

## Riparian and Wetland Ecological Monitoring Crew Lead O'Connor Center for the Rocky Mountain West

**The University of Montana (UM) O'Connor Center for the Rocky Mountain West (OCRMW)** in a partnership with the Bureau of Land Management (BLM) seeks experienced technicians to implement their Riparian and Wetland Assessment, Inventory, and Monitoring (AIM) strategy. The goal of this work is to collect standardized data in wetland and riparian areas at multiple scales across BLM Districts in the Western U.S.

We are currently recruiting **Crew Leads** with experience in botany, ecology, wetlands, and soil science for data collection in **Idaho and Nevada** from **April/May through August/September** (exact dates vary by project).

The Crew Leads will lead a Technician and Botanist to collect vegetation and soils data in wetland and riparian ecosystems. Crews of 3 people work eight-day hitches: 10-hours/day, from Tuesday-Tuesday, with a six-day break between hitches. All positions are field-based and require working and camping in isolated regions. We ask seasonal staff to commit to the entire field season, practice safety awareness, safe driving policies, and contribute to building a healthy, productive, and enjoyable work environment.

Applicants should understand that this is a physically demanding position. Crews often work and camp in inclement weather conditions, frequently navigating rough, unpaved roads in 4x4 vehicles, and carry heavy loads (40 lbs.) by foot over rugged desert and mountainous terrain. Sampling locations are occasionally near small towns, but these towns often have few amenities. Primitive camping is required. Cell phone service is limited.

UM supplies all necessary monitoring equipment, including vehicles, to carry out the work. We provide some group camping gear (stoves, coolers). Individuals are responsible for their personal camping gear (tents, sleeping bags) but UM has camping gear available to borrow.

*The University of Montana is an Affirmative Action/Equal Opportunity employer and has a strong institutional commitment to the principle of diversity in all areas. Applicants with diverse backgrounds, experiences, ability, and perspectives are encouraged to apply.*

### Position Details

- Position is full time, temporary (< 4 months).
- Compensation is \$20-22 an hour, based on qualifications and experience.
- All positions include (tax-free):
  - \$268 meal per diem per 8-day hitch
  - Muck boots (kept by employee on completion of the season, a ~\$100 value)

- Field/Camping Equipment (kept by employee upon completion of field season, up to \$500 value)
- Benefits include Worker's Compensation coverage, paid holidays, and accrual of sick leave.

## **Qualifications**

### **Education and Experience**

- A bachelor's or master's degree in biology, botany, soil science, range ecology, natural resources management, or related subject.
- A minimum of two full field seasons collecting scientific data, specifically vegetation sampling, soil profile descriptions, water quality sampling, and/or other environmental data. A completed master's degree with field work can satisfy this requirement. Knowledge of wetland ecology and experience working in wetlands and/or riparian areas preferred.

### **Preferred Technical Skills**

- Experience identifying rangeland plants to species in the field using a dichotomous key (e.g., Flora of the Pacific Northwest, Hitchcock and Cronquist, Jepson), including challenging taxa, such as Salicaceae, Poaceae, and Cyperaceae. Crews may encounter 60-90 plant species in a single plot, in various phenological states. Successful AIM sampling requires rapid and accurate field identification using dichotomous keys and meticulous documentation of unidentified plants.
- Familiarity with commonly accepted plant nomenclature and taxonomy.
- Experience preparing and organizing voucher and herbarium specimens.
- Ability to describe soil horizons, textures and stability and collect soil samples for analysis.
- Careful attention to detail.
- Demonstrated experience with data management and carrying out data quality checks.
- Experience following established field protocols to conduct sampling and field data collection.
- Experience with data entry and management using electronic devices.
- Experience navigating off-trail with compass and GPS.
- Experience with Microsoft Office (Word, Excel) and preferably with Collector for ArcGIS and Survey123.
- Experience driving 4WD trucks, especially on rough and unmaintained roads. Valid driver's license and clean driving record (DUI or other serious convictions need not apply).
- Certification in CPR and Wilderness First Aid.

### **Professional Skills**

- Experience supervising technicians, volunteers or undergraduate students. Leadership in a volunteer or community organization, or in the military, can satisfy this requirement.
- Demonstrated ability to resolve interpersonal conflict during stressful situations.
- Ability to interact with stakeholders and partners in a professional manner.
- Experience managing gear and equipment for a crew, lab class, team, etc.
- Demonstrated ability to work productively as part of a team to accomplish mutual goals and to work independently as required.
- Commitment to an entire field season.

### **Physical Requirements**

- Ability to carry 40 pounds in a backpack over rugged mountainous terrain, off-trail, for up to eight (8) miles a day, gaining up to 2000 ft. of elevation per day.
- Ability to dig soil pits in rocky and dense soils (50 cm deep).
- Willingness and ability to maintain a positive attitude in field conditions that include exposure to inclement weather, hot or cold weather (20°F–110°F), rugged terrain, mosquitos, venomous snakes, bears and other wildlife, lightning, wildfire, etc., all while maintaining a strong commitment to team safety required.
- Willingness to work irregular hours in harsh environments and challenging weather conditions.

### **Training**

These positions are ideal for people who are committed to ongoing learning and professional development. You will receive paid training on AIM protocols and associated methodology. UM ecologists will also provide additional training on protocols, soil assessment, and plant identification for the area in which you will be working, and ongoing field-based support and training from specialists during the field season. You will have the opportunity to interact with seasoned staff scientists from both the BLM and UM throughout training and field work.

### **Location**

Base locations for each project:

- **Idaho** – Missoula, MT or Pocatello, ID
- **Nevada** – Carson City, NV

### **How To Apply**

**Applications review will begin December 7 and will continue until the position is filled.**

Please submit the following documents to [wetlandaim@umontana.edu](mailto:wetlandaim@umontana.edu). The subject line of the email should read "**2024 Riparian and Wetland AIM Application – Crew Lead**".

Please combine all application materials into 2-3 documents.

1. Letter of Interest – Please ensure it addresses the following:
  - a. Your ability to meet the stated required skills for the position.
  - b. Your preferred location.
  - c. Your earliest start date.
  - d. Have you applied for any other positions with OCRMW?
2. Detailed resume listing education and describing work experience.
3. Names and contact information for three (3) professional references.
4. Transcripts (Unofficial Transcripts are acceptable)

Application review will be ongoing and will continue until all positions are filled. All applicants will be notified of receipt of their application and the results of the preliminary review (rejected due to failure to meet minimum qualifications or transmitted to hiring team). If you qualify for an interview, you will have the opportunity to speak with staff who worked as AIM crew members in previous years.

## About UM and the Ecological Mapping, Monitoring and Analysis group

The University of Montana is flagship, research institution with approximately 10,000 undergraduate and graduate students. The O'Connor Center for the Rocky Mountain West (OCRMW) is a regional studies and public education program at UM. OCRMW staff are engaged in mapping wetlands across the western US, including Alaska; and in carrying out inventory and monitoring projects for federal, state, and tribal agencies.
