2022 President’s Outstanding Student Award
Missoula College

Erin Briana Corbett
Registered Nursing
Professor Ginger Sillars

Throughout her time in the Missoula College nursing program, Erin consistently demonstrated her commitment to becoming a safe, thoughtful and compassionate nurse. Utilizing her strong leadership skills and dedication to service, she was her cohort's student ambassador, helping to facilitate communication among her classmates and with faculty. Plus, her excellent academic performance, we think she is an Outstanding Student!

Brian Turner
Sustainable Construction Technology
Professors Walt Wilson & Steve Rosary

It is with extreme confidence that we recommend Brian Turner for the Outstanding Student Award in the Sustainable Construction Technologies department at Missoula College. Brian is one of many students who endured the COVID years at Missoula College. A time riddled with the frustration of zoom classes and labs (a critical part of the learning and trades development here at West Campus) forced to be canceled. Brain came into this second year engaged, enthusiastic and curious. As his skill set expands, so has his attention to detail, process and efficiency. Beyond those accomplishments, he is taking the time to help other students, including some of our first years, understand the process and lessons. We have faith in his ability to truly succeed because of his effort put forth here at Missoula College West Campus. Brian has proven to be a great example of what an outstanding student looks like. Someone who gains knowledge and experience that evolves and expands during their time here, works to share that knowledge and experience, and also understands that it is a partnership with faculty in achieving their goals to get set for a successful future.
Erin C. WilmARTH-Klare  Paramedicine  Professor Dave McEvoy

Erin was an outstanding paramedic student who has now become an outstanding paramedic for the Missoula Fire Department. She is one of only four female paramedics at the Department and balanced full-time work, full-time school, and helping to raise young children in order to earn her state and national paramedic certifications.

Christopher Moles  Applied Arts and Sciences  The Faculty & Staff of the Department of Applied Arts and Sciences

The Department of Applied Arts and Sciences (AASc) is nominating Christopher Moles for a President’s Outstanding Student Award. Christopher will be receiving the Associate of Arts Degree this spring, and while completing his course requirements for the Associate of Arts Degree, he has demonstrated notable investment in his learning. Words nominating AASc faculty use to describe him are engaged, insightful, intelligent, hardworking, curious, kind, and collaborative.

According to Christopher, he returned to school not only to improve his job skillset but to expand his knowledge and explore ideas to which he had not before been exposed. His eagerness to broaden his perspective and actively engage in his education are demonstrated in his thoughtful and eager contributions to class discussion as well as the course choices he has elected to comprise his general education, e.g. religious studies, creative writing, literature, journalism, rhetoric, and political science. Christopher describes himself as passionate about film and literature and plans to pursue a BA in Communication Studies. We are so very proud to nominate Christopher Moles as our department’s recipient of this year’s Outstanding Student Award.
