through the Board of Registry by completing a one-year clinical practicum.

<sup>1</sup> The 4+1 track is the more flexible option. Students complete the four years of the Bachelor's degree on the UM campus. They may then apply to a clinical practicum program anywhere in the country.

<sup>2</sup> The 3+1 track is the faster option as the clinical practicum year is part of the degree. Three years are spent on the UM campus, and then the clinical practicum year with the Montana University System Medical Laboratory Training program (or with one of our affiliated programs) is the fourth year of the Bachelor's degree.

The student must apply for the professional practicum to one of our affiliated programs during the autumn prior to enrollment. To be competitive for this practicum, a student must be in good academic standing with a minimum GPA of ~3.0 and demonstrate a commitment to the clinical laboratory profession. For more information, visit the Medical Laboratory Sciences website (<http://hs.umt.edu/medtech/>).

*Last updated Autumn 2025*

<sup>1</sup> Year 4 Practicum / Internship at one of our affiliated programs. MUST apply to programs the prior fall.

## Neuroscience B.S. - Cellular and Molecular Neuroscience

The University of Montana Neuroscience Program also offers a combined Bachelor of Science and Master of Science degree in Neuroscience with an emphasis on Cellular & Molecular Neuroscience. This five-year ("4 + 1") accelerated program is specifically designed for students who have demonstrated academic excellence and are deeply interested in pursuing intensive research training in preparation for graduate/professional schools or those who wish to enter the biomedical/biotech sector with advanced standing. The first 3 years of study are aligned with the existing Cellular & Molecular track of the B.S. in Neuroscience. Some students in the Cognitive & Behavioral track may also be eligible, depending upon their course selections. In the 4th year, students will take graduate neuroscience courses and complete their B.S. degree. This will allow students to enter the Neuroscience Graduate Program with advanced standing and, pending completion and defense of an M.S. thesis project, earn an M.S. in 5 years. See the Neuroscience website (<https://www.umt.edu/neuroscience/default.php>) for details on the curriculum and regulations in the Neuroscience B.S./M.S. Program.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Neuroscience; Cellular and Molecular Concentration

Last updated Autumn 2024

<sup>1</sup> The following neuroscience courses fulfill the Additional Major Course I and II elective categories as well as upper division electives: NEUR 441, NEUR 491 (Neuropharmacology), NEUR 491 (Neuroanatomy)

<sup>2</sup> Students can earn credit in Undergraduate Research in Neuroscience (NEUR 390 or NEUR 490) which will count as upper division elective credit.

## Neuroscience B.S. - Cognitive Neuroscience

The University of Montana Neuroscience Program also offers a combined Bachelor of Science and Master of Science degree in Neuroscience with an emphasis on Cellular & Molecular Neuroscience. This five-year ("4 + 1") accelerated program is specifically designed for students who have demonstrated academic excellence and are deeply interested in pursuing intensive research training in preparation for graduate/professional schools, or who wish to enter the biomedical/biotech sector with advanced standing. The first 3 years of study are aligned with the existing Cellular & Molecular track of the B.S. in Neuroscience. Some students in the Cognitive & Behavioral track may also be eligible, depending upon their course selections. In the 4th year, students will take graduate neuroscience courses and complete their B.S. degree. This will allow students to enter the Neuroscience Graduate Program with advanced standing and, pending completion and defense of an M.S. thesis project, earn an M.S. in 5 years. See the Neuroscience website (<https://www.umt.edu/neuroscience/default.php>) for details on the curriculum and regulations in the Neuroscience B.S./M.S. Program.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Neuroscience; Cognitive Neuroscience Concentration

|----------------------------------------|----------------------------------------------------------------------|-------|
| <b>Neuroscience Core Courses</b>       |                                                                      |       |
| Complete all of the following courses: |                                                                      |       |
| BIOB 160<br>& BIOB 161N                | Principles of Living Systems<br>and Principles of Living Systems Lab | 4     |
| BIOB 260                               | Cellular and Molecular Biology                                       | 4     |
| BIOB 272                               | Genetics and Evolution                                               | 4     |

|          |                                            |   |
|----------|--------------------------------------------|---|
| NEUR 280 | Fundamental Neuroscience                   | 3 |
| NEUR 281 | Fundamentals of Neuroscience II: Cognition | 3 |
| NEUR 380 | Molecular Neuroscience                     | 3 |
| NEUR 458 | Neuroscience Research Techniques Lab       | 4 |

### Mathematics and Physics

Complete all of the following courses:

|             |                               |   |
|-------------|-------------------------------|---|
| M 162       | Applied Calculus              | 4 |
| PHSX 205N   | College Physics I             | 4 |
| PHSX 206N   | College Physics I Laboratory  | 1 |
| PHSX 207N   | College Physics II            | 4 |
| PHSX 208N   | College Physics II Laboratory | 1 |
| STAT 216    | Introduction to Statistics    | 4 |
| or PSYX 222 | Psychological Statistics      |   |

### Chemistry

Complete one of the following Chemistry sequences: 9-15

|                                    |                                              |  |
|------------------------------------|----------------------------------------------|--|
| Introductory Chemistry (9 Credits) |                                              |  |
| CHMY 121N                          | Introduction to General Chemistry            |  |
| CHMY 123                           | Introduction to Organic and Biochemistry     |  |
| CHMY 124                           | Introduction to Organic and Biochemistry Lab |  |
| College Chemistry (15 Credits)     |                                              |  |
| CHMY 141N                          | College Chemistry I                          |  |
| CHMY 142N                          | College Chemistry I Lab                      |  |
| CHMY 143N                          | College Chemistry II                         |  |
| CHMY 144N                          | College Chemistry II Lab                     |  |
| CHMY 221                           | Organic Chemistry I                          |  |
| CHMY 222                           | Organic Chemistry I Lab                      |  |

### Additional Major Courses

Complete all of the following courses:

|          |                                        |   |
|----------|----------------------------------------|---|
| BCH 380  | Biochemistry                           | 4 |
| PSYX 270 | Fundamentals of Psychology of Learning | 3 |
| PSYX 280 | Fundamentals of Memory and Cognition   | 3 |
| PSYX 356 | Human Neuropsychology                  | 3 |

Complete two of the following courses: 6-7

|          |                                                       |  |
|----------|-------------------------------------------------------|--|
| BIOB 301 | Developmental Biology                                 |  |
| BIOH 365 | Human Anatomy and Physiology for Health Professions I |  |
| KIN 330  | Motor Learning and Control                            |  |
| NEUR 441 | CNS Diseases                                          |  |
| NEUR 475 | Neuropharmacology                                     |  |
| NEUR 481 | Systems Neuroscience of Behavior and Cognition        |  |
| PSYX 352 | Comparative Psychology                                |  |

### Intersection Courses

Complete one of the following courses 1-9

|          |                                     |  |
|----------|-------------------------------------|--|
| BIOE 406 | Behavior & Evolution                |  |
| DANC 345 | New Visions Dance                   |  |
| HTH 430  | Health and Mind/Body/Spirit         |  |
| PSYX 233 | Fundamentals of Psychology of Aging |  |

### Writing in the Disciplines Requirement

To complete the General Education Requirement for Writing in the Disciplines, Neuroscience students can either take a complete writing course (in or outside of DBS) or partial writing courses (2-3) within the DBS Distributed Model.

**Total Hours 72-87**

## Writing in the Disciplines Distributed Model Courses for Biological Sciences

| Code                                          | Title                                             | Hours |
|-----------------------------------------------|---------------------------------------------------|-------|
| <b>1/3 Writing in the Disciplines Courses</b> |                                                   |       |
| BCH 482                                       | Advanced Biochemistry II                          | 3     |

*Last updated Autumn 2024*

<sup>1</sup> The following neuroscience courses fulfill the Additional Major Course elective categories as well as upper division electives: NEUR 441, NEUR 491 (Neuropharmacology), NEUR 491 (Neuroanatomy)

<sup>2</sup> Students can earn credit in Undergraduate Research in Neuroscience (NEUR 390 or NEUR 490) which will count as upper division elective credit.

## Biology Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Minor - Biology

#### Course Requirements

The lower-division core should be completed before attempting most upper division BIO- courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160 /BIOB 161NorBIOB 170N/BIOB 171N.

### Biological Education Minor

This minor contains additional course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.

Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Biological Education Course Requirements

The lower-division core should be completed before attempting most upper division BIO- courses. AP Biology credit with a score of 3 may be substituted for either BIOB 160/BIOB 161N or BIOB 170N/BIOB 171N.

| <b>Total Hours</b> |                                                  | <b>46</b> |

<sup>1</sup> Choose M 171, if you plan to take additional calculus courses, or if you plan a double major or minor in a field that requires more calculus (e.g. math, physics, biochemistry, computer science).

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Microbiology Minor General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Chemistry & Biochemistry

### Chemistry

Chemistry is the central science that involves the study of molecules, their structures, their combinations, their interactions, and the energy changes accompanying chemical processes.

The Department offers the following degrees: B.S., B.A., M.S., M.A., and Ph.D.

Prospective students desiring further information on programs in the Department of Chemistry and Biochemistry should visit the websites of the Department of Chemistry and Biochemistry (<http://hs.UMT.edu/chemistry/default.php>) and the Biochemistry Program (<http://hs.UMT.edu/biochemistry/>).

**High School Preparation:** In addition to the general University admission requirements, it is strongly recommended that a student take four years of mathematics, four (or more) years of science (earth and space science, biology, chemistry, and physics), four years of a modern or classical language, and four years of English.

## Biochemistry

The Biochemistry Program is a joint program between the Department of Chemistry and Biochemistry and the Division of Biological & Biomedical Sciences. Biochemistry is an interdisciplinary science that integrates chemistry and biology to understand the molecular basis of life. The Biochemistry Program is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB).

Undergraduate majors receive a solid foundation in both chemistry and biology. Biochemistry courses are usually taken in the junior year allowing majors to become involved in research with faculty and to take electives in their senior year. The major also introduces students to computer science, an essential tool in modern biochemistry. The B.S. in Biochemistry prepares students for advanced degrees in biochemistry or biophysics, for medical, dental or veterinary schools and for careers in the pharmaceutical and biotechnology industries. A Health Professions concentration is also offered within the B.S. in Biochemistry for students whose career goals are in fields related to biochemistry, particularly medical school. This option is designed so that students can complete all coursework necessary for the MCAT and other exams required for health-related professional schools by the end of their third year. Students desiring a basic grounding in biochemistry to complement their primary major can choose to pursue a minor in Biochemistry. All students completing a major or minor in Biochemistry are eligible to take the ASBMB certification exam in their junior or senior year.

Prospective students desiring further information on these degrees should contact the Program Director by visiting the Biochemistry Program web site (<http://hs.UMT.edu/biochemistry/>).

**High School Preparation:** In addition to the general University admission requirements, it is strongly recommended that a student take four years of mathematics, four years of science, and a language.

| PHAR 422                                                                                                                                                       | Medicinal Chemistry II                                    |           |
| <b>Writing in the Disciplines Requirement</b>                                                                                                                  |                                                           |           |
| To complete the Writing in the Disciplines Requirement, Biochemistry students may take the following courses or any other stand-alone advanced writing course. |                                                           |           |
| BCH 482 & BCH 486                                                                                                                                              | Advanced Biochemistry II and Biochemistry Research Lab    |           |
| <b>Total Hours</b>                                                                                                                                             |                                                           | <b>93</b> |

- <sup>1</sup> Students planning to attend graduate school in biochemistry or biophysics are strongly advised to take the CHMY 373-CHMY 371 sequence.
- <sup>2</sup> No more than 3 credits combined of BIOB 490, CHMY 490, CHMY 498 and BCH 490. No more than 3 credits combined of CHMY 397 and CHMY 494.

Four Year Plan

| Course                        | Title                                                                            | Hours     |
|-------------------------------|----------------------------------------------------------------------------------|-----------|
| <b>Freshman</b>               |                                                                                  |           |

Last updated Autumn 2024

Biochemistry B.S. - Health Professions

The Biochemistry Program is a joint program between the Department of Chemistry and Biochemistry and the Division of Biological & Biomedical Sciences. Biochemistry is an interdisciplinary science that integrates chemistry and biology to understand the molecular basis of life. The Biochemistry Program is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB).

The Health Professions concentration offered within the B.S. in Biochemistry is for students whose career goals are in fields related to biochemistry, particularly medical school. This concentration is designed so that students can complete all coursework necessary for the MCAT and other exams required for health-related professional schools by the end of their third year.

General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Bachelor of Science - Biochemistry; Health Professions Concentration Course Requirements

| PHAR 421 | Medicinal Chemistry I                    |  |
| PHAR 422 | Medicinal Chemistry II                   |  |
| STAT 451 | Statistical Methods I                    |  |

**Social Science - Sociology and Psychology**

Complete all of the following courses:

|           |                           |   |
|-----------|---------------------------|---|
| PSYX 100S | Intro to Psychology       | 3 |
| SOCI 101S | Introduction to Sociology | 3 |

**Writing in the Disciplines Requirement**

To complete the Writing in the Disciplines Requirement, Biochemistry students may take the following courses or any other stand-alone advanced writing course.

|                   |                                                        |  |
|-------------------|--------------------------------------------------------|--|
| BCH 482 & BCH 486 | Advanced Biochemistry II and Biochemistry Research Lab |  |
|-------------------|--------------------------------------------------------|--|

**Total Hours** **97**

<sup>1</sup> Students planning to attend graduate school in biochemistry or biophysics are strongly advised to take the CHMY 373-CHMY 371 sequence.

<sup>2</sup> No more than 3 credits combined of BIOB 490, CHMY 490, CHMY 498 and BCH 490. No more than 3 credits combined of CHMY 397 and CHMY 494.

**Four Year Plan**

| Course                      | Title                                                                          | Hours     |
|-----------------------------|--------------------------------------------------------------------------------|-----------|
| <b>Freshman</b>             |                                                                                |           |

## Biochemistry Minor

The Biochemistry Program is a joint program between the Department of Chemistry and Biochemistry and the Division of Biological & Biomedical Sciences. Biochemistry is an interdisciplinary science that integrates chemistry and biology to understand the molecular basis of life. The Biochemistry Program is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB).

Students desiring a basic grounding in biochemistry to complement their primary major can choose to pursue the minor in Biochemistry. All students completing a major or minor in Biochemistry are eligible to take the ASBMB certification exam in their junior or senior year.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Biochemistry Course Requirements

## Brewing Science C.A.S.

This certificate in brewing science allow students to attain and demonstrate a general knowledge of the science and practice of malting and brewing, a greater appreciation of the science and manufacturing processes of beer production, and technical competence in laboratory testing procedures related to brewing. Students who complete this certificate may seek employment in the malting, brewing or distilling industry.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| Code                                          | Title                        | Hours     |
|-----------------------------------------------|------------------------------|-----------|
| <b>Complete all of the following courses:</b> |                              |           |
| PHAR 421                                      | Medicinal Chemistry I        | 3         |
| PHAR 422                                      | Medicinal Chemistry II       | 3         |
| PHAR 443                                      | Pharmacology & Toxicology I  | 4         |
| PHAR 444                                      | Pharmacology & Toxicology II | 4         |
| <b>Complete two of the following courses:</b> |                              | <b>6</b>  |
| CHMY 411                                      | Advanced Organic Chemistry   |           |
| CHMY 420                                      | Chemoinformatics             |           |
| CHMY 465                                      | Organic Spectroscopy         |           |
| <b>Total Hours</b>                            |                              | <b>20</b> |

## Chemistry B.S.

(American Chemical Society Certified)

The courses required for the B.S. degree provide a solid education in chemistry for the professional chemist and in preparation for graduate work in most areas of chemistry. These requirements meet the latest certification standards of the American Chemical Society.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Writing in the Disciplines Requirement

To complete the Writing in the Disciplines Requirement, Chemistry students take BCH 482 and BCH 486 or any other stand-alone advanced writing course.

**Total Hours** **80**

<sup>1</sup> Other upper division classes in Chemistry, Computer Science, Physics, Geosciences, Biochemistry, Biology, or Mathematics (including graduate level courses offered for undergraduate credit) may be used to meet the advanced electives requirement with approval of the Chemistry advisor. A maximum of 9 credits of CHMY courses number 490-499 may be applied toward degree requirements.

## Four Year Plan

| Course                        | Title                                    | Hours     |
|-------------------------------|------------------------------------------|-----------|
| <b>Freshman</b>               |                                          |           |
| <b>Autumn</b>                 |                                          |           |
| CHMY 141N                     | College Chemistry I                      | 5         |
| & CHMY 142N                   | and College Chemistry I Lab              |           |
| BIOB 160                      | Principles of Living Systems             | 4         |

## Chemistry B.S. - Forensic Chemistry

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Chemistry; Forensic Chemistry Concentration

### Course Requirements

### Upper-Division Core Courses

Complete all of the following courses:

|             |                                              |   |
|-------------|----------------------------------------------|---|
| BCH 480     | Advanced Biochemistry I                      | 3 |
| BCH 482     | Advanced Biochemistry II                     | 3 |
| BCH 486     | Biochemistry Research Lab                    | 3 |
| CHMY 311    | Analytical Chemistry-Quantitative Analysis   | 4 |
| CHMY 373    | Physical Chemistry-Kinetics & Thermodynamics | 4 |
| CHMY 401    | Advanced Inorganic Chemistry                 | 3 |
| CHMY 421    | Advanced Instrument Analysis                 | 4 |
| CHMY 488    | Forensic Research                            | 3 |
| or CHMY 498 | Internship/Cooperative Education             |   |
| CHMY 489    | Forensic Research Seminar                    | 1 |
| STAT 451    | Statistical Methods I                        | 3 |
| STAT 457    | Computer Data Analysis I                     | 1 |

### Advanced Electives

|                                                |                                           |   |
|------------------------------------------------|-------------------------------------------|---|
| Complete 7 credits from the following courses: |                                           | 7 |
| CHMY 411                                       | Advanced Organic Chemistry                |   |
| CHMY 465                                       | Organic Spectroscopy                      |   |
| CHMY 466                                       | FT-NMR Option for Undergraduate Research  |   |
| CHMY 542                                       | Separation Science                        |   |
| CJUS 488                                       | Forensic Science the Crime Lab and Beyond |   |

### Writing in the Disciplines Requirement

To complete the Writing in the Disciplines Requirement, Chemistry students take BCH 482 and BCH 486 or any other stand-alone advanced writing course.

Chemistry Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.

General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Chemistry Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

| CHMY 465                                     | Organic Spectroscopy                                |              |
| <b>Total Hours</b>                           |                                                     | <b>32-34</b> |

<sup>1</sup> If the student's major requires Biochemistry, BCH 380 or BCH 480 and BCH 482 may not be used to satisfy this requirement.

## Computer Science

The growing utility of computers in research and education as well as the increased impact of computers on our modern society strongly implies that knowledge of computers and their capabilities should be a part of the basic education of all students. The courses offered in the Department of Computer Science are designed to provide the student with this knowledge and to prepare the student for a career in a field in which there is a growing need for trained personnel. The objective of the undergraduate curriculum in computer science is to develop professionally competent, broadly educated computer scientists who wish to pursue professional careers or graduate studies.

High School Preparation: In addition to general University admission requirements, pre-college preparation should include as many computer science courses as possible and four years of high school mathematics, to include algebra, trigonometry, and pre-calculus. Also recommended are physics, chemistry, and biology.

- Computer Science B.S. - Algorithm Design (p. 350)
- Computer Science B.S. - Data Science (p. 351)
- Computer Science B.S. - Software Engineering (p. 352)
- Computer Science-Mathematical Sciences B.S. (Combined Major) (p. 353)
- Computer Science Minor (p. 355)
- Computer Programming Certificate (p. 355)

# Computer Science B.S. - Algorithm Design

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Computer Science; Algorithm Design Concentration

### Course Requirements

Last updated Autumn 2024

<sup>1</sup> Preparatory course - no credit towards degree, must be taken at this time to assure progression through degree

<sup>2</sup> M 162 will not be accepted for this concentration

## Computer Science B.S. - Data Science

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

<sup>1</sup> A maximum of 3 credits from each of the following groups may count toward Computer Science electives. Total credits across all groups may not exceed 6.

- Research (CSCI 390 or CSCI 490)
- Independent study (CSCI 392 or CSCI 492)
- Learning Assistant (CSCI 394)
- Internship (CSCI 398 or CSCI 498)

Last updated Autumn 2024

<sup>1</sup> Preparatory course - no credit towards degree, must be taken at this time to assure progression through degree  
<sup>2</sup> M 162 will not be accepted for this concentration

Computer Science B.S. - Software Engineering

General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

<sup>1</sup> A maximum of 3 credits from each of the following groups may count toward Computer Science electives. Total credits across all groups may not exceed 6.

- Research (CSCI 390 or CSCI 490)
- Independent study (CSCI 392 or CSCI 492)
- Learning Assistant (CSCI 394)
- Internship (CSCI 398 or CSCI 498)

## Four Year Plan

| Course                        | Title                                       | Hours        |
|-------------------------------|---------------------------------------------|--------------|
| <b>Freshman</b>               |                                             |              |
| <b>Autumn</b>                 |                                             |              |
| CSCI 150                      | Introduction to Computer Science            | 3            |
| CSCI 106                      | Careers in Computer Science                 | 1            |
| COMX 111A                     | Introduction to Public Speaking             | 3            |
| General Education Requirement |                                             | 6            |
| <b>Hours</b>                  |                                             | <b>13</b>    |
| <b>Spring</b>                 |                                             |              |
| CSCI 151                      | Interdisciplinary Computer Science I        | 3            |
| WRIT 101                      | College Writing I                           | 4            |
| CSCI 181                      | Web Design and Programming                  | 3            |
| M 121                         | College Algebra (if needed) <sup>1</sup>    | 3-4          |
| or M 122                      | or College Trigonometry                     |              |
| or M 151                      | or Precalculus                              |              |
| <b>Hours</b>                  |                                             | <b>13-14</b> |
| <b>Sophomore</b>              |                                             |              |
| <b>Autumn</b>                 |                                             |              |

<sup>1</sup> Preparatory course - no credit towards degree, must be taken at this time to assure progression through degree

## Computer Science-Mathematical Sciences B.S. (Combined Major)

The purpose of the combined program is to provide a thorough background in both allied disciplines and to inculcate a deeper understanding of their goals and methods. A student must complete 62 credits in the two disciplines:

- 31 of these credits in Computer Science courses and
- 31 of these credits in Mathematical Sciences courses.

Each student plans a program in consultation with a Computer Science and a Mathematical Sciences advisor. Students planning to attend graduate school in computer science or the mathematical sciences should consult with their respective advisors.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Science - Computer Science-Mathematical Science

### Course Requirements

| Code                                                | Title                                                                         | Hours |
|-----------------------------------------------------|-------------------------------------------------------------------------------|-------|
| <b>Mathematical Sciences Core</b>                   |                                                                               |       |
| Complete all of the following courses:              |                                                                               |       |

| Complete the following course:                                           |                                             |           |
| COMX 111A                                                                | Introduction to Public Speaking             | 3         |
| <b>Total Hours</b>                                                       |                                             | <b>65</b> |

<sup>1</sup> The combined 9 credits of Computer Science Electives and twelve 12 credits of Mathematical Sciences Electives must include at least three 3 or 4 credit courses numbered 400 or above, with at least one chosen from each department (not including M 429 and STAT 451, STAT 452).

<sup>2</sup> A total of at most three of the 9 credits of Computer Science Electives may be in CSCI 398 or CSCI 498.

## Four Year Plan

| Course                        | Title                                             | Hours        |

Last updated Autumn 2025

- <sup>1</sup> Students may begin with CSCI 151 in their first semester if they can pass a programming skills entrance exam.
- <sup>2</sup> This degree template can be adapted for students who are not ready to take M 171 (Calculus I) in their first semester.
- <sup>3</sup> Details regarding the Math and Computer Science Electives are in the Catalog and on Degree Works. Choose these courses with your advisor.

## Computer Science Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Computer Science

### Course Requirements

| Code                                                                                                                               | Title                                       | Hours     |
|------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-----------|
| <b>Fundamentals</b>                                                                                                                |                                             |           |
| Complete all of the following courses:                                                                                             |                                             |           |
| CSCI 150                                                                                                                           | Introduction to Computer Science            | 3         |
| CSCI 151                                                                                                                           | Interdisciplinary Computer Science I        | 3         |
| CSCI 152                                                                                                                           | Interdisciplinary Computer Science II       | 3         |
| CSCI 232                                                                                                                           | Intermediate Data Structures and Algorithms | 4         |
| <b>Electives</b>                                                                                                                   |                                             |           |
| Complete 6 credits of the Computer Science (CSCI) at the 200-level or above. At least 3 credits must be at the 300-level or above. |                                             | 6         |
| <b>Total Hours</b>                                                                                                                 |                                             | <b>19</b> |

## Computer Programming Certificate

Programming is an essential skill for solving problems in many fields. Programming gives maximum flexibility in processing and understanding data, constructing computational models, and building user friendly applications. Programming skills are in high demand in the marketplace. Completing this certificate could be the first step towards a career that involves software development.

Students will apply object-oriented principles to develop software systems. Students will learn to apply and program data structures like lists, trees, and hash tables. The elective course allows the student to learn about software engineering, web programming, mobile device programming, or user interface design.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Post-Secondary Certificate - Computer Programming

### Course Requirements

| Code                                   | Title                                         | Hours |
|----------------------------------------|-----------------------------------------------|-------|
| <b>Required Courses</b>                |                                               |       |
| Complete all of the following courses: |                                               |       |
| CSCI 150                               | Introduction to Computer Science <sup>1</sup> | 3     |
| CSCI 151                               | Interdisciplinary Computer Science I          | 3     |
| <b>Electives</b>                       |                                               |       |
| Complete two of the following courses: |                                               | 6-7   |
| CSCI 152                               | Interdisciplinary Computer Science II         |       |

|                    |                                             |              |
|--------------------|---------------------------------------------|--------------|
| CSCI 181           | Web Design and Programming                  |              |
| CSCI 232           | Intermediate Data Structures and Algorithms |              |
| CSCI 258           | Web Application Development                 |              |
| <b>Total Hours</b> |                                             | <b>12-13</b> |

<sup>1</sup> A placement examination exempts some students from taking CSCI 150. Those students take a CSCI course at the 200 level or higher instead. CSCI 215E and CSCI 315E are writing classes and cannot be applied toward this certificate.

## Mathematical Sciences

Mathematics is studied both as a tool and for its own sake. Its usefulness for the sciences and in decision-making processes makes it an indispensable part of many curricula. Mathematics is challenging, fascinating, and beautiful; and it is also appreciated by many who seek primarily to use mathematics as a tool.

The Department of Mathematical Sciences provides students with the training in mathematics and statistics necessary for success in their careers. The instructional mission of the department has three components: we offer general education quantitative literacy courses; we provide the mathematical background for students preparing for careers in other fields; and we offer a quality program of mathematical specialization at all levels, ranging from an undergraduate minor to bachelors, masters, and doctoral degrees in a variety of fields, including teacher preparation.

Mathematics more and more becomes an integral part of high-tech industries; many technological, political, and social processes have become so complex that they could not be really understood without a mathematician's involvement. Our graduates are prepared for exciting and fulfilling careers in academia, industry, government, and other areas. In addition to educational activities, our faculty are committed to excellence both in research in the mathematical sciences and in service to the citizens of Montana and the wider community.

**High School Preparation:** For studying mathematics at the University level, it is recommended that the high school course work consist of four years of college-preparatory mathematics, including geometry, trigonometry, and college algebra or precalculus. A course in calculus or statistics is helpful, but not necessary. It is unusual to complete an undergraduate degree in mathematics in four years without the necessary background to take M 171 during the freshman year (preferably during the first semester at the university).

- Mathematical Sciences-Computer Science B.S. (Combined Major) (p. 356)
- Mathematics B.A. (p. 358)
- Mathematics B.A. - Applied Mathematics (p. 360)
- Mathematics B.A. - Combinatorics and Optimization (p. 362)
- Mathematics B.A. - Mathematics Education (p. 363)
- Mathematics B.A. - Pure Mathematics (p. 365)
- Mathematics B.A. - Statistics and Data Science (p. 366)
- Mathematics Education Minor (p. 367)
- Mathematics Minor (p. 368)

## Mathematical Sciences-Computer Science B.S. (Combined Major)

The purpose of the combined program is to provide a thorough background in both allied disciplines and to inculcate a deeper understanding of their goals and methods. A student must complete 62 credits in the two disciplines:

- 31 of these credits in Computer Science courses and
- 31 of these credits in Mathematical Sciences courses.

Each student plans a program in consultation with both a Computer Science and a Mathematical Sciences advisor. Students planning to attend graduate school in computer science or the mathematical sciences should consult with their respective advisors.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

<sup>1</sup> The combined nine credits of Computer Science Electives and twelve credits of Mathematical Sciences Electives must include at least three 3- or 4-credit courses numbered 400 or above with at least one chosen from each department (not including M 429 and STAT 451, STAT 452).

<sup>2</sup> A total of at most three of the nine credits of Computer Science Electives may be in CSCI 398 or CSCI 498.

## Four Year Plan

| Course                   | Title                                                   | Hours |

*Last updated Autumn 2025*

<sup>1</sup> Students may begin with CSCI 151 in their first semester if they can pass a programming skills entrance exam.

<sup>2</sup> This degree template can be adapted for students who are not ready to take M 171 (Calculus I) in their first semester.

<sup>3</sup> Details regarding the Math and Computer Science Electives are in the Catalog and on Degree Works. Choose these courses with your advisor.

## Mathematics B.A.

This degree is the BA in Mathematics without a concentration. Students can add one or more of the concentrations in Applied Mathematics, Combinatorics & Optimization, Pure Mathematics, or Statistics and Data Science to this degree by fulfilling the respective Concentration Requirements (achieved by taking specific Upper-Division Elective Courses). Typically, students declare one of these four concentrations during their sophomore or junior year. Note that the requirements for the Mathematics Education concentration are extensive and differ substantially from the requirements for the other concentrations. Students interested in Mathematics Education are encouraged to declare this concentration as early as possible, preferably during their first year at UM.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Mathematics

### Credit Requirements

The major specific credits are much lower for double-majors and for students completing a minor in another subject:

- 41 credits for students completing a second major, and
- 46 credits for students completing a minor.

### GPA Requirement

- A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
- In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

### Course Requirements

| Code                                   | Title                                 | Hours |
|----------------------------------------|---------------------------------------|-------|
| <b>Core Courses</b>                    |                                       |       |
| Complete all of the following courses: |                                       |       |
| M 171                                  | Calculus I                            | 4     |
| or M 181                               | Honors Calculus I                     |       |
| M 172                                  | Calculus II                           | 4     |
| or M 182                               | Honors Calculus II                    |       |
| M 210                                  | Introduction to Mathematical Software | 3     |
| M 221                                  | Introduction to Linear Algebra        | 4     |

|       |                                      |   |
|-------|--------------------------------------|---|
| M 273 | Multivariable Calculus               | 4 |
| M 300 | Undergraduate Mathematics Seminar    | 1 |
| M 307 | Introduction to Abstract Mathematics | 3 |

### Electives <sup>1</sup>

Complete 18-23 credits (6-7 courses) of the following courses. 18-23  
At least three courses must be at the 400 level. See note below about the elective credit requirement.

|          |                                                                               |
|----------|-------------------------------------------------------------------------------|
| M 274    | Introduction to Differential Equations                                        |
| M 301    | Teaching Mathematics with Technology                                          |
| M 325    | Discrete Mathematics                                                          |
| M 326    | Number Theory                                                                 |
| M 361    | Discrete Optimization                                                         |
| M 362    | Linear Optimization                                                           |
| M 381    | Advanced Calculus I                                                           |
| M 412    | Partial Differential Equations                                                |
| M 414    | Deterministic Models                                                          |
| M 429    | History of Mathematics <sup>2</sup>                                           |
| M 431    | Abstract Algebra I                                                            |
| M 432    | Abstract Algebra II                                                           |
| M 439    | Euclidean and NonEuclidean Geometry                                           |
| M 440    | Numerical Analysis                                                            |
| M 445    | Statistical, Dynamical, and Computational Modeling                            |
| M 461    | Data Science Analytics                                                        |
| M 462    | Theoretical Basics of Big Data Analytics and Real Time Computation Algorithms |
| M 472    | Introduction to Complex Analysis                                              |
| M 473    | Introduction to Real Analysis                                                 |
| M 485    | Graph Theory                                                                  |
| STAT 342 | Probability and Simulation                                                    |
| STAT 421 | Probability Theory                                                            |
| STAT 422 | Mathematical Statistics                                                       |
| STAT 452 | Statistical Methods II                                                        |

### Science Requirement <sup>3</sup>

Complete 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO\*), chemistry (CHMY), computer science (CSCI, except CSCI TR\*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX). 18

### Language/Computer Science Requirement <sup>4</sup>

Complete either the General Education Language Requirement or complete one of the following courses: 3

|          |                                       |
|----------|---------------------------------------|
| CSCI 150 | Introduction to Computer Science      |
| CSCI 151 | Interdisciplinary Computer Science I  |
| CSCI 152 | Interdisciplinary Computer Science II |

**Total Hours** 62-67

<sup>1</sup> Students completing a second major need take only 18 credits. Students completing a minor in another subject need take only 20 credits. All other students must complete 23 credits and 7 courses. At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).

<sup>2</sup> M 429 is also an advanced college writing course. Most Mathematics majors use M 429 to meet the advanced college writing general education requirement.

<sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as CSCI TR\* may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

<sup>4</sup> Students completing a second major are exempt from this requirement.

| Code                                                                                                                                                                                                       | Title                          | Hours |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|-------|
| <b>Elective Computer Labs and Independent Study Courses</b>                                                                                                                                                |                                |       |
| Computer labs and independent study courses from the following list are optional; if taken (0-2 credits), they count toward the total number of credits required for the Mathematics Elective requirement. |                                |       |
| M 363                                                                                                                                                                                                      | Linear Optimization Laboratory |       |
| M 392                                                                                                                                                                                                      | Independent Study              |       |
| M 492                                                                                                                                                                                                      | Independent Study              |       |
| STAT 457                                                                                                                                                                                                   | Computer Data Analysis I       |       |
| STAT 458                                                                                                                                                                                                   | Computer Data Analysis II      |       |

## Four Year Plan

| Course            | Title                                 | Hours     |

Last updated Autumn 2025

This degree template can be adapted for students who are not ready to take M 171 (Calculus I) in their first semester.

Up to 12 of the 18 credits in Science Electives can be replaced by a minor or a second major.

Student can add a concentration in Applied Mathematics (p. 360), Combinatorics & Optimization (p. 362), Pure Mathematics (p. 365) or Statistics & Data Science (p. 366) by choosing part of their Math Electives from the chosen area. Students interested in Mathematics Education must follow the degree template for Mathematics Education (p. 363).

Details regarding the Math and Science Electives are in the Catalog and on Degree Works. Choose these courses in consultation with your math advisor.

Details regarding the General Education course work are in the Catalog and on Degree Works. Choose these courses in consultation with an advisor. In particular, take WRIT 101 as early as possible.

Students not completing the General Education language requirement must take one of several computer sciences courses as part of their Science Electives.

39 upper-division (300+ course) credits are required.

## Mathematics B.A. - Applied Mathematics

This degree concentration differs from the BA in Mathematics without a concentration only in the Concentration Requirements.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Bachelor of Arts - Mathematics; Applied Mathematics Concentration Credit Requirements

The major specific credits are much lower for double-majors and for students completing a minor in another subject:

- 42 credits for students completing a second major, and
- 46 credits for students completing a minor.

## GPA Requirement

- A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
- In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

| STAT 452                                                                                                                                                              | Statistical Methods II                                                        |       |
| <b>Science Requirement</b> <sup>3</sup>                                                                                                                               |                                                                               |       |

Complete 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO\*), chemistry (CHMY), computer science (CSCI, except CSCI TR\*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

### Language/Computer Science Requirement<sup>4</sup>

Complete either the General Education Language Requirement or complete one of the following courses:

|          |                                       |
|----------|---------------------------------------|
| CSCI 150 | Introduction to Computer Science      |
| CSCI 151 | Interdisciplinary Computer Science I  |
| CSCI 152 | Interdisciplinary Computer Science II |

### Applied Mathematics Concentration

These courses count toward the mathematics electives requirement

#### Applied Mathematics Concentration Core Courses

Complete all of the following courses:

|       |                                        |
|-------|----------------------------------------|
| M 274 | Introduction to Differential Equations |
| M 412 | Partial Differential Equations         |

#### Applied Mathematics Concentration Elective Courses<sup>5</sup>

Complete two of the following courses:

|       |                                  |
|-------|----------------------------------|
| M 414 | Deterministic Models             |
| M 440 | Numerical Analysis               |
| M 445 |                                  |
| M 472 | Introduction to Complex Analysis |

**Total Hours** **62-67**

<sup>1</sup> Students completing a second major need take only 18 credits. Students completing a minor in another subject need take only 20 credits. All other students must complete 23 credits and 7 courses. At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).

<sup>2</sup> M 429 is also an advanced college writing course. Most Mathematics majors use M 429 to meet the advanced college writing general education requirement.

<sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as CSCI TR\* may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

<sup>4</sup> Students completing a second major are exempt from this requirement.

<sup>5</sup> In addition, M 381 and M 485 are also recommended.

| Code                                                                                                                                                                                                       | Title                          | Hours |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|-------|
| <b>Elective Computer Labs and Independent Study Courses</b>                                                                                                                                                |                                |       |
| Computer labs and independent study courses from the following list are optional; if taken (0-2 credits), they count toward the total number of credits required for the Mathematics Elective requirement. |                                |       |
| M 363                                                                                                                                                                                                      | Linear Optimization Laboratory |       |
| M 392                                                                                                                                                                                                      | Independent Study              |       |
| M 492                                                                                                                                                                                                      | Independent Study              |       |
| STAT 457                                                                                                                                                                                                   | Computer Data Analysis I       |       |
| STAT 458                                                                                                                                                                                                   | Computer Data Analysis II      |       |

# Mathematics B.A. - Combinatorics and Optimization

This degree concentration differs from the BA in Mathematics without a concentration only in the Concentration Requirements.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Mathematics; Combinatorics and Optimization Concentration

### Credit Requirements

The major specific credits are much lower for double-majors and for students completing a minor in another subject:

- 41 credits for students completing a second major, and
- 46 credits for students completing a minor.

### GPA Requirement

- A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
- In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

### Course Requirements

| Code                                   | Title                                 | Hours |
|----------------------------------------|---------------------------------------|-------|
| Core Courses                           |                                       |       |
| Complete all of the following courses: |                                       |       |
| M 171<br>or M 181                      | Calculus I                            | 4     |
| M 172<br>or M 182                      | Calculus II                           | 4     |
| M 210                                  | Introduction to Mathematical Software | 3     |
| M 221                                  | Introduction to Linear Algebra        | 4     |
| M 273                                  | Multivariable Calculus                | 4     |
| M 300                                  | Undergraduate Mathematics Seminar     | 1     |
| M 307                                  | Introduction to Abstract Mathematics  | 3     |
| Electives <sup>1</sup>                 |                                       |       |

Complete 18-23 credits (6-7 courses) of the following courses. 18-23  
At least three courses must be at the 400 level. See note below about the elective credit requirement.

|          |                                                                               |
|----------|-------------------------------------------------------------------------------|
| M 274    | Introduction to Differential Equations                                        |
| M 301    | Teaching Mathematics with Technology                                          |
| M 325    |                                                                               |
| M 326    | Number Theory                                                                 |
| M 361    | Discrete Optimization                                                         |

| <b>Total Hours</b> | <b>62-67</b>               |

- <sup>1</sup> Students completing a second major need take only 18 credits. Students completing a minor in another subject need take only 20 credits. All other students must complete 23 credits and 7 courses. At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).
- <sup>2</sup> M 429 is also an advanced college writing course. Most Mathematics majors use M 429 to meet the advanced college writing general education requirement.
- <sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as CSCI TR\* may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.
- <sup>4</sup> Students completing a second major are exempt from this requirement.

## Mathematics B.A. - Mathematics Education

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the non-teaching track since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Mathematics; Mathematics Education Concentration

- The number of degree specific credits required is significantly higher if one also counts the additional course work required by the Teacher Education Program.
- Note that the Teacher Education Program requires in addition an overall cumulative GPA of at least 2.75
- Residency Requirement: At least four of the upper-division mathematics courses must be taken at UM-Missoula.

<sup>1</sup> M 429 satisfies the Advanced Writing Requirement for this major.

<sup>2</sup> STAT 451 may not count as both a Core and Elective course.

<sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as "CSCI TR\*" may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Four Year Plan

| Course                        | Title                                                                                                           | Hours        |

*Last updated Autumn 2025*

It is recommended that you apply to the Teacher Education Program at the start of Year 2 (since admission to the TEP is required before you can take EDU courses). Discuss this with your Math Faculty Mentor in the Spring of Year 1

<sup>1</sup> Recommended but not required. To ensure that you meet all relevant requirements, replace them only after consultation with your math advisor.

<sup>2</sup> Details regarding the Math and Science Electives are in the Catalog and on Degree Works. Choose these courses in consultation with your math advisor.

## Mathematics B.A. - Pure Mathematics

This degree concentration differs from the BA in Mathematics without a concentration only in the Concentration Requirements.

### General Graduate Program Requirements

Graduate School policies and standards can be found on the Graduate School Policies page (p. 440).

The minimum GPA for any graduate program is 3.0. Individual programs may require more than a 3.0 to remain in good standing.

The minimum grade for a course to be accepted toward any master's or doctoral requirement is C. The minimum grade for a course to be accepted toward a certificate program is B-. Individual programs may require higher grades for specific courses.

## Bachelor of Arts - Mathematics; Pure Mathematics Concentration

### Credit Requirements

The major specific credits are much lower for double-majors and for students completing a minor in another subject:

- 44 credits for students completing a second major, and
- 47 credits for students completing a minor.

### GPA requirement

- A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
- In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

### Course Requirements

| Code                                   | Title                                 | Hours |
|----------------------------------------|---------------------------------------|-------|
| <b>Core Courses</b>                    |                                       |       |
| Complete all of the following courses: |                                       |       |
| M 171<br>or M 181                      | Calculus I                            | 4     |
| M 172<br>or M 182                      | Calculus II                           | 4     |
| M 210                                  | Introduction to Mathematical Software | 3     |
| M 221                                  | Introduction to Linear Algebra        | 4     |
| M 273                                  | Multivariable Calculus                | 4     |
| M 300                                  | Undergraduate Mathematics Seminar     | 1     |
| M 307                                  | Introduction to Abstract Mathematics  | 3     |
| <b>Electives</b> <sup>1</sup>          |                                       |       |

Complete 18-23 credits (6-7 courses) of the following courses. 18-23  
At least three courses must be at the 400 level. See note below about the elective credit requirement.

|          |                                                                               |
|----------|-------------------------------------------------------------------------------|
| M 274    | Introduction to Differential Equations                                        |
| M 301    | Teaching Mathematics with Technology                                          |
| M 325    |                                                                               |
| M 326    | Number Theory                                                                 |
| M 361    | Discrete Optimization                                                         |
| M 362    | Linear Optimization                                                           |
| M 381    | Advanced Calculus                                                             |
| M 412    | Partial Differential Equations                                                |
| M 414    | Deterministic Models                                                          |
| M 429    | History of Mathematics <sup>2</sup>                                           |
| M 431    | Abstract Algebra I                                                            |
| M 432    | Abstract Algebra II                                                           |
| M 439    | Euclidean and NonEuclidean Geometry                                           |
| M 440    | Numerical Analysis                                                            |
| M 445    |                                                                               |
| M 461    | Data Science Analytics                                                        |
| M 462    | Theoretical Basics of Big Data Analytics and Real Time Computation Algorithms |
| M 472    | Introduction to Complex Analysis                                              |
| M 473    | Introduction to Real Analysis                                                 |
| M 485    | Graph Theory                                                                  |
| STAT 342 | Probability and Simulation                                                    |
| STAT 421 | Probability Theory                                                            |
| STAT 422 | Mathematical Statistics                                                       |
| STAT 452 | Statistical Methods II                                                        |

### Science Requirement<sup>3</sup>

Complete 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO\*), chemistry (CHMY), computer science (CSCI, except CSCI TR\*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX). 18

### Language/Computer Science Requirement<sup>4</sup>

Complete either the General Education Language Requirement or complete one of the following courses: 3

|          |                                       |
|----------|---------------------------------------|
| CSCI 150 | Introduction to Computer Science      |
| CSCI 151 | Interdisciplinary Computer Science I  |
| CSCI 152 | Interdisciplinary Computer Science II |

### Pure Mathematics Concentration

These courses count toward the mathematics electives requirement

Complete four of the following courses:

|       |                                  |
|-------|----------------------------------|
| M 381 | Advanced Calculus                |
| M 431 | Abstract Algebra I               |
| M 432 | Abstract Algebra II              |
| M 472 | Introduction to Complex Analysis |
| M 473 | Introduction to Real Analysis    |

**Total Hours** 62-67

<sup>1</sup> Students completing a second major need take only 18 credits. Students completing a minor in another subject need take only 20

credits. All other students must complete 23 credits and 7 courses. At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).

<sup>2</sup> M 429 is also an advanced college writing course. Most Mathematics majors use M 429 to meet the advanced college writing general education requirement.

<sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as CSCI TR\* may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

<sup>4</sup> Students completing a second major are exempt from this requirement.

| Code                                                                                                                                                                                                       | Title                          | Hours |

## Mathematics B.A. - Statistics and Data Science

This degree concentration differs from the BA in Mathematics without a concentration only in the Concentration Requirements.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Mathematics; Statistics Concentration

### Credit Requirements

The major specific credits are much lower for double-majors and for students completing a minor in another subject:

- 41 credits for students completing a second major, and
- 46 credits for students completing a minor.

### GPA requirement

- A cumulative GPA of 2.0 is required for all courses used to fulfill major requirements.
- In addition, a cumulative GPA of 2.0 is required for all mathematical sciences courses used to fulfill major requirements. (Mathematical sciences courses are those with a prefix of M or STAT.)

### Course Requirements

| STAT 452                                                                                               | Statistical Methods II                                                        |       |
| <b>Science Requirement <sup>3</sup></b>                                                                |                                                                               |       |

Complete 18 credits in at most 3 areas selected from astronomy (ASTR), biology (BIO\*), chemistry (CHMY), computer science (CSCI, except CSCI TR\*), economics (ECNS), forestry (FORS, WILD), geosciences (GEO), management information systems (BMIS), and physics (PHSX).

#### Language/Computer Science Requirement <sup>4</sup>

Complete either the General Education Language Requirement or complete one of the following courses:

|          |                                       |
|----------|---------------------------------------|
| CSCI 150 | Introduction to Computer Science      |
| CSCI 151 | Interdisciplinary Computer Science I  |
| CSCI 152 | Interdisciplinary Computer Science II |

#### Statistics and Data Science Concentration

These courses count toward the mathematics electives requirement

Complete four of the following courses: <sup>5</sup>

|          |                                                                               |
|----------|-------------------------------------------------------------------------------|
| M 461    | Data Science Analytics                                                        |
| M 462    | Theoretical Basics of Big Data Analytics and Real Time Computation Algorithms |
| STAT 342 | Probability and Simulation                                                    |
| STAT 421 | Probability Theory                                                            |
| STAT 422 | Mathematical Statistics                                                       |
| STAT 452 | Statistical Methods II                                                        |

**Total Hours**

**62-67**

<sup>1</sup> Students completing a second major need take only 18 credits. Students completing a minor in another subject need take only 20 credits. All other students must complete 23 credits and 7 courses. At least 4 of the courses in this category must be taken at UM-Missoula (only 3 if M 307 is taken at UM-Missoula).

<sup>2</sup> M 429 is also an advanced college writing course. Most Mathematics majors use M 429 to meet the advanced college writing general education requirement.

<sup>3</sup> Students completing a minor in another subject or a second major are exempt from this requirement. Transfer courses listed on the transcript as CSCI TR\* may include course work in other areas such as Computer Applications (CAPP) and therefore do not count towards this requirement unless a student successfully petitions the Department of Mathematical Sciences.

<sup>4</sup> Students completing a second major are exempt from this requirement.

<sup>5</sup> Additional mathematics and statistics courses chosen with advisor.

**Code** **Title** **Hours**

#### Elective Computer Labs and Independent Study Courses

Computer labs and independent study courses from the following list are optional; if taken (0-2 credits), they count toward the total number of credits required for the Mathematics Elective requirement.

|          |                                |
|----------|--------------------------------|
| M 363    | Linear Optimization Laboratory |
| M 392    | Independent Study              |
| M 492    | Independent Study              |
| STAT 457 | Computer Data Analysis I       |
| STAT 458 | Computer Data Analysis II      |

18

## Mathematics Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the teaching track of a major or minor in that content area.
  - Secondary Education Licensure Program (<http://www.coehs.umd.edu/departments/currinst/undergradprograms/seced/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- Individuals completing the this minor must also complete the education/teaching concentration of a major in another teaching content area.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Mathematics Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Minor - Mathematics

- Notice to Transfer Students: Mathematical Sciences courses that are not equivalent to courses taught at UM-Missoula can often be counted toward a Minor in Mathematics. This is determined on an individual basis; please contact the Department of Mathematical Sciences for details.

| M 172                                                                                                                                                                                                                                                                                                          | Calculus II      |           |
| M 182                                                                                                                                                                                                                                                                                                          |                  |           |
| <b>Elective Courses</b>                                                                                                                                                                                                                                                                                        |                  |           |
| Take 19 credits in M or STAT courses offered at UM-Missoula. M courses must be numbered M 115 or higher (excluding M 118). Courses must include at least three courses chosen from M 274 and 3- or 4-credit courses at the 300 level or above. At least two of the three courses must be taken at UM-Missoula. |                  | 19        |
| <b>Total Hours</b>                                                                                                                                                                                                                                                                                             |                  | <b>23</b> |

<sup>1</sup> M 172 or M 182 are recommended since they are prerequisites for many upper-division mathematics courses.

## Physics & Astronomy

Physics is considered to be the most fundamental of all disciplines in the natural sciences. In physics we try to describe and understand the myriad physical phenomena ranging from subatomic to cosmological scales by quantifying the relationships among different physical quantities. Not only does physics have its own merit as a challenging but exciting scientific endeavor, it provides the basis for understanding underlying processes in astronomy, biology, chemistry, geology, computer science, engineering, and even in behavioral sciences. Applications of physics are virtually unlimited: computers, communications, energy production, medical technology, and space flight, to name just a few. The Department of Physics and Astronomy offers a range of physics courses from introductory to advanced undergraduate level in both experimental and theoretical physics with computational methods in mind. In addition, we offer introductory to advanced astronomy and astrophysics courses in which astronomical applications of physics are emphasized. These courses deal with the Universe, from the solar system to clusters of galaxies, both theoretically and observationally. The Department of Physics and Astronomy offers the Bachelor of Arts degree with a major in Physics. Graduates with this degree are prepared for further study in physics or related fields at the masters or Ph.D. level, as well as a wide variety of technical positions in industry.

In addition, the department offers five concentrations that combine a solid background in the study of physics with in-depth study in other fields. These concentrations allow for specialization in related fields and provide appropriate background for certain employment opportunities and for continued graduate or professional study.

- Astronomy Minor (p. 377)
- Physics Minor (p. 378)
- Physics Education Minor (p. 378)

## Physics B.A.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Physics B.A. - Astronomy

The astronomy concentration provides a thorough study of astronomy and astrophysics as well as a solid background in physics and mathematics. Graduates from this program have gone on to graduate programs in astronomy and astrophysics while others have found career opportunities at national astronomical observatories.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## BACHELOR OF ARTS - PHYSICS; ASTRONOMY CONCENTRATION

### Course Requirements

| Code                                             | Title                                                   | Hours |
|--------------------------------------------------|---------------------------------------------------------|-------|
| Lower-Division Physics                           |                                                         |       |
| Complete one of the following Physics sequences: |                                                         | 10    |
| Algebra- and Trigonometry-based Physics:         |                                                         |       |
| PHSX 205N<br>& PHSX 206N                         | College Physics I<br>and College Physics I Laboratory   |       |

Last updated Autumn 2024

## Physics B.A. - Computational Physics

The computational physics concentration provides a thorough study of computer science and computational physics as well as a solid background in physics and mathematics. Graduates from this program have gone on to graduate programs in physics and computer science while others have found career opportunities in technical fields.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## BACHELOR OF ARTS - PHYSICS; COMPUTATIONAL PHYSICS CONCENTRATION

### Course Requirements

| Code                                             | Title                                                                               | Hours |
|--------------------------------------------------|-------------------------------------------------------------------------------------|-------|
| <b>Lower-Division Physics</b>                    |                                                                                     |       |
| Complete one of the following Physics sequences: |                                                                                     | 10    |
| Algebra- and Trigonometry-based Physics:         |                                                                                     |       |

Last updated Autumn 2024

**Physics B.A. - Engineering Physics**  
The Engineering Physics concentration provides a thorough study of physics and a solid background in engineering and mathematics.

Graduates from this program can go on to graduate programs in physics and engineering or seek career opportunities in technical fields.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## BACHELOR OF ARTS - PHYSICS; ENGINEERING PHYSICS CONCENTRATION

Last updated Autumn 2024

<sup>1</sup> Physics elective  
<sup>2</sup> PHSX 330 offered alternate years. Take as a junior or senior.

## Physics B.A. - Physics Education

- This concentration contains additional course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this concentration, you need to contact the Teaching and Learning Department. Approvals for this concentration must come from the Teaching and Learning Department.
- This major and concentration do not qualify as a single-field endorsement. The demand for teaching in this field is limited. The required second endorsement (either a teaching major or a teaching minor) should be in a field in high demand.

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana

General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Physics; Physics Education Concentration

### Course Requirements

| Code                                             | Title                                                                            | Hours |
|--------------------------------------------------|----------------------------------------------------------------------------------|-------|
| <b>Lower-Division Physics</b>                    |                                                                                  |       |
| Complete one of the following Physics sequences: |                                                                                  | 10    |
| Algebra- and Trigonometry-based Physics:         |                                                                                  |       |

or PHSX 446 Thermodynamics & Statistical Mechanics  
or PHSX 462 Quantum Mechanics II

### Math Requirements<sup>2</sup>

Complete all of the following courses:

|       |                                |   |
|-------|--------------------------------|---|
| M 171 | Calculus I                     | 4 |
| M 172 | Calculus II                    | 4 |
| M 221 | Introduction to Linear Algebra | 4 |
| M 273 | Multivariable Calculus         | 4 |

### Computer Science Requirements

Complete one of the following courses:

|          |                                      |   |
|----------|--------------------------------------|---|
| CSCI 150 | Introduction to Computer Science     | 3 |
| CSCI 151 | Interdisciplinary Computer Science I |   |
| PHSX 333 | Computational Physics                |   |

### Writing in the Disciplines Requirement<sup>3</sup>

Complete the following course:

|          |                       |   |
|----------|-----------------------|---|
| PHSX 330 | Communicating Physics | 3 |
|----------|-----------------------|---|

### Physics Education Concentration Additional Science Requirements

Complete all of the following courses:

|           |                                         |   |
|-----------|-----------------------------------------|---|
| ASTR 131N | Planetary Astronomy                     | 3 |
| ASTR 132N | Stars, Galaxies, and the Universe       | 3 |
| CHMY 121N | Introduction to General Chemistry       | 4 |
| CHMY 485  | Laboratory Safety                       | 1 |
| GEO 101N  | Introduction to Physical Geology        | 3 |
|           | or EARTH 101N Earth Systems Science     |   |
| GEO 102N  | Introduction to Physical Geology Lab    | 1 |
|           | or EARTH 103N Earth Systems Science Lab |   |

Complete one of the following courses:

|                                        |                                         |     |
|----------------------------------------|-----------------------------------------|-----|
| BIOB 160                               | Principles of Living Systems            | 3-4 |
| BIOB 170N                              | Principles of Biological Diversity      |     |
| BIOE 172N                              | Introductory Ecology                    |     |
| BIOO 105N                              | Introduction to Botany                  |     |
| Complete one of the following courses: |                                         | 3   |
| GEO 105N                               | Oceanography                            |     |
| ENSC 105N                              | Environmental Science                   |     |
| ENST 472                               | General Science: Conservation Education |     |

### Teaching Science Methods Course

Complete the following course:

|         |                                                |   |
|---------|------------------------------------------------|---|
| EDU 497 | Teaching and Assessing (Methods: 5-12 Science) | 3 |
|---------|------------------------------------------------|---|

**Total Hours** **92-93**

<sup>1</sup> Other PHSX courses may be substituted with adviser approval.

<sup>2</sup> M 412 and M 418 are also recommended.

<sup>3</sup> Students may substitute another advanced writing course with the approval of the department chair.

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Physics B.A. - Teaching Broadfield Science

Individuals interested in teaching in K-12 schools must complete a degree in the content area they want to teach plus the Teacher Education Program through the Department of Teaching and Learning. Individuals must complete the teaching track within that degree program, which may contain different course requirements than the non-teaching track since the sequence of courses is designed to meet state standards. Upon completion of the degree program with the teaching track and the secondary licensure program, one will be eligible for a standard Montana teaching license in this content area.

- Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/>)
- Licensure Degree Requirements (p. 151)

## General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Bachelor of Arts - Physics; Broadfield Teaching Science Concentration

- Students must be formally admitted to the Teacher Education Program and complete all of the professional education licensure requirements. See the Department of Teaching and Learning in the College of Education for more information.
- A major GPA of 2.75 is required to be eligible for student teaching.

## Course Requirements

| <b>Physics Elective</b>                              |                                          |       |
| Complete 1 additional upper-division Physics course. |                                          | 3     |

### Math Requirements

|                                        |                                        |   |
|----------------------------------------|----------------------------------------|---|
| Complete all of the following courses: |                                        |   |
| M 171                                  | Calculus I                             | 4 |
| M 172                                  | Calculus II                            | 4 |
| M 273                                  | Multivariable Calculus                 | 4 |
| M 274                                  | Introduction to Differential Equations | 4 |

### Statistics Requirement

|                                        |                            |     |
|----------------------------------------|----------------------------|-----|
| Complete one of the following courses: |                            | 3-4 |
| STAT 216                               | Introduction to Statistics |     |
| STAT 342                               | Probability and Simulation |     |

### Astronomy Requirements

|                                        |                         |   |
|----------------------------------------|-------------------------|---|
| Complete all of the following courses: |                         |   |
| ASTR 131N                              | Planetary Astronomy     | 3 |
| ASTR 134N                              | Planetary Astronomy Lab | 1 |

### Geology Requirements

|                                        |                                      |   |
|----------------------------------------|--------------------------------------|---|
| Complete all of the following courses: |                                      |   |
| GEO 101N                               | Introduction to Physical Geology     | 3 |
| GEO 102N                               | Introduction to Physical Geology Lab | 1 |
| ASTR 351                               | Planetary and Exoplanet Science      | 3 |
| or GEO 105N Oceanography               |                                      |   |

### Biology Requirements

|                                        |                                  |   |
|----------------------------------------|----------------------------------|---|
| Complete all of the following courses: |                                  |   |
| BIOB 160                               | Principles of Living Systems     | 3 |
| BIOB 161N                              | Principles of Living Systems Lab | 1 |
| BIOB 260                               | Cellular and Molecular Biology   | 4 |
| BIOB 272                               | Genetics and Evolution           | 4 |

### Chemistry Requirements

|                                        |                          |   |
|----------------------------------------|--------------------------|---|
| Complete all of the following courses: |                          |   |
| CHMY 141N                              | College Chemistry I      | 4 |
| CHMY 142N                              | College Chemistry I Lab  | 1 |
| CHMY 143N                              | College Chemistry II     | 4 |
| CHMY 144N                              | College Chemistry II Lab | 1 |
| CHMY 485                               | Laboratory Safety        | 1 |

### Advanced Writing Requirement

|                                |                       |   |
|--------------------------------|-----------------------|---|
| Complete the following course: |                       |   |
| PHSX 330                       | Communicating Physics | 3 |

### Teaching Methods Requirement

|                                |                                                |   |
|--------------------------------|------------------------------------------------|---|
| Complete the following course: |                                                |   |
| EDU 497                        | Teaching and Assessing (Methods: 5-12 Science) | 3 |

**Total Hours** **83-84**

## Secondary Teaching Licensure

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

## Four Year Plan

| Course                        | Title                                                                               | Hours     |
|-------------------------------|-------------------------------------------------------------------------------------|-----------|
| <b>Freshman</b>               |                                                                                     |           |
| <b>Autumn</b>                 |                                                                                     |           |
| PHSX 215N<br>& PHSX 216N      | Fundamentals of Physics with Calculus I<br>and Physics Laboratory I with Calculus   | 5         |
| M 171                         | Calculus I                                                                          | 4         |
| PHSX 101                      | The Physics Experience                                                              | 1         |
| ASTR 131N<br>& ASTR 134N      | Planetary Astronomy<br>and Planetary Astronomy Lab                                  | 4         |
| HUSC 194                      | Seminar/Workshop                                                                    | 1         |
| <b>Hours</b>                  |                                                                                     | <b>15</b> |
| <b>Spring</b>                 |                                                                                     |           |
| PHSX 217N<br>& PHSX 218N      | Fundamentals of Physics with Calculus II<br>and Physics Laboratory II with Calculus | 5         |
| M 172                         | Calculus II                                                                         | 4         |
| WRIT 101                      | College Writing I                                                                   | 4         |
| General Education Requirement |                                                                                     | 3         |
| <b>Hours</b>                  |                                                                                     | <b>16</b> |

## Astronomy Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - Astronomy

- The mathematics prerequisites for courses in the Minor in Astronomy include M 171, M 172, and M 273

### Course Requirements

## Physics Education Minor

- This minor contains course requirements designed to meet state standards. Those interested in teaching in K-12 schools must complete the education/teaching concentration of a major in a teaching content area plus the Teacher Education Program through the Department of Teaching and Learning. Additional teaching areas can be added through completion of the education/teaching concentration of a major or education/teaching minor in that content area.
  - Secondary Education Licensure Program (<https://www.umt.edu/education/departments/teaching-and-learning/tep/default.php>)
  - Licensure Degree Requirements (p. 151)
- To complete this minor, you need to contact the Teaching and Learning Department. Approvals for this track must come from the Teaching and Learning Department.
- Individuals completing this minor must also complete the education/teaching concentration of a major in another teaching content area.

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Minor - Physics Education

- The mathematics prerequisites for courses in the Minor in Physics Education include M 171, M 172, M 273, and M 221.

### Course Requirements

| Code                                             | Title | Hours |
|--------------------------------------------------|-------|-------|
| <b>Required Lower-Division Courses</b>           |       |       |
| Complete one of the following Physics sequences: |       | 10    |
| Algebra- and Trigonometry-based Physics:         |       |       |

|                                                |                                                                                  |  |
|------------------------------------------------|----------------------------------------------------------------------------------|--|
| PHSX 205N & PHSX 206N                          | College Physics I and College Physics I Laboratory                               |  |
| PHSX 207N & PHSX 208N                          | College Physics II and College Physics II Laboratory                             |  |
| Calculus-based Physics (strongly recommended): |                                                                                  |  |
| PHSX 215N & PHSX 216N                          | Fundamentals of Physics with Calculus I and Physics Laboratory I with Calculus   |  |
| PHSX 217N & PHSX 218N                          | Fundamentals of Physics with Calculus II and Physics Laboratory II with Calculus |  |

**Upper-Division Core Courses**

Complete all of the following courses:

|          |                              |   |
|----------|------------------------------|---|
| PHSX 301 | Intro to Theoretical Physics | 3 |
| PHSX 320 | Classical Mechanics          | 3 |
| PHSX 330 | Communicating Physics        | 3 |
| PHSX 343 | Modern Physics               | 3 |

**Mathematics and Statistics**

Complete all of the following courses:

|                         |                                                          |     |
|-------------------------|----------------------------------------------------------|-----|
| M 171                   | Calculus I                                               | 4   |
| M 172                   | Calculus II                                              | 4   |
| STAT 216<br>or STAT 342 | Introduction to Statistics<br>Probability and Simulation | 3-4 |
| M 273                   | Multivariable Calculus                                   | 4   |
| M 274                   | Introduction to Differential Equations                   | 4   |

**Additional Science Courses**

Complete all of the following:

|                                                          |                                                                                                                      |   |
|----------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------|---|
| ASTR 131N<br>or ASTR 132N                                | Planetary Astronomy<br>Stars, Galaxies, and the Universe                                                             | 3 |
| BIOB 160<br>or BIOB 170N<br>or BIOE 172N<br>or BIOO 105N | Principles of Living Systems<br>Principles of Biological Diversity<br>Introductory Ecology<br>Introduction to Botany | 3 |
| CHMY 121N                                                | Introduction to General Chemistry                                                                                    | 4 |
| CHMY 485                                                 | Laboratory Safety                                                                                                    | 1 |
| CSCI 150<br>or CSCI 151                                  | Introduction to Computer Science<br>Interdisciplinary Computer Science I                                             | 3 |

**Physics Education Requirement**

Complete the following course

|         |                                                |   |
|---------|------------------------------------------------|---|
| EDU 497 | Teaching and Assessing (Methods: 5-12 Science) | 3 |
|---------|------------------------------------------------|---|

**Total Hours** 58-59**Secondary Teaching Licensure**

For endorsement to teach this subject, a student also must gain admission to the Teacher Education Program and meet all the requirements for secondary teaching licensure (p. 151). For more information, see the Teaching and Learning Department webpage (<https://www.umt.edu/education/departments/currinst/default.php>).

**Missoula College**

Thomas Gallagher, Dean

**Mission**

The mission of Missoula College (<http://mc.umt.edu/>) is to create a comprehensive, accessible, student-centered learning environment that fosters individual growth, facilitates workforce development, and provides a foundation for advanced academic achievement.

**Vision of Excellence**

We envision a future where Missoula College is recognized as a model of excellence for two-year education in Montana, empowering students to succeed in higher education and continuing to serve the needs of the community and workforce. We elevate the awareness of two-year education as a result of our high retention, graduation and placement rates. Through this demonstration of excellence, more students will enroll in two-year colleges, more businesses and industries will partner with two-year schools, and the state will receive the benefits of a more educated citizenry/workforce.

The Missoula College offers programs and services on four campuses:

1. the River Campus at 1205 East Broadway,
2. the West Campus at 2795 37th Avenue,
3. the Mountain Campus at 32 Campus Drive, and
4. the Bitterroot Campus in Hamilton.

The student support offices are located at the River Campus. All Business Technology programs, Health Professions programs, as well as a branch of the Mansfield Library, and a dining room are located on the River Campus. All Industrial Technology programs are located on the West Campus.

Students may attend courses at four campus sites and online. Courses are scheduled at a variety of times between 7 a.m. and 10 p.m., Monday through Saturday. The Missoula College Dean's Office, department chairs, and/or program directors may be contacted for specific program and scheduling information.

**Bachelor of Applied Science Degree Program**

A Bachelor of Applied Science (B.A.S.) degree is offered by the University of Montana - Missoula in collaboration with the Missoula College. Students interested in the B.A.S. should contact the College of Humanities and Science Academic Advising office (<https://www.umt.edu/humanities-sciences/advising-center/default.php>). This degree program is available for students who have completed an Associate of Applied Science degree from an accredited institution and who wish to continue toward completing a baccalaureate degree. For more information, see the Bachelor of Applied Science (p. 208) section of the catalog.

**Associate of Applied Science and Certificate of Applied Science Programs**

The Associate of Applied Science (A.A.S.) and Certificate of Applied Science (C.A.S.) programs are designed to prepare an individual for employment in a specific career or career pathway. In some instances, particularly in Health Professions, the degree or certificate is a prerequisite for taking a licensing examination. The A.A.S. degree is not typically considered a transfer degree, although opportunities do exist at the University of Montana and some other baccalaureate degree-granting

institutions for continuing in programs such as the University's Bachelor of Applied Science degree program.

The College's Surgical Technology and Respiratory Care programs are reviewed by their respective Joint Review Committees and accredited by the Commission on Accreditation of Allied Health Education Programs. The Food Service Management program is accredited by the American Culinary Federation Educational Institute Accrediting Commission, the Paralegal Studies program is approved by the American Bar Association, and the Nursing programs are approved by the Montana Board of Nursing and accredited by Accreditation Commission for Education in Nursing (ACEN). The Pharmacy Technology Program is accredited by American Society of Health System Pharmacists/Accreditation Council for Pharmacy Education (ASHP/ACPE).

## Associate of Arts and Associate of Science Degree Programs

The Associate of Arts and Associate of Science degrees are general education transfer degrees and do not officially include a major or minor courses of study, but students may focus on specific areas of emphasis in order to satisfy the degree requirements. To receive an Associate of Arts (AA) or Associate of Science (AS) degree, students must successfully complete all the general education requirements as described by Montana Board of Regents policy 301.10 Appendix 1. The minimum grade point average for the 60 credits required for the A.A. or A.S. is 2.0. At least 30 of the 60 required credits must be earned at UM, through either Missoula College or University of Montana-Missoula.

## Credit Applicable Toward Associate of Arts and Baccalaureate Degrees

Students may count up to 15 technical course credits towards the A.A., A.S., and baccalaureate degrees (except the B.A.S.; see the B.A.S. (p. 208) section of the catalog for more information). UP to 20 technical course credits may count if the student has previously earned an A.A.S. degree. Refer to the section on Technical Courses and Credit Maximums (p. 36) in this catalog for additional information. Students should visit with their advisor for more information.

## Academic Support Services

Services designed to increase the success of students enrolled at Missoula College are available at the College. Such services include the Academic Advising Center, tutoring and computer-based academic learning tools in the Academic Support Center, study skills workshops, basic skills developmental courses, access to the Office for Disability Equity (ODE), academic and financial aid reinstatement and follow-up assistance, individual student retention services, and other learning support activities.

  - Welding Technology C.A.S. (p. 426)

## Applied Arts and Sciences

The Department of Applied Arts and Sciences (<http://mc.umt.edu/aasc/>) provides instruction in five disciplines:

- communication,
- mathematics,
- behavioral science and psychology,

- science, and
- writing.

Many courses from these disciplines count towards the general education requirements for the Associate of Arts (AA) and Associate of Science (AS) degrees and frequently are programmatic requirements for Associate of Applied Science (AAS) degrees and certificate programs.

- Addiction Studies C.T.S. (p. 381)
- Associate of Arts (A.A.) (p. 381)
- Associate of Arts (A.A.) - Behavioral & Social Sciences (p. 383)
- Associate of Arts (A.A.) - Communication Studies (p. 383)
- Associate of Arts (A.A.) - Psychology (p. 384)
- Associate of Arts (A.A.) - Speech Language Pathology Assistant (p. 385)
- Associate of Science (A.S.) (p. 386)
- Associate of Science (A.S.) - Business (p. 388)
- Associate of Science (A.S.) - Natural Sciences (p. 390)
- Associate of Science (A.S.) - Public Health (p. 392)
- General Studies Certificate (p. 394)

## Addiction Studies C.T.S.

- The Certificate in Addiction Studies is a set of courses that meet the required 330 hours of addiction education with a requirement of a completed accompanying degree (associate, baccalaureate, or graduate degree in specific disciplines, i.e. psychology, addictions, sociology, social work or similar emphasis areas.)
- Students may only apply for state licensing exam after completing 1000 hours of supervised internships following degree completion.
- The Certificate of Addiction Studies is designed to benefit all qualifying degrees as defined by the MCA 37-35-202.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umt.edu/online-programs/definitions/>). ## Associate of Arts (A.A.)

The Department of Applied Arts and Sciences offers the Associate of Arts degree. The Associate of Arts degree is considered a general education transfer degree and does not include a major or minor course of study. To receive an Associate of Arts degree, students must:

- successfully complete all lower-division general education requirements with the exception of the language requirement with a letter grade of C- or better;
- earn a minimum of 60 credits, at least 30 of which must be from the University of Montana-Missoula;
- and maintain an institutional cumulative GPA of 2.00.

Students may begin coursework in the autumn, spring, or summer semesters. Courses numbered below 100 do not count toward the 60 credit requirement or general education course requirements, but do fulfill financial aid credit load requirements.

Students planning on completing a baccalaureate degree are encouraged to select specific general education courses and electives that meet the requirements for that future major. Students work with their advisor to develop an AA degree plan to best prepare them to transition to a four-year degree.

## Baccalaureate Tracks and Emphasis Areas within the Associate of Arts Degree

Although the AA degree does not include a major or minor courses of study, students may elect to choose coursework that is part of a specific area of interest. Baccalaureate tracks are specific plans of study designed to help students earn an AA degree while simultaneously working towards baccalaureate degree requirements. Missoula College has worked with individual UM departments to forge agreements to ensure that students completing baccalaureate tracks will enter into the major with numerous major requirements already fulfilled.

Baccalaureate tracks within the Associate of Arts degree include:

- Business
- Chemical and Addiction Studies
- Communication Science and Disorders
- Early Childhood Education
- Elementary Education
- Environmental Studies
- Integrative Physiology
- Parks, Tourism, and Recreation Management
- Sociology and Criminology (for individuals attending the Montana Law Enforcement Academy, a specialized Associate of Arts degree is offered through a collaboration among Missoula College UM, the University of Montana Department Of Sociology, and the Montana Law Enforcement Academy in Helena, MT.)
- Psychology
- Sociology
- Women, Gender, and Sexuality Studies

## Concentrations within the Associate of Arts Degree

Similar to pathways or areas of emphasis within the AA degree, concentrations are meant to help students focus on a specific area of interest. Unlike areas of emphasis, these concentrations are recorded on the student’s transcript as a concentration of the AA degree itself. Concentrations of the Associate of Arts degree include:

- Behavioral & Social Sciences
- Communication Studies
- Professional Communication
- Psychology
- Speech Language Pathology Assistant

The goal of these concentrations is to provide students with an opportunity to receive an AA degree with a focus on an area that is of increasing demand to employers.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course

requirements listed below may not be consistently offered via online delivery.

## Associate of Arts - General A.A.

The Associate of Arts degree has the following general requirements. Students must:

- Complete all of the university’s general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

## Two Year Plan

## Associate of Arts (A.A.) - Behavioral & Social Sciences

### General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Online Program Option

This program may be completed in an online format (<https://catalog.umn.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umn.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

### Associate of Arts - General A.A.; Behavioral and Social Sciences Concentration

The Associate of Arts degree has the following general requirements. Students must:

- Complete all of the university's general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

To receive to Associate of Arts with a concentration in Behavioral and Social Sciences, a student must complete the requirements specific to the concentration listed below.

### Course Requirements

Some courses required for the Associate of Arts with a concentration in Behavioral and Social Sciences satisfy multiple general education perspectives. Visit with your advisor for more information.

<sup>1</sup> Offered online in the Fall only

<sup>2</sup> Previously CSD 265

<sup>3</sup> PSYX 120 not required but offered for students who need to be full time.

*Last Updated Fall 2025*

## Associate of Science (A.S.)

The Department of Applied Arts and Sciences offers the Associate of Science degree. The Associate of Science degree is considered a general education transfer degree and does not include a major or minor course of study. To receive an Associate of Science degree, students must:

- successfully complete all lower-division general education requirements with the exception of the language requirement with a letter grade of C- or better;
- earn a minimum of 60 credits, at least 30 of which must be from the University of Montana-Missoula;
- maintain an institutional cumulative GPA of 2.00.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements.

Students may begin coursework in the autumn, spring, or summer semesters. Courses numbered below 100 do not count toward the 60 credit requirement or general education course requirements, but do fulfill financial aid credit load requirements.

Students planning on completing a baccalaureate degree are encouraged to select specific general education courses and electives that meet the requirements for that future major. Students work with their advisor to develop an AS degree plan to best prepare them to transition to a four-year degree.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umont.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umont.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Associate of Science - General A.S.

The Associate of Science (A.S.) degree has the following general requirements. Students must:

- Complete all of the university's general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements. Those courses offered at Missoula College are listed below.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

### Additional STEM Courses for the A.S. Degree

## Associate of Science (A.S.) - Business

### General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Online Program Option

This program may be completed in an online format (<https://catalog.umn.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umn.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course

requirements listed below may not be consistently offered via online delivery.

## Associate of Science - General A.S.: Business Concentration

The Associate of Science (A.S.) degree has the following general requirements. Students must:

- Complete all of the university's general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements. Those courses offered at Missoula College are listed below.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

In addition, to receive to Associate of Science with a concentration in Business, a student must complete the concentration specific requirements listed below.

### Course Requirements

Some courses required for the Associate of Science with a concentration in Business satisfy multiple GER categories; visit with your advisor for more information.

# Associate of Science (A.S.) - Natural Sciences

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Associate of Science - General A.S.: Natural Science Concentration

The Associate of Science (A.S.) degree has the following general requirements. Students must:

- Complete all of the university's general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements. Those courses offered at Missoula College are listed below.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

To receive to Associate of Arts with a concentration in Natural Sciences, a student must complete the requirements specific to the concentration listed below.

## Course Requirements

Some courses required for the Associate of Arts with a concentration in Natural Sciences satisfy multiple general education perspectives. Visit with your advisor for more information.

Students must complete one of the following advising tracks. These are advising tracks only and not official programs as recognized by the University of Montana (UM) or the Montana University System. Track information will not appear on a UM transcript, diploma, university lists, student data system, or university publication.

### Natural Sciences Exploratory Track

## Associate of Science (A.S.) - Public Health

The Associate of Science degree with a concentration in Public Health is designed to introduce the student to Public Health sciences while providing a transfer pathway toward the B.S. in Public Health. To receive an Associate of Science degree with a Concentration in Public Health, students must:

- Complete all lower-division general education requirements with a letter grade of C- or better;

- Earn a minimum of 60 credits, at least 30 of which must be from the University of Montana;
- Maintain an institutional cumulative GPA of 2.00 for all University of Montana courses taken for a traditional letter grade.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements.
- Complete 9 credits of transferable Public Health coursework.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Science - General A.S.; Public Health Concentration

The Associate of Science (A.S.) degree has the following general requirements. Students must:

- Complete all of the university's general education requirements (p. 39) with the exception of the language requirement and the advanced writing requirement.
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Complete a minimum of 60 credits.
- Earn a minimum cumulative institutional GPA of 2.0.
- Complete at least 30 of the total 60 degree credits at Missoula College or UM-Missoula.
- Complete 9 credits of transferable coursework in the areas of Science, Technology, Engineering, and Mathematics (STEM) beyond those taken as general education requirements. Those courses offered at Missoula College are listed below.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

To receive to Associate of Arts with a concentration in Public Health, a student must complete the requirements specific to the concentration listed below.

## Course Requirements

**Note:** Some courses required for the Associate of Science with a concentration in Business satisfy multiple Perspectives or GER Categories; visit with your advisor for more information.

# General Studies Certificate

In accordance with the mission of the University of Montana-Missoula, the objectives of general education coursework are to develop competent and humane individuals who are informed, ethical, literate, and engaged citizens of local and global communities. Students should become acquainted with issues facing contemporary society, participate in the creative arts, develop an understanding of science and technology, cultivate an appreciation of the humanities, and examine the history of different American and global cultures. Upon completion of the general education requirements students should be able to articulate ideas orally and in writing, understand and critically evaluate tangible and abstract concepts, and employ mathematical and other related skills appropriate to a technologically focused society. These foundational skills are important for students continuing on in both liberal arts and professional programs of study.

The Certificate of General Studies requires completion of University of Montana’s lower-division general education requirements that reflect the Montana University System’s General Education Core. Students may use the certificate to demonstrate completion of lower-division general education requirements when transferring within the MUS or as a milestone to earning an Associate of Arts or Associate of Science degree a Missoula College, University of Montana.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Certificate of Applied Science - General Studies

To receive the Certificate of General Studies, students must:

- Complete the University of Montana lower-division general education requirements (p. 39) (GERs) with the exception of the language requirement that also fulfill the general education requirements outlined by the Montana University System (the MUS Core).
  - All courses taken to satisfy general education requirements must be taken for a traditional letter grade and must be passed with a grade of C- or better.
- Earn a minimum of 30 credits,
- Have a minimum cumulative institutional GPA of 2.0.
- At least 16 of the total 30 degree credits must be earned from the University of Montana-Missoula.

Missoula College students are limited to enrolling in lower-division (100- and 200-level) courses only.

Students awarded an Associate of Arts or an Associate of Science degree have been granted an exception to the language requirement. Missoula College students who continue to Mountain Campus without receiving either of these degrees must complete the language requirement unless their declared four-year major has been granted an exception.

## One Year Plan

## Business & Technology

The Business and Technology department of Missoula College collaborates with business and industry to prepare graduates to compete in and contribute to a dynamic global society. The department attracts and retains skilled faculty with the professional experience and theoretical background to utilize diverse instruction which reflects current and emerging business practices. Faculty actively engage students in the learning process by integrating experiential technical education and empowering students to adapt to an ever-changing world.

Students may choose from six Associate of Applied Science degree programs and four Certificate of Applied Science programs. Degree programs include Accounting Technology with an optional concentration in Computer Support; Administrative Management with an optional concentration in Social Media Management; Food Service Management; Hospitality Management; Medical Information Technology with concentrations in Health Information Coding and Medical Administrative Assisting; Paralegal Studies; and Management with concentrations in Entrepreneurship and Sales and Marketing. Certificate of Applied Science programs include Business Media Design, Culinary Arts, Customer Relations, Hospitality Management, Medical Reception, and Sales and Marketing. Certificate of Technical Skills programs include Medical Claims Service Specialist.

## Business Management A.A.S. General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Online Program Option

This program may be completed in an online format (<https://catalog.umat.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umat.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Associate of Applied Science - Business Management Course Requirements

## Business Management C.A.S. General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Certificate of Applied Science - Business Management

## Business Media Design C.A.S.

People respond to emotion, engagement, and strong design. Students will learn to combine their unique talents in digital media, expressive arts, visual communications, and business toward a career in media design for businesses, education or nonprofit organizations. Students will :

- learn media history and business foundations;
- work extensively in Adobe Creative Suite;
- practice effective visual composition and messaging, and
- create interesting imagery and tell compelling stories.

Projects require story development, original and edited still photographs, and original and edited audio and visual work in both still and time-based mediums. Graduates are prepared for immediate skill application.

Successful completion of the C.A.S. meets prerequisites required for entry into the undergraduate programs for UM s Media Arts.

### Student Outcomes:

- Gain foundational knowledge in digital and information technologies, the nature of business enterprise, media history, typography, visual symbols, art, and artistic aesthetics and expression.
- Create, edit, and design audio/visual work in both the still image and time based mediums that focus on artistic expression and its relationship to digital technology.
- Create business documents and publications using common business applications while following ethical, research, and industry standard guiding principles and best practices.
- Assemble web assets needed to construct a complete website using current W3C web html document type standards, Search Engine Optimization strategies, and best web practices for file and domain management, container layout, navigation, and attractive web arrangement using principles and elements of design in an accessible web format.
- Plan, create, and organize artistically pleasing and effective print layouts based on the intended audience, organizational goals, and sound design through typography and imagery.
- Use photo editing software to create, edit and customize digital images in appropriate image size, resolution, and file type for the intended publication medium.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Certificate of Applied Science - Business Media Design

Last Updated Fall 2025

Cloud Computing C.T.S.

The Certificate of Technical Skills in Cloud Computing is designed to provide the foundations for students to understand, use, and provision cloud resources. As cloud computing becomes ever more prevalent in society these skills become ever more necessary. Students will gain competence in general networking and network infrastructure; installation, use, and administration of Operating Systems; Virtualization; fundamental security concepts; and cloud computing concepts, use, and provisioning.

This certificate is mostly a subset of the courses leading to an Associate of Applied Science in Information Technology (either concentration: Network Administration and Security or Programming and Application Development) as well as closely aligned with a BS in Management Information Systems. It is expected that students completing those degrees could complete the certificate with the addition of one or two courses.

General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Certificate of Technical Studies - Cloud Computing

- Only Mountain Campus College of Business students may register for BMIS 326, BMIS 471, and BMIS 472.

Computer Support C.A.S.

Computer Support is a 30-credit certificate program that prepares students for entry-level positions in the computing field. Required coursework includes programming, operating systems, networking, PC hardware, data modeling, and web technologies. Graduates pursue careers as help desk technicians, computer repair professionals, and

computer support specialists. Coursework for the certificate program also leads to the A.A.S. degree in Information Technology.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Certificate of Applied Science - Computer Support

## Culinary Arts C.A.S.

Students entering the Culinary Arts Certificate program or Food Service Management degree program prepare for careers in the hospitality industry. Students develop the skills needed to then seek employment in hotels, restaurants, resorts, casinos, clubs, catering, and corporate dining. Culinary careers encompass restaurant management, sales, product development, and entrepreneurship.

To meet the growing demand of the hospitality industry, two program options are available. Students may earn a Culinary Arts Certificate of Applied Science or a Food Service Management Associate of Applied Science degree.

The Culinary Arts certificate program is three semesters and provides an introduction to the field of culinary arts. Students prepare for an entry-level position in the expanding and challenging food service industry. This program incorporates comprehensive hands-on learning experiences complemented by supportive courses designed to prepare students for a wide range of career opportunities. This program also allows for a seamless transition into the Food Service Management degree.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Customer Relations C.A.S.

The Customer Relations Certificate prepares students to give customers what they expect, and then give them more! Increase your competitive advantage by creating a service culture, building and maintaining relationships, and developing customer service management systems.

Core topics include:

- Communication verbal/nonverbal, navigate challenges, effective conflict resolution, and listening skills
- Manage interpersonal relationships and build teams
- Public relations in organizations, reputation management and trust, and effective internal and external customer relationships.

Learn to turn common problems into service opportunities! Emphasis in business, computers, communications, and exceptional service skills, add to your value as a customer relations professional. Customer Relations can be earned independently, or combined with second-year curriculum toward an Associate of Applied Science degree in Administrative Management.

This certificate is offered fully online. Note: Second year A.A.S. curriculum is not available fully online. Graduates are prepared for work as customer service representatives and managers in a variety of industries.

Student Outcomes:

Upon completion of the program, students will:

- Formulate service policies for excellent customer service management.

- Apply service-level decisions to develop staff, enhance customer loyalty, and deal with challenges and conflicts while serving both internal and external customers.
- Demonstrate the workplace skills of effective communication (oral, written, nonverbal), problem-solving, managing interpersonal relationships and collaborating with teams, thinking critically, and leadership.
- Ethically use research and the tools of technology to create and organize business documents efficiently, accurately, and artfully designed.
- Understand, appreciate, and recognize opportunities of diverse populations and cultures.

Related Job Titles:

- Customer Service Representative
- Customer Care
- Call Centers
- Client Relations
- Client Services
- Guest Services
- Information Clerk
- Receptionist

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umd.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Cybersecurity C.T.S.

The Certificate of Technical Studies in Cybersecurity is meant to provide students with practical knowledge and skills in cybersecurity, including knowledge about basic networking, operating systems, network administration, multiple aspects of cybersecurity, and the policy and legal ramifications of cybersecurity. The curriculum is aligned to the National Security Agency (NSA) National Centers of Academic Excellence in Cyber Defense (CAE-CD) curriculum Knowledge Units.

This certificate is a subset of courses leading to the Associate of Applied Science in Information Technology and Cybersecurity.

Missoula College is designated as a National Center of Academic Excellence in Cyber Defense (CAE-CD). Students completing this certificate will gain a notation on their transcripts recognizing this achievement and its relation to the CAE-CD curriculum.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umn.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umn.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Food Service Entrepreneurship and Hospitality A.A.S.

The Food Service Entrepreneurship and Hospitality program culminates in an Associate of Applied Science Degree. This program combines theory, practical training, and industry experience to prepare students for entry-level and management positions in the diverse and dynamic hospitality industry. The degree program is designed to continue principles taught in the Culinary Arts certificate program. The spectrum of learning is expanded to include more in-depth professional studies thereby enhancing employment options. Accreditation by the American Culinary Federation ensures graduates' eligibility for certification as an ACF Certified Culinarian.

Technical subject areas include introduction to the industry, basic baking, patisserie, cost control, dining room service, Garde manger, nutritional cooking, fundamental cooking principles, short order cookery, a la carte stations, menu planning, supervised internship, and the recognized sanitation certificate awarded by the National Restaurant Association Educational Foundation.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Information Technology & Cybersecurity A.A.S.

The Information Technology & Cybersecurity A.A.S. provides students the foundational skills for supporting users and computing in a networked environment. In addition, the NSA and DHS have designated Missoula College as a National Center of Academic Excellence in Cyber-Defense (CAE-CD). This degree emphasizes cyber-security at every level of information technology from simple use, to computer support and system administration. Finally, as a member of AWS Educate, Missoula College also provides expertise in Cloud computing which is a

fundamental skill for the future as companies more and more move to virtual operations. This degree includes work in Operating Systems and System Administrations, Routing, Hardware Maintenance and Repair, and Scripting and Security.

The University of Montana is a Cisco Networking Academy, CompTIA Authorized Academy, and a member of the Microsoft Developers Network Academic Alliance. Opportunities exist for professional certification from Cisco (CCNA, CCENT, CCVA), Microsoft and Comp TIA (A+, Network+ and Security+).

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Legal Studies C.A.S.

The American Bar Association approves this program, and graduates can sit for the NALA CP® Exam (<https://nam04.safelinks.protection.outlook.com/?url=https%3A%2F%2Fna1.org%2Fcertification%2F&data=05%7C02%7CMichelle.Boller%40msu.umt.edu%7C8a6515888c1e48cea32708dc7112886b%7C68407ce503da49ffa0a724be0d37c9d%7C0%7C0%7C638509571626862186%7CUnknown%7CTWFPbGZsb3d8eyJWljoimC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikl1haWwiLCJ%7C0%7C%7C%7C&sdata=btyj6TEkRnuCsdSiEv48%2FOgsf7Kys8GrPI7oOuiVblc%3D&reserved=0>) to become certified paralegals upon graduation. The Legal Studies program prepares students for challenging and diverse careers in private law practices and the law-related areas of business, industry, and government. The goals of the Legal Studies program are to enable students, through theoretical and practical legal education, to understand the function of law, to work as legal assistants and paralegals in the effective delivery of legal services, and to enhance the legal

profession. This program is designed to equip students with skills to analyze legal issues and perform various activities, including drafting legal documents, interviewing clients, conducting legal research, and preparing cases for trial. Students utilize current technology through internet research and legal and general office software applications. Legal Studies students receive the necessary legal training to take advantage of new career opportunities in all sectors of the economy. Students are exposed to the principles of legal ethics and are cautioned regarding restrictions against the unauthorized practice of law by laypersons. Paralegals may not provide legal services directly to the public except as permitted by law.

Our American Bar Association approval requires that this certificate be earned along with an Associate of Arts or Associate of Science degree. This does not apply to students who already have baccalaureate degrees.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umat.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umat.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Sales and Marketing C.A.S.

Marketing is a vital function of any organization. The objective is to market and effectively sell products or services to sustain itself, whether for profit or not-for-profit. Opportunity is limitless, the job is never boring, you work with people, and jobs are in demand. You will train in professional sales, learn and practice exceptional customer service, and understand the psychology of selling to assist clients in meeting needs and solving problems. The curriculum also involves marketing activities, bookkeeping functions, and merchandising skills. Successful marketing and sales professionals are creative, self-motivated, optimistic, work well in team environments, are organized and detail-minded.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Health Professions

The Health Professions Department (<http://mc.umt.edu/health/>) at Missoula College prepares students to become competent, caring, ethical professionals and provides the skills and opportunities to jumpstart careers in healthcare.

The ideal Health Professions student is one who thinks critically and independently, who cares about others, whose behavior is guided by ethical values, and who is prepared for lifelong learning and leadership in their profession.

The programs listed in the "Programs" tab share many pre-requisite courses, employ an inter-professional model of learning, and all make use of clinical rotations. During these rotations, students work at healthcare

facility partners alongside licensed professionals with real patients to develop their skills and confidence.

Admission to many of these programs require a separate application and can be competitive, so it is important to meet with an advisor early and learn more about your chosen field of study and how to succeed.

## Programs

- Clinical Medical Assistant C.T.S. (p. 405)
- Medical Assisting A.A.S. (p. 406)
- Medical Claims Specialist C.T.S. (p. 407)
- Medical Information Technology A.A.S. - Health Information Coding Specialty (p. 408)
- Medical Information Technology A.A.S. - Medical Administrative Assisting (p. 409)
- Medical Reception C.A.S. (p. 410)
- Paramedicine A.A.S. (p. 411)
- Pre-Health Professions Studies C.T.S. (p. 412)
- Radiologic Technology A.A.S. (p. 413)
- Registered Nursing A.S. (p. 414)
- Respiratory Care A.A.S. (p. 416)
- Surgical Technology A.A.S. (p. 418)

## Clinical Medical Assistant C.T.S.

Medical Assistants are cross-trained with skills and knowledge in front office administrative, clinical, and limited laboratory procedures that are designed to assist healthcare practitioners in administering to the needs of patients. Physicians appreciate the versatility of medical assistants and their role as vital partners in ambulatory settings. The program is designed to prepare the student for an entry-level position in Clinical Medical Assisting that will prepare them for a Certified Clinical Medical Assisting credential. Students can choose to continue their education and complete the AAS in Medical Assisting that makes them eligible for the Registered Medical Assisting credential upon graduation.

Upon completion of the program students will learn:

- To assist with medical examinations, vital signs, administering medications and injections (under supervision), sterilizing instruments, and electrocardiography.
- Laboratory skills will include venipuncture (under supervision) and performing selected CLIA-waived laboratory tests.
- Become acquainted with the laws and regulations governing medicine in the ambulatory setting, as well as ethical issues being confronted in the health care arena.
- Perform computer-based tasks such as electronic health records and scheduling.
- Effectively communicate with provider and patients.
- Triage messages between patients and physicians.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic

Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umontana.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umontana.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

<sup>1</sup> Offered online in Fall/Spring/Summer.

<sup>2</sup> Second 8 weeks

<sup>3</sup> First 8 weeks

<sup>4</sup> Must be taken with AHMS 201. Requires 200 clinical hours at a local healthcare facility, can extend over Summer.

<sup>5</sup> 3 hours in-person once a week.

*Last updated Fall 2025*

## Medical Assisting A.A.S.

Students in Medical Assisting are cross-trained with skills and knowledge in front office administrative, clinical, and limited laboratory procedures that are designed to assist healthcare practitioners in administering to the needs of patients. Selected administrative skills include scheduling, medical office accounting systems, medical coding and billing, and electronic medical records. Some of the clinical skills the student will learn include assisting with medical examinations, vital signs, administering medications and injections (under supervision), sterilizing instruments and electrocardiography. Laboratory skills will include venipuncture (under supervision), and performing selected CLIA-waived laboratory tests. Additionally, Medical Assisting students will become acquainted with the laws and regulations governing medicine in the ambulatory setting, as well as ethical issues being confronted in the health care arena. The program is designed to prepare the student for an entry-level position in Medical Assisting.

Students may apply for admission by meeting with the program director. Prior to entry, the student must be able to show competency in computers. Each Spring students will have to provide documentation of vaccines, background check, etc. as posted on the program's web page. Because some classes are only offered in a specific semester, plus some courses have pre-requisites or co-requisites, meeting with the program director before each semester is necessary to avoid problems.

Students must earn a C or better in all courses in order to progress and complete the program. This includes being able to pass 100% of psychomotor and affective competencies required in laboratory/procedure courses. A course may be attempted a maximum of two times. At the end of the program the student will perform a 200-hour externship/practicum in an ambulatory facility, such as a clinic or doctor's office. The site must be approved by the Program Director. This provides the student with the opportunity to apply the knowledge and skills learned in a real world setting. Students successfully completing the program will be awarded an Associate of Applied Science degree.

Graduates are encouraged and prepared to take the Registered Medical Assisting exam upon graduation.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Applied Science - Medical Assisting

- A minimum grade of C in each Medical Assisting core course is required.
- Medical Assisting core courses must be completed in no more than 2 attempts.
- The student must show competence in computer applications to enter the Medical Assisting program.

## Medical Claims Specialist C.T.S.

Students are prepared academically and professionally for claim specialist positions in insurance organizations and healthcare facilities. In this fast-track program, students will learn foundational skills to:

- Understand medical terminology and human biology
- Understand medical benefit plans and the claims process to responsibly verify the accuracy and receipt of claims and the analysis of information for processing claims to promote accurate and prompt reimbursement
- Communicate professionally between peers, vendors, management, and customers in order to provide exceptional customer service
- Recommend claims action steps to promote accurate and prompt reimbursement
- Additionally graduates will work collaboratively with other team members to ensure the most positive service experience to both customers and vendors.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umat.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umat.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Medical Information Technology A.A.S. - Health Information Coding Specialty

Health information coders play a critical role in accurately identifying procedures and diagnoses to ensure accurate billing and reimbursement. Students are trained to:

- Understand anatomy, medical terminology, and disease processes necessary to determine correct codes and sequences.
- Analyze health records and to accurately abstract and code procedures and diagnoses utilizing legal and regulatory standards.
- Communicate with physicians, healthcare facilities, insurance companies, and patients to ensure accurate and timely reimbursement.

Graduates are adequately prepared for many roles, such as working in a front office with patients or behind the scenes with insurance companies and healthcare facilities. Upon graduation, students are encouraged and eligible to sit for AHIMA Certified Coding Associate (CCA) and Certified Coding Specialist (CCS) or AAPC Certified Professional Coder (CPC) certification exams to increase their employment opportunities.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umat.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umat.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

<sup>3</sup> Taken through Great Falls College-MSU. Students must also take AHMS 201 (3 additional credits) at Great Falls College-MSU in order to register for AHMS 160 and AHMS 164.

*Last updated Fall 2025*

## Medical Information Technology A.A.S. - Medical Administrative Assisting

Medical administrative assistants are critical to a healthcare facility.

They are the first person a patient talks to or meets when they come in for care. This program offers students a career in this fascinating and high-demand medical field. According to the Bureau of Labor Statistics, positions in these medical areas are expected to increase over 20 percent in the next several years.

In the first year of this program students will receive the Medical Reception certificate. Upon completion, students will continue to develop skills to:

- Effectively and confidentially communicate with patients, maintain patient records, schedule appointments, and transcribe letters and patient chart notes.
- Post charges and payments and submit insurance claims using current coding procedures.
- Create and update the office procedures manual, assist in improving work flow and office efficiencies, and supervise and communicate with office personnel.

Graduates are prepared for employment in clinics, hospitals, private practices, insurance companies, and work-at-home opportunities. Students successfully completing the program are awarded the Associate of Applied Science degree. Students may enter either Autumn or Spring semester.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umn.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged

to contact the offering department to discuss specific program and course modalities (<https://catalog.umd.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course requirements listed below may not be consistently offered via online delivery.

## Associate of Applied Science - Medical Information Technology; Medical Administrative Assisting Concentration

## Medical Reception C.A.S.

The Medical Reception Certificate prepares students with the required skills to provide exceptional service to patients in a medical setting, ranging from private practice receptionists to hospital ward secretaries. Students learn how to perform essential duties including:

- Greeting patients, scheduling appointments, screening telephone calls, obtaining and entering patient registration information, releasing appropriate medical information, maintaining medical records, and managing patient flow.
- Understanding the financial transactions of a practice with a clear understanding of all the activities in the billing and collection cycle.
- Applying foundational knowledge of medical law and the principles of medical ethics as well as the guidelines established by HIPAA.

Upon completion of the program, students receive a Certificate of Applied Science and will be prepared to work as receptionists in healthcare facilities and physician offices.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Online Program Option

This program may be completed in an online format (<https://catalog.umat.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umat.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. ## Paramedicine A.A.S.

The Paramedicine Associate of Applied Science program at Missoula College prepares students to provide emergency medical care to victims of illness, accident, or injury, assessing patients and performing critical medical interventions. As members of the allied healthcare team, Paramedics work as part of a comprehensive EMS response, applying their advanced knowledge of human anatomy and physiology to provide advanced life support care to patients.

The primary goal of the Missoula Paramedic Program is to prepare competent entry-level Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the Advanced Emergency Medical Technician and/or Emergency Medical Technician, and/or Emergency Medical Responder levels.

Paramedics are employed by ambulance services, fire departments, within hospitals, and as members of emergency flight crews. They employ life-saving strategies such as managing airways, establishing vascular access, performing CPR, and administering pharmaceuticals, often while transporting patients to critical care facilities. Students who demonstrate a commitment to life-long learning, civic engagement, and service to their communities are invited to apply.

Missoula College's Paramedicine program is delivered through a community partnership with Missoula Emergency Services, Inc. (MESI), which has been training paramedics since the 1980s. The program is a candidate for Accreditation by the Committee on Accreditation of Educational Programs for EMS Professions (CoAEMSP) and the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

Admission to the program is competitive and requires prior completion of 16 credits of pre-requisite coursework as well as a current NREMT Certification. The program's core classes begin every autumn semester and include 57 credits of classroom and laboratory instruction as well as hundreds of hours of experiential, hands-on clinical training within hospitals and aboard ambulances.

Student progress is evaluated in the classroom through testing of cognitive knowledge and in labs and clinical rotations through observation of the technical and psychomotor skills used in the profession. The program maintains high standards of ethical and professional behavior. Upon graduating, the student qualifies for an examination administered by the National Registry of Emergency Medical Technicians (NREMT), successful completion of which earns a national certification and allows the individual to practice in all states.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Pre-Health Professions Studies C.T.S.

### General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

### Online Program Option

This program may be completed in an online format (<https://catalog.umont.edu/online-programs/definitions/>). Students interested in pursuing an online degree or certificate program are strongly encouraged to contact the offering department to discuss specific program and course modalities (<https://catalog.umont.edu/online-programs/definitions/>) and create a plan of study with an academic advisor. The course

requirements listed below may not be consistently offered via online delivery.

## Certificate of Technical Studies - Pre-Health Professions Studies

## Radiologic Technology A.A.S.

A Radiologic Technologist (Radiographer) uses critical thinking and independent judgment to obtain diagnostic medical images while providing quality patient care and minimizing radiation exposure. Technologists are employed in acute care settings, ambulatory care settings, physicians offices, in education, and in management or sales positions. With additional education and training, radiographers may be employed in radiation therapy, computed tomography, mammography, magnetic resonance imaging, diagnostic medical ultrasound, nuclear medicine, special vascular imaging, and cardiac catheterization.

The Radiologic Technology program is approved by the American Registry of Radiologic Technologists (ARRT) and accredited by the Northwest Association of Schools and Colleges. When all requirements for the associate of applied science degree are completed, the student will be eligible to take the national certification examination administered by the American Registry of Radiologic Technologists. Upon successful completion of this examination, the student becomes a Registered Radiologic Technologist, R.T. (R) ARRT.

### Program Requirements

The Associate of Applied Science in Radiologic Technology requires students to successfully complete the Pre-Radiology prerequisite courses prior to applying to the program. Students admitted to the University of Montana may enroll in the Pre-Radiology prerequisite courses. Once accepted into the program, students will complete the A.A.S. in 16 months, graduating at the end of the second fall semester.

Students must pass BIOH 201N with a minimum grade of B and have a minimum cumulative GPA of 2.75 in all course work, including prerequisite courses, to apply to the Radiologic Technology program. A course may be attempted a maximum of two times. As some courses are offered autumn or spring semester only, it is important to obtain advising with the Program Director or Clinical Coordinator each semester prior to registration.

Application to the program is required spring semester in the year prior to the autumn semester program start. Students may apply while enrolled in the Pre-Radiology prerequisite courses with acceptance to the program to be determined after spring grades are finalized. Students who apply twice to the program and are not accepted are strongly encouraged to contact Career Services (<http://www.umt.edu/career/>) for counseling toward another degree.

The program classes begin autumn semester each year with the majority of classroom courses completed in the first two semesters. Clinical education will begin at the end of the first semester. A twelve-week summer session between the first and second years includes clinical rotations of 400 hours (40 hours/week for 10 weeks). The autumn semester of the second year also requires 400 hours of clinical instruction.

Students entering the program are required to rotate to clinical sites outside the Missoula area on a periodic basis. These rotations will take place during any term or session beginning the spring semester of the program. These sites may include, but are not limited to, Ronan, Hamilton, Plains, and Polson, Montana. Transportation and housing are the student's responsibility.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Applied Science - Radiologic Technology

- Students must complete the prerequisite core before applying to the Radiologic Technology Program or be in the process of completing the prerequisite core during the Spring Semester. Applications are due on or around April 1st.
- BIOH 201N must be passed with a minimum grade of B.
- All AHXR courses must be passed with a minimum grade of B.
- Students must have a minimum GPA of 2.75 in all course work including prerequisite courses to apply to the Radiologic Technology program.

<sup>1</sup> The prerequisite courses are taken before applying to the Radiologic Technology program. Along with BIOH 201N, students must register for the BIOH 202N lab section. These must be passed with a minimum grade of B. Students must also have a minimum cumulative GPA of 2.75 in all course work including prerequisite courses to apply to the Radiologic Technology program.

<sup>2</sup> The pre- or co-requisite courses can be taken either before applying or after being accepted into the program through the application process.

<sup>1</sup> All AHXR courses must be passed with a minimum grade of B including BIOH 210N.

Last Updated Fall 2025

Registered Nursing A.S.

The Associate of Science in Nursing requires four semesters of full-time study. Applicants to the program must have completed all pre-nursing prerequisites, have a cumulative GPA of at least 2.50 (last 60 credits only), and have received a B or better in BIOH 201N/BIOH 202N and BIOH 201N/BIOH 202N

Admission to the program requires completion of the application which can be obtained on the Missoula College Health Professions webpage (<http://mc.umt.edu/health/>). The number of students accepted into the A.S.N. program is limited to 18 students in the autumn semester and 18 students in spring semester. All candidates who meet the admission requirements will be considered. Students learn Registered Nursing skills through independent study, lectures, simulations, demonstrations, and advanced skills practice in the nursing lab. Under instructor supervision and preceptorship, students also provide patient care in a variety of acute care settings.

The Associate of Science in Nursing degree program is approved by the State Board of Nursing (301 South Park, Helena, MT 59601). The program

is accredited by the Accreditation Commission for the Education in Nursing (ACEN) (3343 Peachtree Road NE, Suite 850, Atlanta, GA 30326).

Students must provide proof of having met the following requirements to the Nursing Program Administrative Associate on or before the first day of class:

1. Two-step tuberculosis testing using the PPD (Purified Protein Derivative) or chest x-ray (positive results will require a physician's letter before a student can continue in clinical settings);
2. Hepatitis B vaccine and titer. The two- or three-injection Hepatitis B series must be started on or before acceptance into the program so the series is completed by the time clinical begins;
3. Measles, mumps, and rubella (MMR) immunization. For those born before 1956, it is not required to have an MMR, but a titer must be completed;
4. Influenza vaccination or signed declination;
5. Varicella (Chicken Pox) vaccination or positive titer;
6. Basic Life Support (BLS) training Healthcare Provider;
7. Criminal background check, including Sexual Offender Registry;
8. 10-panel drug screen.

Many licensing bodies and employing institutions in health care have increasingly stringent requirements and background checks as conditions for licensing or employment. If a student has concerns about this, they should contact the licensing board for nursing (dlibsdnur@mt.gov).

## Associate of Science - Registered Nursing

- This program requires a minimum GPA of 2.5
- Students must pass all Nursing (NRSG) courses and BIOH 201N/BIOH 202N and BIOM 211N/BIOH 212N with a minimum grade of B.
- It is highly recommended that students have completed SOCI 101S, PSYX 100S, BIOM 250N, and BIOM 251 prior to admission to the program.

**Total Hours**

**70-71**

- <sup>1</sup> M 121 is the recommended math course. Mathematics and writing prerequisite coursework should have been completed no more than 10 years prior to application to any specific health professions program. If mathematics and writing prerequisite coursework is greater than 10 years old, the student should take the writing and mathematics placement exams administered by the college. If the student places into a comparable level to the specific course in question, then that course shall be accepted as a valid prerequisite for the intended program. If the student places below the required standard, then they shall remediate as needed prior to application to the nursing program.
- <sup>2</sup> Students who completed WRIT 101 more than ten years prior to applying to the program must take the Writing Placement test. If the score on the test places the student in WRIT 101, the transfer credits will be accepted for the nursing program requirements. If the student places below the required standard, then they shall remediate as needed prior to application to the nursing program. All students must take WRIT 101 for the nursing program.

## Prerequisite Courses

| Course            | Title                                     | Hours        |

## Respiratory Care A.A.S.

Respiratory Care is an allied health specialty. It is an important part of modern medicine and health care. Respiratory Care encompasses the care of patients with respiratory problems in the hospital, clinic, and home.

Respiratory therapists, as members of a team of health care professionals, work to evaluate, treat, and manage patients of all ages with respiratory illnesses and other cardiopulmonary disorders in a wide variety of clinical settings. Respiratory therapists must behave in

a manner consistent with the standards and ethics of all health care professionals. In addition to performing respiratory care procedures, respiratory therapists are involved in clinical decision-making (such as patient evaluation, treatment selection, and assessment of treatment efficacy) and patient education. The scope of practice for respiratory therapist includes, but is not limited to:

- acquiring and evaluating clinical data;
- assessing the cardiopulmonary status of patients;
- performing and assisting in the performance of prescribed diagnostic studies, such as drawing blood samples, performing blood gas analysis, pulmonary function testing, and applying adequate recording electrodes using polysomnographic techniques;
- utilizing data to assess the appropriateness of prescribed respiratory care;
- establishing therapeutic goals for patients with cardiopulmonary disease;
- participating in the development and modification of respiratory care plans;
- case management of patients with cardiopulmonary and related diseases;
- initiating ordered respiratory care, evaluating and monitoring patients' responses to such care, modifying the prescribed respiratory therapy and cardiopulmonary procedures, and life support endeavors to achieve desired therapeutic objectives;
- initiating and conducting prescribed pulmonary rehabilitation;
- providing patient, family, and community education;
- promoting cardiopulmonary wellness, disease prevention, and disease management;
- participating in life support activities as required; and
- promoting evidence-based medicine, research, and clinical practice guidelines.

Starting salaries are excellent with premiums paid for evening, night, and weekend shifts. Jobs are plentiful throughout the United States. Graduates are eligible to take the credentialing examinations, administered by the National Board for Respiratory Care (NBRC), which include the Therapist Multiple Choice (TMC) examination and the Clinical Simulation Examination (CSE). Upon successfully achieving the designated Low Cut score, the candidate is awarded the Certified Respiratory Therapist credential. When the candidate successfully achieves the High Cut score, instead of the Low Cut score, on the TMC, they are eligible to take the CSE. Once the CSE is successfully passed, the candidate is awarded the Registered Respiratory Therapist (RRT) credential. Licensure requirements in the state of Montana are met by successful achievement of the Certified Respiratory Therapist (CRT) credential.

The goal of the program is, "To prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) domains of respiratory care practice as performed by registered respiratory therapists (RRTs)" CoARC standard 3.01.

The program is 4 semesters in length which includes the AA prerequisite courses and a summer session. The Respiratory Care Program at The University of Montana Missoula College, is accredited by the Commission on Accreditation for Respiratory Care ([www.coarc.com](http://www.coarc.com/)) (http://www.coarc.com/), 264 Precision Boulevard, Telford, Tennessee 37690.. Graduates receive the degree of Associate of Applied Science in Respiratory Care.

Students accepted to the program are required to rotate to clinical sites outside the Missoula area on a periodic basis. These rotations take place during the spring semester, summer session and autumn semester of the second year. These sites may include, but are not limited to: Kalispell, Ronan, Plains, Butte, Billings, Hamilton, Helena, and Coeur d Alene, Idaho. Transportation and housing are the student's responsibility.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Applied Science - Respiratory Care

- It is preferred that students have the Pre- Respiratory Care Prerequisite Courses completed by the end of the semester in which they intend to apply to the program (i.e. applying to the program in the spring and completing the core by the end of that spring semester.) However, those students who anticipate completing the core by the end of the summer semester are still encouraged to apply in the spring and may be granted provisional acceptance.
- A minimum GPA of 2.75 for prerequisite courses is required in order to apply to the program.
- The minimum required grade for all courses in the program is B-.

## Surgical Technology A.A.S.

The Surgical Technology program is designed to prepare the student for employment as a surgical technologist, an integral member of the team of medical practitioners providing surgical care to patients.

Surgical technologists work under the supervision of a surgeon to facilitate the safe and effective conduct of invasive surgical procedures. They ensure that the operating room environment is safe, that equipment functions properly, and that the operative procedure is conducted under conditions that maximize patient safety.

Surgical technologists possess expertise in the theory and application of sterile and aseptic techniques and combine the knowledge of human anatomy, surgical procedures, and implementation of instrumentation and technologies to facilitate a physician's performance of invasive therapeutic and diagnostic procedures.

Students admitted to the University of Montana enter as Associate of Arts (AA) general studies majors with an emphasis in the program of their choice. Students must select the specific prerequisite courses required for their chosen area of study after meeting with the program advisor. Students must apply to the program by October 1 of each year. Students may apply while enrolled in the A.A. prerequisite courses with acceptance to the program to be determined after autumn semester grades are finalized. BIOH 201N/BIOH 202N (Anatomy and Physiology I and lab) must be passed with a minimum grade of B (3.0). The program-specific courses begin spring semester.

Once accepted to the program, a student must complete each Surgical Technology-specific course (those courses with the AHST subject code) with a minimum grade of C (80%) in order to continue in the program. Course grading scales may vary. If a student does not pass the required courses, they will not be able to continue in the program and will need to apply for readmission. If a student is re-admitted, they will be required to retake any AHST courses so that they are completed in the proper consecutive sequence. A student may take any required course a maximum of two (2) times. A student may apply to the program a maximum of two (2) times.

A student will become a member of the Association of Surgical Technologists during the second semester in the program. A student anticipating program completion will take the National Certification Exam prior to graduation. A student who successfully completes the Surgical Technology program is awarded an Associate of Applied Science degree in Surgical Technology. The credential of Certified Surgical Technologist (CST) will be awarded to a student upon passing the National Certification Exam and graduation from the program. This

credential is awarded by the National Board of Surgical Technology and Surgical Assisting (NBSTSA).

Students are required to rotate sites during the clinical portion of their education, which may include rural and critical access facilities. During the final semester of the program, internships will be arranged outside the Missoula area for a minimum of two weeks. Transportation and housing are the student's responsibility. Prior to entering a healthcare facility for clinical experiences, a student will be required to submit a background check and complete a drug screening. Many healthcare facilities have increasingly stringent requirements. A student may be refused entry into a clinical facility based on information disclosed in the background check. If this is a concern, please consult the Program Director. If a student is denied agency access based on the background check, there will be no placement at an alternate site, and the subsequent inability of the student to complete the clinical education will result in the inability to continue in the Surgical Technology program.

The Surgical Technology program is accredited by the Committee on Accreditation of Allied Health Education Programs (CAAHEP), 9355 – 113<sup>th</sup> St. N, #7709; Seminole, FL 33775 ([www.caahep.org](http://www.caahep.org)) upon recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC-STSA), 19751 East Mainstreet, Suite #339; Parker, CO 80138 ([www.arcstsa.org](http://www.arcstsa.org)) (<http://www.arcstsa.org>).

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Applied Science - Surgical Technology

- It is preferred that students have the prerequisite core completed by the end of the semester in which they intend to apply to the program (i.e. applying to the program in the fall semester and completing the core by the end of that fall semester.)
- BIOM 250N/BIOM 251 and AHMS 270E may be taken prior to submission of the program application.

## Industrial Technology

The mission of the Department of Industrial Technology is to provide the regional workforce with credentialed, skilled, and competent entry-level technicians and to be responsive to emerging workforce needs. The department encourages the development of teamwork and interpersonal communication skills required in the workplace. It also stresses the importance of a strong work ethic and the value of continuing education and lifelong learning. The instruction for the Department of Industrial Technology Certificate of Applied Science and Associate of Applied Science (A.A.S.) degree programs are primarily delivered at the West Campus at 2795 37th Avenue, Missoula MT 59804. Some instruction is delivered at the River Campus or Mountain Campus.

All students admitted to Industrial Technology programs are required to submit writing placement scores immediately upon admission to the Missoula College or make arrangements to take these assessments as soon as possible. Students who live outside of the Western Montana area may take a writing assessment at their local community college.

## Programs

- Building Information Modeling and Computer Aided Drafting & Design (BIM-CADD) C.A.S. (p. 419)
- Carpentry C.A.S. (p. 420)
- Construction Helper C.T.S. (p. 421)
- Construction Management C.A.S. (p. 421)
- Diesel Technology A.A.S. (p. 422)
- Green Building C.T.S. (p. 422)
- Heavy Equipment Operation C.A.S. (p. 423)
- Sustainable Construction Technology A.A.S. (p. 424)
- Welding Technology A.A.S. (p. 425)
- Welding Technology C.A.S. (p. 426)

## Building Information Modeling and Computer Aided Drafting & Design (BIM-CADD) C.A.S

The BIM-CADD program offers graduates a pathway into professional careers as technicians in civil, mechanical, and architectural drafting. Other career opportunities exist in construction project management, construction support, geographic information systems, mapping, surveying, and technical design. This one-year program prepares students in mathematics, business, writing, and basic construction design, as well as the most current relevant building information modeling and drafting software programs.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Carpentry C.A.S.

This one-year certificate in Carpentry is for students looking to obtain a hands-on working knowledge of basic carpentry skills. Students will get instruction and practice in entry-level skills, including site preparation

and layout, concrete forming and placement, residential framing, roofing, siding, and window installation.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Construction Helper C.T.S.

This one-semester certificate program is designed to prepare candidates for entry-level positions across the construction industry. Designed to make students job-site ready, the program covers job-site safety as well as a hands on introduction to site and foundation work and basic carpentry.

### General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Construction Management C.A.S.

The program provides students the opportunity to learn construction skills in a competency based learning environment. In addition to general

education courses, students in the program learn the various steps of becoming a successful tradesperson in the construction industry, including safe practices, management and skills competencies. Students construct real world projects and can earn a Certificate of Applied Science and continue for another year to earn an Associate of Applied Science Degree.

### General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Diesel Technology A.A.S.

The mission of the Diesel Technology Program is to provide the regional workforce with credentialed, skilled and competent diesel technicians and to be responsive to emerging workforce needs.

Students in the Diesel Technology program train to be diesel mechanics that repair diesel-powered trucks and heavy equipment. Students study hydraulics, electrical systems, fuel systems, power trains, air conditioning, brakes and suspension, engine theory, and engine diagnosis, beginning with basic principles and proceeding to an advanced level of system technology. Along with these core courses, students take classes in welding, machining, computers, communications, and math. Credit for independent study is available to those desiring additional instruction in diesel mechanics. Students who complete the program successfully are awarded the Associate of Applied Science degree.

The program often has a waiting list. Prospective students are encouraged to apply one year prior to anticipated school attendance.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Green Building C.T.S.

The mission of this one-year certificate is to give students an overview of the green building industry with instruction and hands-on experience in the principles of green building, energy efficiency, green rating systems, including the ICC700 and LLED programs, and prepare them for further study or entry-level careers in the emerging green building industry.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Heavy Equipment Operation C.A.S.

The mission of the Heavy Equipment Operation Program is to provide the regional workforce with credentialed, skilled and competent heavy equipment operators and to be responsive to emerging workforce needs. The Heavy Equipment Operation Program provides students with a basic understanding of fundamental machine functions and is designed to develop apprentice-level skills in the operation of heavy equipment.

Students are trained to safely and properly operate and maintain a variety of heavy equipment, including crawler-tractors, graders, scrapers, front-

end loaders, excavators, backhoes, and dump trucks. Students develop an understanding of basic surveying techniques, receive extensive training in safety regulations and procedures, and learn how to handle controls precisely and judge distances accurately. The program also promotes an awareness of potential job site difficulties and allows students to gain knowledge of the work ethic expected by employers in the construction industry.

A Certificate of Applied Science is awarded upon successful completion of the program.

This is an Autumn Semester entry program, and enrollment is limited.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

Last Updated Fall 2025

## Sustainable Construction Technology A.A.S.

This two-year Associate of Applied Science course of study is designed to prepare students for a wide range of building industry career paths. Students will get hands-on training in various job-site skills, including safety training as well as instruction and practice in entry-level skills, including site preparation and layout, concrete forming and placement, residential framing, roofing, siding, and window installation. Students pursuing a certification in Green Building or Construction Management can apply those credits toward this degree.

Additionally, students will be exposed to basic job-site control practices, scheduling, estimating, and the major guiding principles of green building and sustainable construction. Working on an actual on-site modular home, students completing the program will have experience and exposure to all aspects of residential construction, including foundations, framing, roofing, siding, insulation, drywall, cabinetry, floor finishes, and the process of basic project management.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Welding Technology A.A.S.

The mission of the Welding Technology Program is to provide the regional workforce with credentialed, skilled, and competent welders and to be responsive to emerging workforce needs. The Welding Technology Program prepares students to operate and troubleshoot a variety of welding power sources and related equipment. The program prepares students to solve problems using computational skills and other problem-solving techniques essential to welding and steel fabrication. It also encourages the development of the teamwork and interpersonal skills required on the job.

Welding students develop skills in six different welding processes: oxyacetylene (OAW), shielded metal arc (SMAW), gas metal arc (GMAW), flux core arc, (FCAW), submerged arc (SAW), and gas tungsten arc welding (GTAW). Students also develop additional skills, such as blueprint reading and layout, metallurgy, and gain an understanding of how heating and cooling cycles affect the properties of metals. Students also study the design of jigs and fixtures and how to incorporate these into an automated welding system.

Courses such as Computer Aided Design and Drafting (CADD), OSHA Rules and Compliance, and Related Metals Processes provide for a solid background in the metals industry. Fabrication basics and Metal Design and Construction utilize all of the gained knowledge in an instructor-approved/student-designed project.

Welding technology students have the opportunity to become certified to American Welding Society Standards and receive documentation stating qualifications.

Students are awarded the Certificate of Applied Science upon successful completion of the first year of the Welding Technology program. Students are awarded the Associate of Applied Science degree upon successfully completing the two-year program.

The program often has a waiting list.

## General Associate Degree Requirements

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of an associate degree program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Associate of Applied Science - Welding Technology

Welding Technology C.A.S.

The mission of the Welding Technology Program is to provide the regional workforce with credentialed, skilled, and competent welders and to be responsive to emerging workforce needs. The Welding Technology Program prepares students to operate and troubleshoot a variety of welding power sources and related equipment. The program prepares students to solve problems found within the welding industry using computational skills and other problem-solving techniques essential to welding and steel fabrication. It also encourages the development of teamwork and interpersonal skills required on the job.

Welding students develop skills in six different welding processes oxyacetylene (OAW), shielded metal arc (SMAW), gas metal arc (GMAW), flux core arc, (FCAW), submerged arc (SAW), and gas tungsten arc welding (GTAW). Beyond the development of welding skills and understanding of the process, they also study other skills, such as blueprint reading and layout, metallurgy, and gain an understanding of how heating and cooling cycles affect the properties of metals. Students

also study the design of jigs and fixtures and how to incorporate these into an automated welding system.

The Welding Technology Program also has courses that provide for a solid background in the metals industry. Such courses are Computer Aided Design and Drafting (CADD), OSHA Rules and Compliance, and Related Metals Processes. Fabrication basics and Metal Design and Construction utilize all of the gained knowledge with an instructor approved/student designed project.

Welding technology students have the opportunity to become certified to American Welding Society Standards and receive documentation stating qualifications.

Students are awarded the Certificate of Applied Science upon successful completion of the first year of the Welding Technology program. Students are awarded the Associate of Applied Science degree upon successfully completing the two-year program.

The program often has a waiting list.

## General Certificate Requirements

Additional requirements for graduation can be found on the Degree/ Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Interdisciplinary Majors, Minors, and Certificates

- International Development Studies Minor (p. 427)
- Military Science (p. 428)

## International Development Studies Minor

### General Degree Requirements

To earn a baccalaureate degree, all students must complete successfully, in addition to any other requirements, the University of Montana General Education Requirements. Please refer to the General Education Requirements page (p. 39) for more information.

Additional requirements for graduation can be found on the Degree/Certificate Requirements for Graduation page (p. 36).

Unless otherwise noted in individual program requirements, a minimum grade point average of 2.00 in all work attempted at the University of Montana-Missoula is required for graduation. Please see the Academic Policies and Procedures page (p. 25) for information on how your GPA is calculated.

Courses taken to satisfy the requirements of a major, minor, or certificate program must be completed with a grade of C- or better unless a higher grade is noted in the program requirements.

## Minor - International Development Studies

- This minor requires a minimum GPA of 2.5.
- At least six credits must be upper-division credits.
- No more than 6 Core Course credits may be taken from the same discipline.

### Course Requirements
