

SP Document Naming Conventions

Attachment Types	Description
Proposal Document	Documents in these types capture communication between UM and sponsor through the award lifecycle.
Award Document	
Subaward Document	
Budget	Different budgets may be uploaded during the award lifecycle. The file naming convention per budget will provide detail needed to differentiate.
Supporting Documentation	Any documentation which does not clearly fall in another attachment type (e.g. sponsor email communications, F&A Split request, etc.)
Report Document	Deliverables in UM or sponsor format which are complete and transmitted to the sponsor (e.g. SF425s, NIH invention reports, etc.); does not include non-financial progress reports
Closeout Document	All financial documentation which was in-progress during the project period which can be consolidated and attached at closeout (e.g. ledgers, bustrs, subaward files, etc.)

All documents should have the Tag, the PI's last name, and the proposal or award number in the filename in the format [Tag]_[PILast]_[proposal/award number]. For example, a proposal document would be labeled Proposal_Unruh_22-0533-P1, or PROPBudget_Unruh_22-0533-P1; an award document would be labeled FEAward_Unruh_22-0533-A1, or FEMod_01_Unruh_22-0533-A1.
