The Executive Committee of the Faculty Senate has a summer retreat usually the week prior to the start of classes. Administrators are invited to provide a brief update of expectations for the coming year. Standing committee chairs are also invited to apprise ECOS of expected business items. ECOS uses this information to create goals for the year. At the September meeting, the chair provides the Senate with a report outlining a program for consideration. The program of the senate lists principle areas that will engage faculty governance in the ensuing year.
