

User Overrides (Extensions) for Quizzes

Instructors can create a **User override** to give students more time to complete a quiz in Moodle.

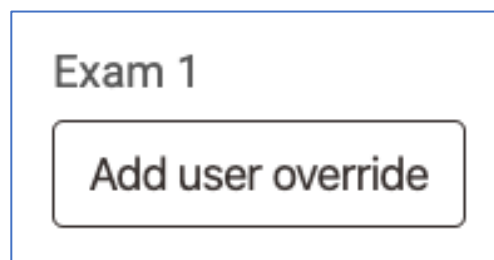

A student may have sent you a letter from Disability Services for Students informing you that they need additional time to complete tests due to a documented disability. You can easily provide this kind of accommodation for students in Moodle quizzes.

Navigate to the Quiz activity to which you want to add a user override and select the name of the quiz. From the quiz, select the **Administration menu** (gear icon) and select **User overrides**.

The screenshot shows the Moodle interface for a quiz titled "Examples of Quiz Questions". The top left corner displays the "UM Online UNIVERSITY OF MONTANA" logo. The breadcrumb trail reads "P-Miscellaneous / Moodle Basics for Faculty / Quizzes". The main content area includes a description: "This short quiz goes through the most popular question types.", a time limit of "1 hour 30 mins", a grading method of "Highest grade", and "Attempts: 9". A "Preview quiz now" button is visible. On the right side, a navigation menu is open, showing options like "Edit settings", "Group overrides", and "User overrides", which is circled in red. Other menu items include "Edit quiz", "Preview", "Results", "Locally assigned roles", "Permissions", "Check permissions", "Filters", "Competency breakdown", "Logs", "Backup", "Restore", and "Question bank".

After selecting the **User overrides** link from the menu, select the **Add user override** button.

From the drop-down menu under **Override user**, locate and select the student who needs an override. Set the override options as needed to reflect the needs of the student. For example, if a student requires more time to complete a test, indicate the new time limit you will provide to that student. It is not necessary to set the remaining options on this page unless they need to be different than what was originally selected in the quiz settings.
